Note: Specific operation contents are subject to actual situation due to irregular updates of the product system.

Projection size (under status of no keystone correction / inch)	Screen length * width (m)	Less - screen (m)
42	0.93*0.53	1.37
58	1.23*0.75	1.96
66	1.35*0.87	2.29
88	1.86*1.05	2.73
100	2.21*1.25	3.25
120	2.66*1.48	3.91
150	3.32*1.87	4.89
170	3.76*2.12	5.53
200	4.43*2.49	6.51
250	5.54*3.11	8.16

Note: Projection size and distance are calculated according to projection ratio, which may have a deviation and subject to actual status.

Please make sure the power plug is unplugged before cleaning. Do not use pesticides or other volatile chemicals on the projector or lens. Do not let rubber or vinyl products contact the projector for a long time, which will damage the coating and make it peeled off.

- Check the Projector**
- 1. When we use a light, either direct light, if it is directed normally, we can save with solid light. When we use indirect lighting, when the light is directed at a corner and then, the light is more abundant. It is used with indirect light.
 - 2. Don't use a three-burner or any other objects to improve quality reduction or control of lighting effects.
 - 3. A bulb can be placed in front of the maximum distance to improve the lighting effect. These can be used with a bulb with no connector, or lamps with serial bulbs.
 - 4. Please don't connect the machine with bulbs or any other hard objects as to the switches.
- Check the Lamp**
- 1. Check the lamp to ensure that there are no lamp cover, lamp or professional lamp or any other thing. If the lamp, ensure there are no switches.
- Mini and Other Direct Lighting**
- 1. Mini in the light and other light will prevent vibration and increase the intensity of temperature, which will cause direct.
 - 2. Disconnect power line after the project.
 - 3. Check the intensity of the light. If the light is too strong, please turn the light back on the second time. If the light is too weak, please turn the light on the second time after the connector or bulb.

0: Content of the hazardous substances in all homogeneous materials of the component is under the limits of 0.100-1000 ppm.
 X: Content of the hazardous substances exceeds the limit requirements specified by SJ/T11363-2006 in at least one homogeneous material of the component. The components (Batteries, PC) have no substance due to global technology development (Batteries, Circuit board assembly) including printed circuit board and its components, electronic components, etc.

 The number in the Batteries symbol means the normal environmental service life of the component. (Battery Endpoints)

1. We will provide technical assistance for any default caused by product technical reasons during warranty period.
2. We will provide warranty service for any default caused by product technical reasons during warranty period.
3. Following situations are out of the range of guarantee:
 - ① Accessories out of the main frame.
 - ② Unauthorized disassembly and repair without our consent.
 - ③ Damage that caused by external force and other natural disasters.
4. Please **write** card and contact your distributor when products have quality problem.
5. This warranty is **not** to product maintenance during the warranty period, no other kindly.

(Introduction Manual)

Before using this product, please read this product manual carefully.

Thank you for purchasing our products. For your safety and benefit, please read this product manual carefully before using. If you fail to follow the product instructions or precautions, and cause any personal injury, property or other losses, the company will not bear any responsibility.

FCC Statement:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, Pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
