Cadillac Hospital

Introduction

- Instructor
- Learners
- Fire Exits, Restroom locations

Why We're Here Today *and* Why We're Moving to Oracle Health

Today's Purpose: To officially kick off our "Drive to 1/25" as we enter the home stretch of our One Patient Record journey.

MHC's Vision: To be our communities trusted source of compassionate, seamless care for another 100 years.

Why We're Moving to Oracle Health: Moving to One Patient Record is an integral part of our vision, allowing us to ensure patients have a seamless experience across our system with one centralized EHR platform.

No matter which door a patient walks through in our system, One Patient Record will better prepare our Healthcare Team to deliver the care our patients need, where and when they need it.

Disclosures

- Successful completion requirements:
 - Attend entire education activity
 - Complete post-session evaluation
- No one in control of educational content has any relevant financial relationships with ineligible companies to report.

Munson Medical Center is approved as a provider of nursing continuing professional development by Wisconsin Nurses Association, an accredited approver by the American Nurses Credentialing Center's Commission on Accreditation.

Class Overview

- Class flow:
 - Length: 8 hours total with breaks and 30 minute lunch break
 - Layout: Guided hands-on scenarios, then self-guided practices
- Education environment:
 - This is a training environment and may differ from what the live applications look like

Learner Expectations

- Stay with Instructor
- Raise your hand with questions or if assistance is needed
- Cell Phones on silent and put away
 - Please no email checking or texting during instruction

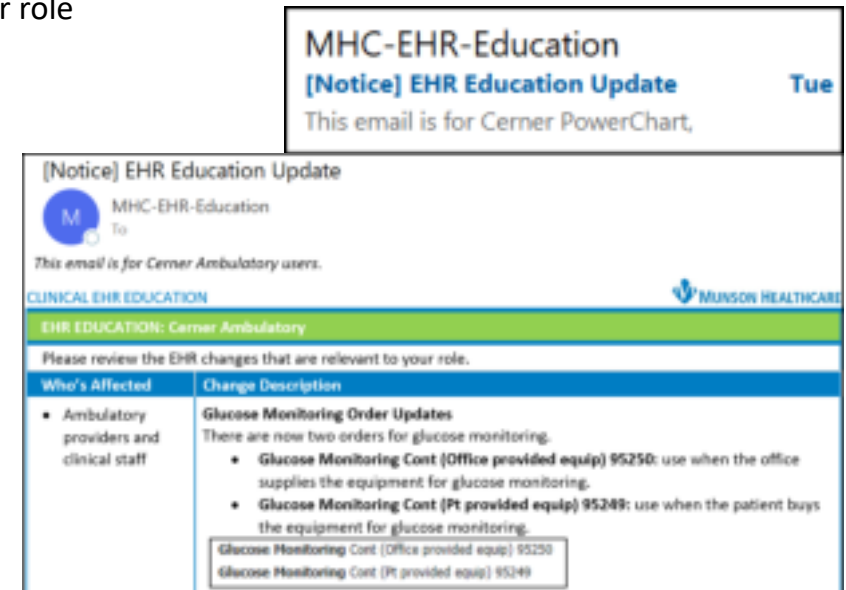

Class Agenda

- Navigation
- Documentation
- SurgiNet
- Barcoding: Continuous IV and Titratable IV Drips with rate changes
- Discharge Process

Communications

- **Email Communication** – make sure you are checking at least daily
- **EHR Education Emails**
 - Standard emails every Tuesday. During implementation may be more frequent. Check for updates
 - Contains information on changes or reminders for electronic platforms related to your role

- **IT/IS Updates** – may include Cerner updates, downtime updates or other important information
- **Compass**-Munson Healthcare emails, regularly scheduled every Monday, Wednesday, and Friday and updates at other times as needed.
- **One Patient Record Updates**
 - Communication specific to the One Patient Record launch.
 - Email: OnePatientRecord-Questions@mhc.net

Clinical EHR Education Website

In preparation for the January 25th One Patient Record launch:

1. Navigate to the '[End User Specific](#)' website section.

2. On the left side of the page next to your role, click on the down arrow to access a list of topics and review the education resources.

3. Add this website section to your Favorites bar.

4. Plan to open this website section on January 25th for quick access to education resources.

Login

- Login to your computer using your personal Munson user ID and password.
 - Use your **PRIMARY** Munson healthcare login. If you have multiple accounts, do not use your #2 or #3 login
- Login to TRAIN Powerchart T2062B
 - Open Citrix Storefront
 - Use the login card on your desk and enter the username and password provided

Focus Notes Explain

- Unusual or unexpected events
 - Condition changes
 - MRT/Code Blue
- Nursing/medical interventions
 - Oxygen level changes with treatment/patient response
 - BP and HR level changes with treatment/patient response
- Emotional or psychological needs of the patient/family
- Abnormal patient finding that needs in-depth explanation
- Do not use specific times when documenting focus notes unless you know the exact time an event occurred.

IPOC: Interdisciplinary Plans of Care

- Problem based
- Individualized for the patient
- Initiated upon Admission
- Reviewed and documented each shift

Data Populates into IPOCs

Clinical Reconciliation

What?

The process of verifying clinical data that exists within the HER is consistent with external sources.

Why?

Government requirement for reimbursement of Medicare and Medicaid patients. Benefits the patient by validating history.

Where?

Intake – Nursing Workflow

Clinical Reconciliation - Allergies
