LED SEAMLESS VAPOR PROOF FIXTURE

▶ **DESIGN** - LED SEAMLESS VAPOR PROOF FIXTURE has a waterproof polycarbonate body with a frosted lens, making this fixture impact resistant. Design of the fixture allows to connect multiple fixtures together. Comes with a 4ft cord to make the installation process easier. It is designed to operate on 120-277V circuits with a 0-10V dimmable driver.

▶ **BATTERY BACK-UP** - The built-in battery back-up provide 90 minutes of power in case of emergency.

▶ **COLOR AND POWER SELECTABLE** - You can choose either a 3,500K neutral white, 4,000K cool white or 5,000K daylight color temperature, and change the power with a simple switch.

▶ Surge protection 6kV protects the fixture from voltage spikes and current surges.

▶ **APPLICATION** - Perfect commercial or industrial solution for parking garages, carports, stairwells, tunnels, car washes, and many other applications. It is also Wet Locations rated.

▶ **ADVANTAGES** - With calculated lifespan up to 80 000 hours, these fixtures are made to last decades under normal operation! ASD provides a 5-year limited warranty along with UL and DLC Standard certifications to guarantee top quality products and safety!

Battery Back-up | IP66 | Wet locations

PACKAGE CONTENTS:

Description	Quantity
LED Seamless Vapor Proof Fixture	1
Mounting bracket (A)	2
Mounting screws (B)	4
Plastic anchor (C)	4
Flat washer (D)	4
Box	1
BUILT-IN BATTERY BACK-UP INFORMATION

Model	Battery capacity	Max emergency output power	EM lumens	Emergency current	Emergency operation time	Battery voltage	Full charge/discharge cycles
ASD-LVP2SM-4A56AC-10EM	3,000 mA * 4	10W	1,246 lm	80 mAh	≥ 90 minutes	7.4 V	500 cycles
ASD-LVP2SM-8A120AC-20EM	4,000 mA * 6	20W	2,301 lm	170 mAh	≥ 90 minutes	11.1 V	500 cycles
Test button operation: Press test button to change from charging mode to emergency mode. Release test button to go back to the normal mode.

Back-up mode operation: When green light is on, backup battery is charging in AC mode. When it detects AC power outage, fixture will switch to back-up mode and indicator light will turn off.

Specifications	Model: BLD-CM20H-1500400
Input voltage	100-277 V 50/60 Hz
Warranty	5 years
Indicator light	Illuminated test switch, indicator light
Battery	Li-ion
Battery charging current	250 mA
Charging time	≥ 24 hours

LED SEAMLESS VAPOR PROOF FIXTURE

BUILT-IN MOTION SENSOR INFORMATION

REMOTE CONTROL ASD-06RC sold separately

| Button		Remarks	Button		Remarks	Button		Remarks
ON/OFF	ON/OFF	Turn the sensor ON/OFF.	M H	Mounting height	Adjust detection area/sensitivity levels according to real installation situations, higher or lower.	⬆	Up	The main functional buttons to adjust the factors to desired level. Press + - button to dim light directly auto in non-detection mode.
Auto	Auto	Enter "sensor mode" and perform previous settings.	Send	Send	Memorize and send out the previous setting of individual parameters.	⬇	Down	
Reset	Reset	Enter "sensor mode" and perform the default settings.		Detection range	Also known as "sensitivity", 100 % means the highest sensitivity and longest distance. Use this button and the + - buttons to adjust.	CCT	CCT selectable	Not applicable to this product.
Scenes	Scenes	Shows current settings saved in remote.		Daylight sensor	The preset lux level at which motion will be detected. Use this button and the + - buttons to adjust.	POWER	Power	Adjust brightness in both ON/OFF mode & sensor mode, minimum 10%, max 100%, each time this button is pressed it changes by 5%.
Start	Start	Press this to begin scene setup.		Stand-by dimming	After hold time, the light will dim from 100 % to optional standby dimming levels. Use this button and the + - buttons to adjust.	◯	Reserved button	Not applicable to this product.
Memory	Memory	Saves the scene settings.		Hold time	The period that light will stay illuminated 100 % after no motion is detected. Use this button and the + - buttons to adjust.		Daylight harvesting	Daylight harvesting function enabled or disabled.
Appy	Apply	Applies current scene settings to the fixture.		Stand-by period	The period after holdtime, during which the light keeps standby dimming level. Use this button and the + - buttons to adjust.	Test	Test button	Press this button to test the sensor; it will temporarily change the hold time to 2s. This setting cannot be saved.

# LED SEAMLESS VAPOR PROOF FIXTURE

WITH DUSK/DAWN FUNCTION:

1. With insufficient ambient brightness, sensor turns on light and keeps it at standby dimming level even if there is no motion or presence.
2. When sensor detects motion or presence it will bring the light level up to 100 %.
3. After motion is no longer detected, fixture remains at 100 % for hold time.
4. After pre-set hold time period it will dim to standby dimming level again and always keep it.
5. With sufficient ambient brightness, sensor will turn OFF light automatically.
WITH DAYLIGHT THRESHOLD:

1. With sufficient daylight, the light remains OFF even after motion is detected.
2. With insufficient daylight, the sensor turns light ON when motion is detected.
3. After there's no motion detected, the sensor keeps light ON 100 % for holdtime.
4. After holdtime, sensor dims light to standby dimming level for standby period. If the standby period has been set as 0s, sensor turns light OFF automatically after holdtime.
5. The sensor turns OFF light automatically after the standby period when there's no motion detected.

WITH DAYLIGHT DISABLED:

1. Sensor turns ON light when motion is detected.
2. Light will stay on after detecting motion for the desired hold time.
3. Sensor dims light to standby dimming level after hold time if there is still no motion.
**4.** Sensor turns OFF light after standby period.
DAYLIGHT HARVESTING:

1. When ambient brightness is lower than preset lux level, sensor will turn on light automatically and keep dimming according to the change of the ambient brightness. As it gets darker outside the fixtures will brighten, and as it gets brighter outside the fixtures will dim down.
2. When the ambient brightness exceeds the preset lux level, the light will turn OFF.
DAYLIGHT HARVESTING SETTING:

1. Adjust "daylight" value higher than 50lux.
2. Preset "standby period" 0S.
3. Press "daylight harvesting" button on remote control to activate.

LED SEAMLESS VAPOR PROOF FIXTURE

INSTALLATION GUIDE

IMPORTANT SAFETY INFORMATION:

Please read all the instructions below before installation!

▸ Make sure that the supply voltage corresponds to the rated product voltage.

▸ The product must be installed by a qualified electrician in accordance with the National Electrical Code and corresponding local codes.

▸ If the product is damaged, do not use it.

▸ All wiring connections should be capped with UL approved wire connectors.

▸ For surface mount there are two stainless steel brackets included.

▸ This fixture is intended to be connected to a properly installed and grounded UL listed junction box with suitable strain relief means for power cord. The junction box is not included, should be purchased separately.

⚠ WARNING

Risk of personal injury – read and follow all warnings and installation instructions. Keep or give to the owner for future reference.

Risk of cuts: Wear gloves to prevent cuts or abrasions when removing from carton, handling, installing, and maintaining this product.

Risk of electric shock: This product must be installed in accordance with the applicable installation code by a person familiar with the construction and operation of the product and the hazards involved.

Risk of Fire: Minimum 194°F supply conductors. Consult a qualified electrician to ensure correct branch circuit conductor.
ASD® assumes no responsibility for claims arising out of improper or careless Installation or handling of this product.
ELECTRICAL SCHEMATIC DIAGRAM:

LVP2SM
**LVP2SM-EM with battary back-up**

**LVP2SM multiple fixture connection**

INSTALLATION STEPS:

1. Remove the four screws off of the end-cap. Pull out the end-cap along with the junction box. Remove the cover of the junction box. The battery back-up will be unplugged when received, plug in battery back-up and the fixture using connector.

2. Insert the power cord into the junction box through the IP65 plug*. Connect the wires: Black to Black, White to White, Green to Green. Choose power output and color temperature needed using the switch. Close the cover of the junction box, insert it back into the fixture, tighten the screws of the end-cap.

3. Secure the fixtures to the ceiling/wall with mounting brackets.

* Note: plug suitable for up to 1/2" wires.
CONNECTING MULTIPLE FIXTURES:

1. Remove the four screws off of the end-cap, pull out the end-cap along with the junction box, remove the cover of the junction box and remove the small cut-hole in the gasket.

2. Insert the power cord from the other fixture into the junction box. Connect the wires: Black to Black, White to White, Green to Green. Choose power output and color temperature using the switch. Close the cover of the junction box, insert it back into the fixture, tighten the screws of the end-cap.

3. Secure the fixtures to the ceiling/wall with mounting brackets.
* Multiple fixtures with different sizes and wattages can be linked together, the total wattage must not exceed 500W (120V) / 1200W (277V).

POWER AND COLOR TEMPERATURE SETTINGS:

Open the end-cap on the gasket side, pull out and open the junction box and use the switch to adjust power output and color temperature. Then, close junction box, slide it back into the fixture and tighten the screws on the end-cap.

For most up-to-date spec sheets please refer to asd-lighting.com
