### Overview

### What's in the box

### LED Light Guide

	Solid Red	Camera initializing
	Flashing Blue	Camera is ready for setup
	Blue and Red Alternating	Connecting to internet
	Solid Blue	Camera is online

### Set up the Camera

**Step 1.**  
Connect the camera to power with the included power cable and power adapter

**Step 2.**  
Connect your phone to a WiFi network and have Bluetooth enabled

**Step 3.**  
Search for 'Girafit' in iOS App Store or Google Play Store

**Step 4.**  
In the Girafit APP, select '+' icon or 'Add New Device'. Then follow the in-app instructions to set up the camera

During the set up process, the Girafit APP will ask for Bluetooth permission. Please allow it so that your phone can discover the camera.

For more setup tutorials, scan the QR code below or visit:  
<https://girafit.com/pages/w150s>

### Mounting the camera

The camera needs to be installed on window glass. You can install the camera on the window glass according to your viewing preferences. The device needs to be installed within reach of a power outlet and not too far from the router.

#### Install on window glass

1 Remove the mounting sticker and peel off the protective film on top.

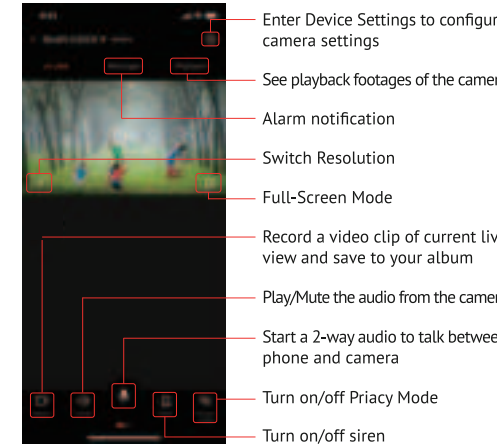

2 Stick the mounting sticker onto the window, then mount the camera on it. Pay attention to the orientation of the camera during installation; the arrow pointing upwards indicates the top.

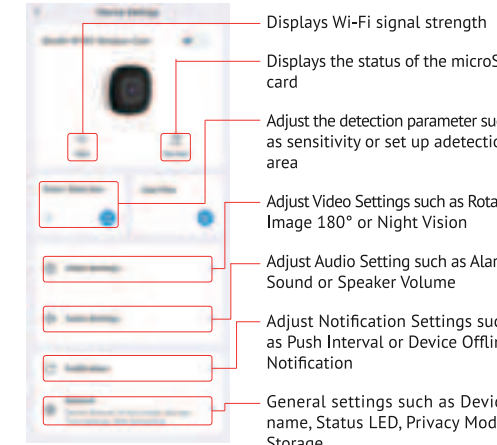

### Using the camera

#### Live View

#### Device Setting

## Message

Select a specific date to search the event message

Filter the message by type (motion / human), device name, or location of the camera

View system message such as microSD card being malfunction or Device Offline

Swipe left to delete a message

Quickly identify an alert by alert type, device name and the thumbnail

Alert notifications from all cameras

## Storage Option

The Girafit W150S camera offers two storage alternatives. You have the option to save the footage either on a microSD card or by subscribing to a cloud storage plan. To enhance security, we advise utilizing both methods to back up each other, ensuring that no critical footage is lost even if the camera malfunctions, is stolen, or goes offline.

### Record on a microSD card

Insert a microSD card and format it in camera setting menu, which allows camera to record locally even if camera is disconnected from the internet.

### Record on cloud storage

In Girafit APP, subscribe to a cloud storage plan to back up your footage in encrypted data center, to ensure that you still have critical footages even if camera is stolen or broken.

## Frequently Asked Questions

### I cannot connect the camera to the Internet

Check the following steps:

- Ensure Wi-Fi password or SSID is correct
- Reset the camera and try again
- Try placing the camera as closely to the router as possible

- Ensure camera is powered on and the indicator is flashing in Blue before starting to connect
- Ensure Bluetooth is turned on your phone and Bluetooth permission is allowed for Girafit APP
- If the above steps don't help, contact our professional technical support via phone, email or live chat.

### What can I do if the camera stopped working?

- Close the APP and restart the APP again
- Check if Wi-Fi password or Wi-Fi router is changed. If so, please reset the camera.
- Ensure Wi-Fi router is powered on and online
- Ensure camera has power
- Ensure the phone has decent network bandwidth
- Check if the APP is on latest version
- Try different power adapter, USB cable or power outlet

### What can I do if the camera keeps getting offline?

- Ensure the camera is not too far away from the router
- Ensure your Wi-Fi is working properly. Check the status of other devices such as laptop or smartphone and see if you can stream videos
- The routers may get overloaded sometime, try restarting your router and wait for 2-3 mins
- Check if the camera is on the latest firmware

### How to record on microSD card?

- Ensure the microSD card is installed in the correct direction
- Format the microSD card in Girafit APP to enable recording
- After the card is formatted, choose to record all-day or by incident only in the 'Manage Storage' menu
- If the camera does not detect the microSD card, try formatting the card to FAT32 using a PC

### What can I do if I receive too many notifications?

In 'Device Setting' menu, try adjusting the following settings to improve detection notifications:

- Turn on human detection to only get notified when a human-shaped object is detected
- Adjust detection sensitivity setting to low
- Enable detection area to draw an area that you only wish to receive notification

## FCC COMPLIANCE

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions;

- 1- this device may not cause harmful interference.
- 2- this device must accept any interference received, including interference that may cause undesired operation.

The manufacturer is not responsible for any radio or tv interference caused by unauthorized modifications or change to this equipment. Such modifications or change could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

RF warning statement:

To maintain compliance with FCC's RF exposure guidelines, this equipment should be installed and operated with a minimum distance of 20 cm between the radiator and your body.

## IMPORTANT PRODUCT SAFETY INFORMATION

Read all instructions and safety information before use.

SAFETY INFORMATION FAILURE TO FOLLOW THESE SAFETY INSTRUCTIONS COULD RESULT IN FIRE, ELECTRIC SHOCK, OR OTHER INJURY OR DAMAGE

Girafit W150S Window Cam and its accessories are for indoor use only. Do not expose your device or adapter to liquids. If your device or adapter gets wet, carefully unplug all cables without getting your hands wet and wait for the device and adapter to dry completely before plugging them in again. Do not attempt to dry your device or adapter with an external heat source, such as a microwave oven or a hair dryer. If the device or adapter appears damaged, discontinue use immediately. Use only the adapter provided by the manufacture.

To avoid risk of electric shock, do not touch your device or any wires connected to your device during a lightning storm.

THIS DEVICE IS NOT A TOY. Children can get strangled in cords. Keep cords out of the reach of children (more than 3ft away)

## Specifications

Camera	
Lens	2.8mm FOV 105°
