B. Open the TSmartLife app. Power on selected device

C. Add your device using one of the following methods:

Settings
- Wireless network   On
- Bluetooth   On

SEARCH DEVICES

SELECT MANUALLY

QUICK TIPS

- Make sure your devices are powered on.
- Keep your mobile phone close to your device during connection.
- Connect your mobile phone to the wireless network at home.
- Enable the 2.4GHz frequency on your wireless network router. Contact the manufacturer if unsure whether the router supports 2.4GHz.
- The device is unable to connect to wireless network that requires authentication and also appears in public areas such as hotels and restaurants.
- It is recommended to use a wireless network name that only contains letters and numbers. If your wireless network name contains special characters, modify it in the router. Disable WLAN+ (Android) or WLAN Assistant (iOS) when connecting your devices to the network.
- To reconnect a device to the wireless network, click "+" on the app home screen and add the device again by the category and model according to the app prompts.
