

## Sending a Message

1 **To Send a Message** - select **Send Message** from the message main menu, then press the Function button . The top of your display screen now reads **Send To:**

2 Enter phone number or e-mail address you are sending the message to.

- To send a message to two or more cell phone users, press the down arrow key on your menu/cursor key.

When you are finished entering the phone number or e-mail address, select **OK** on the display screen by clicking on the double bar key .

3 The top of your display screen now reads **Enter Text:**. Use the letters on the keypad to type your message.

-  - This represents the space key and can be found in the lower right hand corner of the phone.
- T9®** - When you are entering text you need to hit the single bar key  once to enter T9® mode. The CDM-9100 uses T9® text input for easier message composition. T9® allows you to compose a message using a built-in dictionary. You only need to press each key once and T9® will predict what word you are using. For example, to type the word "hello" you would hit numbers [4][3][5][5][6], once each, on your key pad.

4 After the message is completed, hit the double bar key  to click on **OK**. The top of your display now reads **Send Message**.

Using your menu/cursor key you have the option to:

- Edit Send To** - Edit the number you are sending the message to or correct the address.
- Edit Text** - Edit the text message you are about to send or correct your message.
- Priority** - Mark your message as "Urgent".
- Call Back #** - Change your call back number temporarily for the current message.
- Delivery Ack** - Change acknowledgment mode temporarily for the current message.
- Enhanced Ack** - When your message is received, the phone displays "Delivered."
- Save to Outbox** - Save your message as a draft and exit the messaging feature.

Select an option by pressing the Function key . After you are finished exercising your options or if you choose not to select any options, use the double bar key  to select **Send**.

5 The sending mail icon appears with animation. You will also get confirmation after your mail has been sent.

## Receiving a Message

1 **To Check Received Messages** - Press the envelope key . From the list displayed, select **Inbox**. If you have new messages in your mailbox, the \* symbol will appear and flash to the right of the Inbox. If it does not appear, it means that you have no inbox messages.

2 Assuming you do have a message, use your menu/cursor key to highlight **Inbox** (press the down arrow key  and then select Inbox by pressing the Function key .

- A short cut to the Inbox:** Press and hold the envelope key  for about 3 seconds.

3 The Inbox lists the received messages with the sender name, if you have it programmed in your phone book. If not, it just lists the sender's number.

4 If there is more than one message, use your menu/cursor to scroll the list of sender names or numbers. The icon symbols on the left hand side of the display determine what kind of message you have stored.

-  New text that you have not viewed yet.
-  Old text that you have already viewed.
-  Urgent new text.
-  Urgent old text.

5 The top of your display now reads **Inbox** and shows the icon symbol for new text along with the sender number or name. Press the Function key  to move to the next step.

6 The top of your display now reads **\*New Text\*** and underneath you can see the date and time the message was sent. The bottom of the display now looks like this: **Option OK**. Notice that the bottom arrow is darker than the top arrow, meaning you can use the down arrow key on the menu/cursor to scroll down where you can see who the message is from. If you hit the down arrow key again, you can access the message.

**Options** After reading the message, if you press the single bar key  you will have access to four options: **Reply**, **Forward**, **Erase**, **Save Address**.

**Reply** If you highlight **reply** and press the Function button on the menu/cursor key , you can reply back to the person who sent you the message. It would be the same format as sending a message.

**Forward** If you highlight **forward** and press the Function button on the menu/cursor key , you can forward the message to anyone who is a capable receiver. It would be the same format as sending a message.
