

EZ-PATH

INSTALLATION GUIDE

New certified installation methods

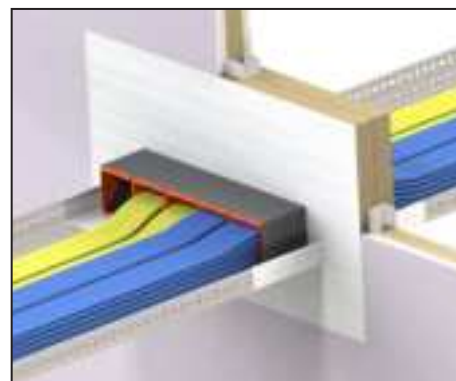

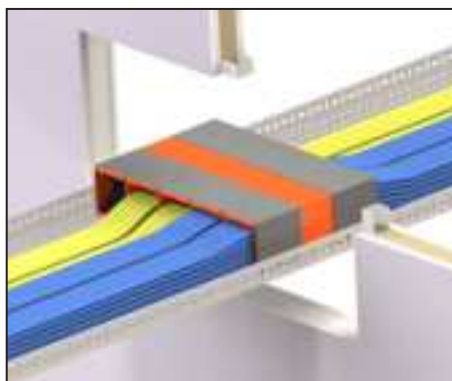

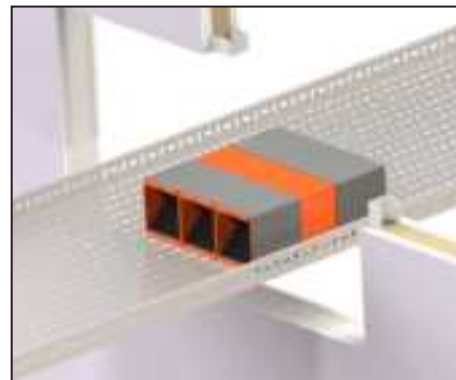

NEW INSTALLATION METHODS

EZ Path® can now be installed directly onto cable tray or steel wire cable tray in conjunction with a fire rated mineral wool coated batt

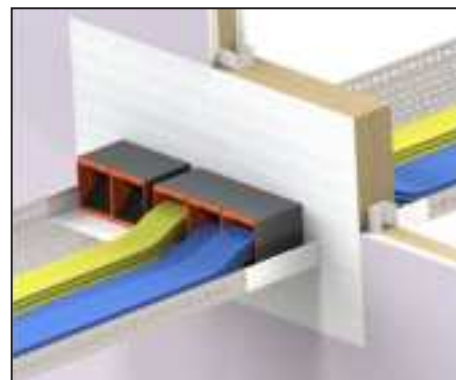

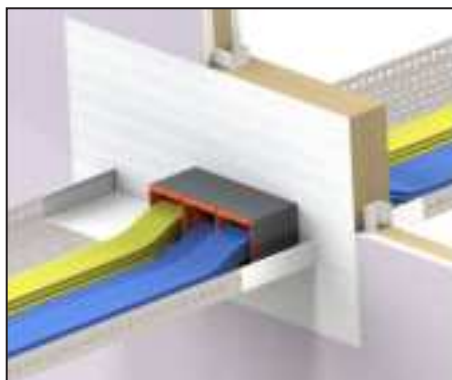

■ FIRESTOPPING FROM THE START

EZ-Path provides a cable management solution that can be installed at the early stage of the project before any other firestop solutions have been installed

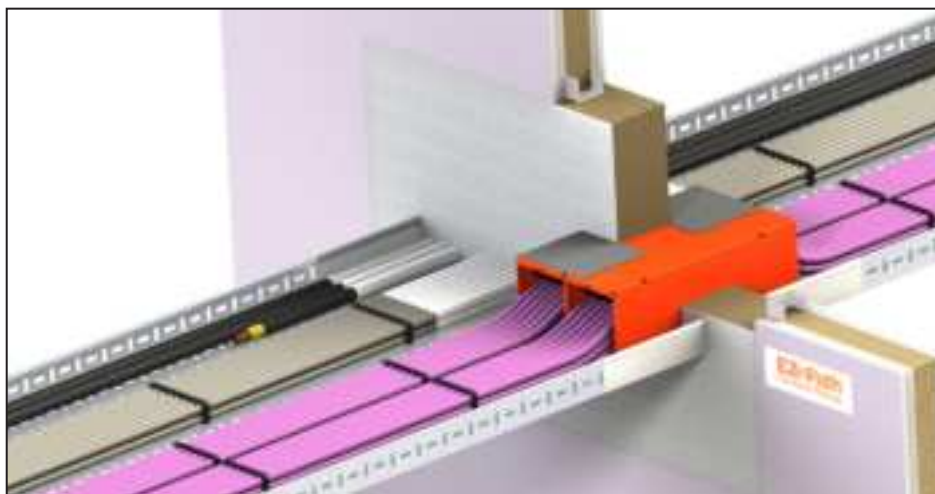

■ FLEXIBILITY

Quantity of EZ-Path corresponds to the initial cabling requirement. Additional devices can be installed later to accommodate extra cables

■ MULTI SERVICES OPENING

Other services can be installed in the same opening and firestopped using traditional methods

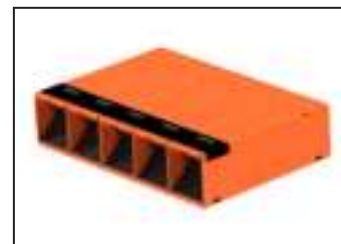

EZ-PATH®

INSTALLATION INSTRUCTIONS

EZ-Path® can now be installed directly onto cable tray or steel wire cable tray in conjunction with a fire rated mineral wool coated batt

- 1 The EZ-Path devices are attached together using the male and female brackets on each side

- 2 TWrap (CM935953) to be cut to the right length to overlap the devices on either side of the wall. TWrap to be split down the length and the backing paper removed to reveal adhesive

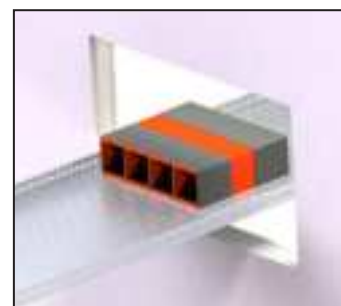

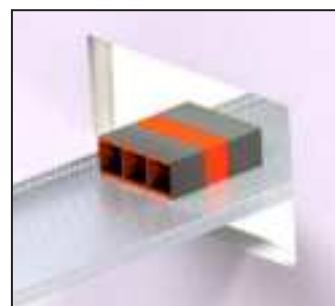

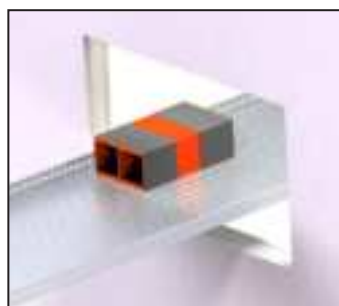

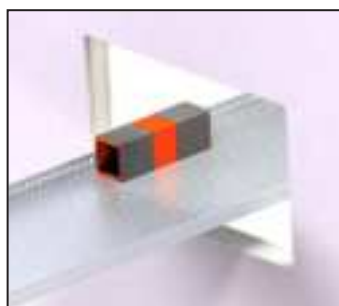

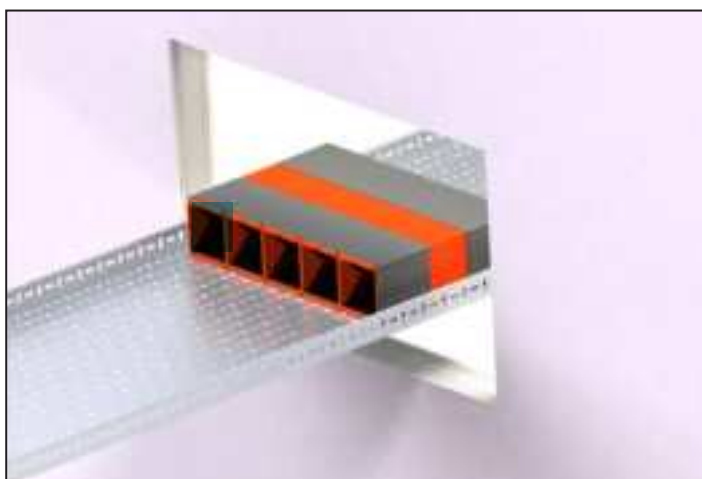

- 3 TWrap to be applied across the whole width of the devices. The seam of the TWrap to be located on the underside of the devices as shown

- 4 The surface of the cable tray must be cleaned of any particles, dust or grease

Up to 5 EZ-Path devices can be installed onto the cable tray and centred inside the wall. EZ-Path devices can be attached to the cable tray using ancillary items such as metal strapping
