FCC STATEMENTS:
This device complies with part 15 of the FCC Rules.
Operation is subject to the following two conditions:
(1)This device may not cause harmful interference.
(2)This device must accept any interference received, including interference that may cause undesired operation.
NOTE 1: This equipment has been tested and found to comply with the limits for a Class
B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.
This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC WARNING
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

2. WARRANTY TERNS
We take quality very seriously. This is why all of our products come with a one year warranty from the original purchase date against defects in workmanship and materials. If you have warranty or support issues please contact the store where you purchased the product or contact us directly through below website:
http://www.videotimes.com.hk

3. Important guidelines for installing your baby monitor.
*To use your parent unit and baby unit together, you must
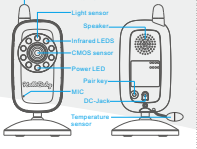

— 4 —

be able to establish a radio link between them, and the range will be affected by environmental conditions.
*Any large metal object, like a refrigerator, a mirror, a filling cabinet, metallic doors or reinforced concrete between the baby and parent unit may block the radio signal.
*The signal strength may also be reduced by other solid structures, like walls, or by radio or electrical equipment, such as TV, computers, cordless or mobile phones, fluorescent lights or dimmer switches.
*Use of other 2.4GHz product, such as wireless networks (Wi-Fi routers), Bluetooth systems, or microwave ovens, may cause interference with this product, so keep the baby monitor away at least 5ft(1.5m) from these types of products, or turn them off if they appear to be causing interference.
*If the signal is weak, try moving the parent or the baby unit to different positions in the rooms.

5. PLACEMENT OF THE BABY MONITOR:
This camera can be placed on a tabletop or hung on the wall；
Place the baby monitor in a place where the air can circulate freely；
Do not place on soft quilts or blankets or in the corners of cupboards, shelves, etc；
Place the baby monitor away from heat sources such as radiators, chimneys, cookers and direct sunlight；
Place the baby unit away from TV sets, microwave oven and radios. The intense radio signals generated by these elements could cause noise or even sounds and images to appear on the monitor. If this occurs, move the camera to another location；
*Place the camera within 15 feet of the area being monitored for best picture result.
* Baby monitors and cameras with power cords should never be hung on or near the crib as it is a strangulation hazard. Power cords should be kept no less than 3 feet away from the crib and the baby's reach at all times.

6. Using the baby monitor
6.1 TURN ON THE BABY UNIT:
*Only use the A/C adapter included in this package (6V, 600mA);
1. Locate the connector socket on the back of the baby unit;
2. Connect the adapter cable to the baby unit;
3. Plug the A/C adapter into the wall outlet.
4. Once the adapter connected , the power LED will light up.

6.2 TURN ON THE PARENT UNIT:
*Only use the A/C adapter included in this package (6V, 600mA);
*The parent unit is supplied with a built-in rechargeable

— 6 —

— 7 —

Li-ion battery (3.7V 950mAh). We suggest to connect the monitor to the adapter plugged into the mains whenever possible, in order to keep the battery charged;
1. Locate the connector socket on the right side of the parent unit;
2. Connect the adapter cable to the parent unit;
3. Plug the A/C adapter into the wall outlet;
4. Press and hold the power key on the top of the parent unit;
5. Once place a camera with cables less than 3 feet from the battery icon at the top right corner of the screen will light up and the image will display on the LCD;

6.3 TO CHARGE THE PARENT UNIT:
1. Connect the power adapter to the parent unit;
2. Plug the adapter into the mains, then the charging LED on the parent unit will light in RED; the battery icon at the top right corner of the screen is rolling;
3. The battery pack takes less than 8 hours to charge fully then the battery icon at the top right corner of the screen will be fixed;

Warning:
Choking hazard – Keep the cord out of the baby's reach.
Never place a camera with cables less than 3 feet from the cot.
Never use extension cords with A/C adapters.
Use only the A/C adapters supplied.
