1

Garantire un posizionamento corretto

- ✓ Se possibile, posiziona Litter-Robot nella stessa posizione della vecchia lettiera (almeno durante il periodo di transizione).
- ✓ Assicurati che l'unità si trovi all'interno su una superficie solida e piana, in un luogo fresco e asciutto.
- ✓ Posiziona eventuali tappetini davanti o completamente al di sotto dell'unità. Non posizionare tappetini parzialmente sotto l'unità. Utilizza solo tappetini a pelo corto (6 mm) sotto l'unità.

2

Aggiungere la lettiera

- ✓ Usa lettiera agglomerante o in cristalli abbastanza piccoli da passare attraverso lo schermo.
- ✓ Aggiungi la lettiera finché non raggiunge la linea di riempimento rialzata quando viene appiattita (circa 3,6-4,5 kg). Non riempire troppo.

Quick Start Guide

litter·robot®

1

Ensure Proper Placement

- ✓ If possible, place the Litter-Robot in the same location as the old litter box (at least during transition).
- ✓ Make sure the unit is indoors on a firm, level surface and in a cool, dry location.
- ✓ Place litter mats or rugs in front of, or completely under, the unit. Do not place mats partially under the unit. Use only low pile (6mm) mats or rugs under the unit.

1

Add Litter

- ✓ Use clumping litter or litter beads and crystals that are small enough to pass through the screen.
- ✓ Add litter until it meets the raised fill line when spread flat (about 3.6-4.5 kg). Be careful not to overfill.
