

Jabra Elite 7 Pro - Black

How do I control Active Noise Cancellation and HearThrough?

When you are not on a call, you can cycle between ANC/HearThrough/Off by pressing the **Left** button.

Note

If you cannot activate Active Noise Cancellation from your headset, you need to manually set it up in Jabra Sound+ or update your earbuds to the latest firmware version.

When you are on a call, the following conditions apply.

- ANC will stay on during a call.
- HearThrough will turn off during a call, and then resume when the call is finished.

You can change the ANC and HearThrough settings in the Jabra Sound+ app.

- In **Sound modes**, you can choose the modes you want to cycle between when you press the **Left** button on your headset:
 - HearThrough & ANC (default)
 - HearThrough & Off
 - HearThrough, ANC & Off
- You can reconfigure the standard button functions to make them perform different tasks than those predefined in the device's factory settings. Tap the **Settings** icon, **Personalize your headset**, **MyControls**.

Download Jabra Sound+ from [Google Play](https://play.google.com/store/apps/details?id=com.jabra.soundspace) to your Android device or from the [App Store](https://apps.apple.com/us/app/jabra-sound/id1444244444) to your iOS device.
