Safety Legal Disclaimer

All instructions and guidelines given in this manual must be followed without exception.

1. Pizzello is designed for outdoor use only. Must always be placed outdoors, away from structures and never inside a building or a garage or in proximity to any enclosed area. Place your OVEN on a sturdy, level, stable and non-flammable surface and keep it clear and free from flammable or combustible materials, gasoline and other flammable vapours and liquids.
2. Be aware of any local laws or regulations that may specify a required distance between outdoor cookers and any structures, or that may limit outdoor flame of any type during drought or hazard periods.
3. Do not install or use your Pizzello in or on boats or recreational vehicles.
4. Do not use your Pizzello in high winds.
5. Your Pizzello is not intended to, and should never be used as a heater.
6. Toxic fumes can accumulate and may cause asphyxiation.
7. Flames can blow outside of the metal enclosure:
 - a. At the back where the fire is;
 - b. From the top of the hatch when the lid is opened;
 - c. From the front of the oven when you open the door; or d. from the top of the chimney.
8. Please keep away from the Pizzello's openings and warn others around you.
9. Improper installation, adjustment, alteration, service or maintenance of your Pizzello may cause injury or property damage. Therefore, do not use your Pizzello unless it is completely assembled and all parts are securely fastened and tightened.
10. Your Pizzello should be inspected on a regular basis.

TIPS:How to clean firewood ash?

Pull up the baffle behind the stove and clean through the ash catcher

TIPS:How to adjust legs?

Top Reasons Why Pizza Stones Crack

1. PUTTING A COLD BAKING STONE INTO A HOT OVEN
2. ALLOWING MOISTURE INTO THE BAKING STONE
3. PLACING COOL OR COLD FOOD ONTO THE BAKING STONE
4. HANDLING THE STONE TOO MUCH
5. REMOVING THE STONE TOO SOON FROM A HOT OVEN
6. USING TOO MUCH HEAT

How To Prevent Your Pizza Stone From Cracking In The Future

- Maintain your stone in your oven at all times. If you such as a pretty looking rock, cover with aluminum foil so drips from other things don' t discolor it.
- Always place a rock into a cool stove as well as do a long pre-heat.
- Decrease handling. Moving in and out of the stove can cause cracking.
- Stay clear of cleaning or oiling a stone. The moisture can create it to split.
- Wait until rock is entirely chilly before removing it from oven.
- Don' t place icy pizzas on your pizza stone.
- Utilize a folded up towel and also place on the counter prior to you take the rock out of the stove, so the counter will not send your rock right into "thermal shock".
