Competitive Advantages

Leading-edge R&D team

200+ R&D team members

Talents from MSTAR, Huawei, Tencent, Intel ChangHong etc.

Independent R&D of optical engine

Established optical engine lab, launch 3LCD, DLP optical engine, laser optical engine R&D plan

Mass produced optical engines

Dramatically increased the competitive advantage of XGIMI

200+ technical patents

XGIMI owns 200+ technique patents including 36 inventions, 83 utility models, and 113 design patents

Deep collaboration with strong partners

Texas Instruments, Harman Kardon, Yang optics, Mango TV, Baidu

Efficient and experienced supply chain

XGIMI is the pioneer in Screenless TV industry, the quality and cost have been modified to the best after rounds of selection for high quality suppliers

Minimalist Life Need Less But Have More

Z6 Polar 1080p Screenless TV simplifies
your life but creates more fun.

展开了解设计

XGIMI Confidential

Enjoy Your Private Cinema At Home.

Z6 Polar can project a 180-inch screen with full HD by using DLP optical projection technology of Texas instrument, which can easily provide you a prime viewing experience in the bedroom.

XGIMI Confidential

Never Miss Any Detail

1080P Native Resolution, Support 2K/4K

Unlike other projectors that only support 1080p, Z6 Polar's native resolution is 1920x1080 that can project in true HD, and 2.25x clearer than mainstream 720p projectors (2,073,600 pixels).
Motion compensation technology HDR 10 / 27 PET / Square Pixel Structure

XGIMI

Bring You a Vivid Enjoyment

Z6 Polar is using the motion compensation technology, through a specific algorithm to solve the image flutter and tailing problems when it is projecting high dynamic images. Z6 Polar significantly increases the clarity and fidelity of dynamic pictures, it will be the perfect companion for watching sports and playing games.

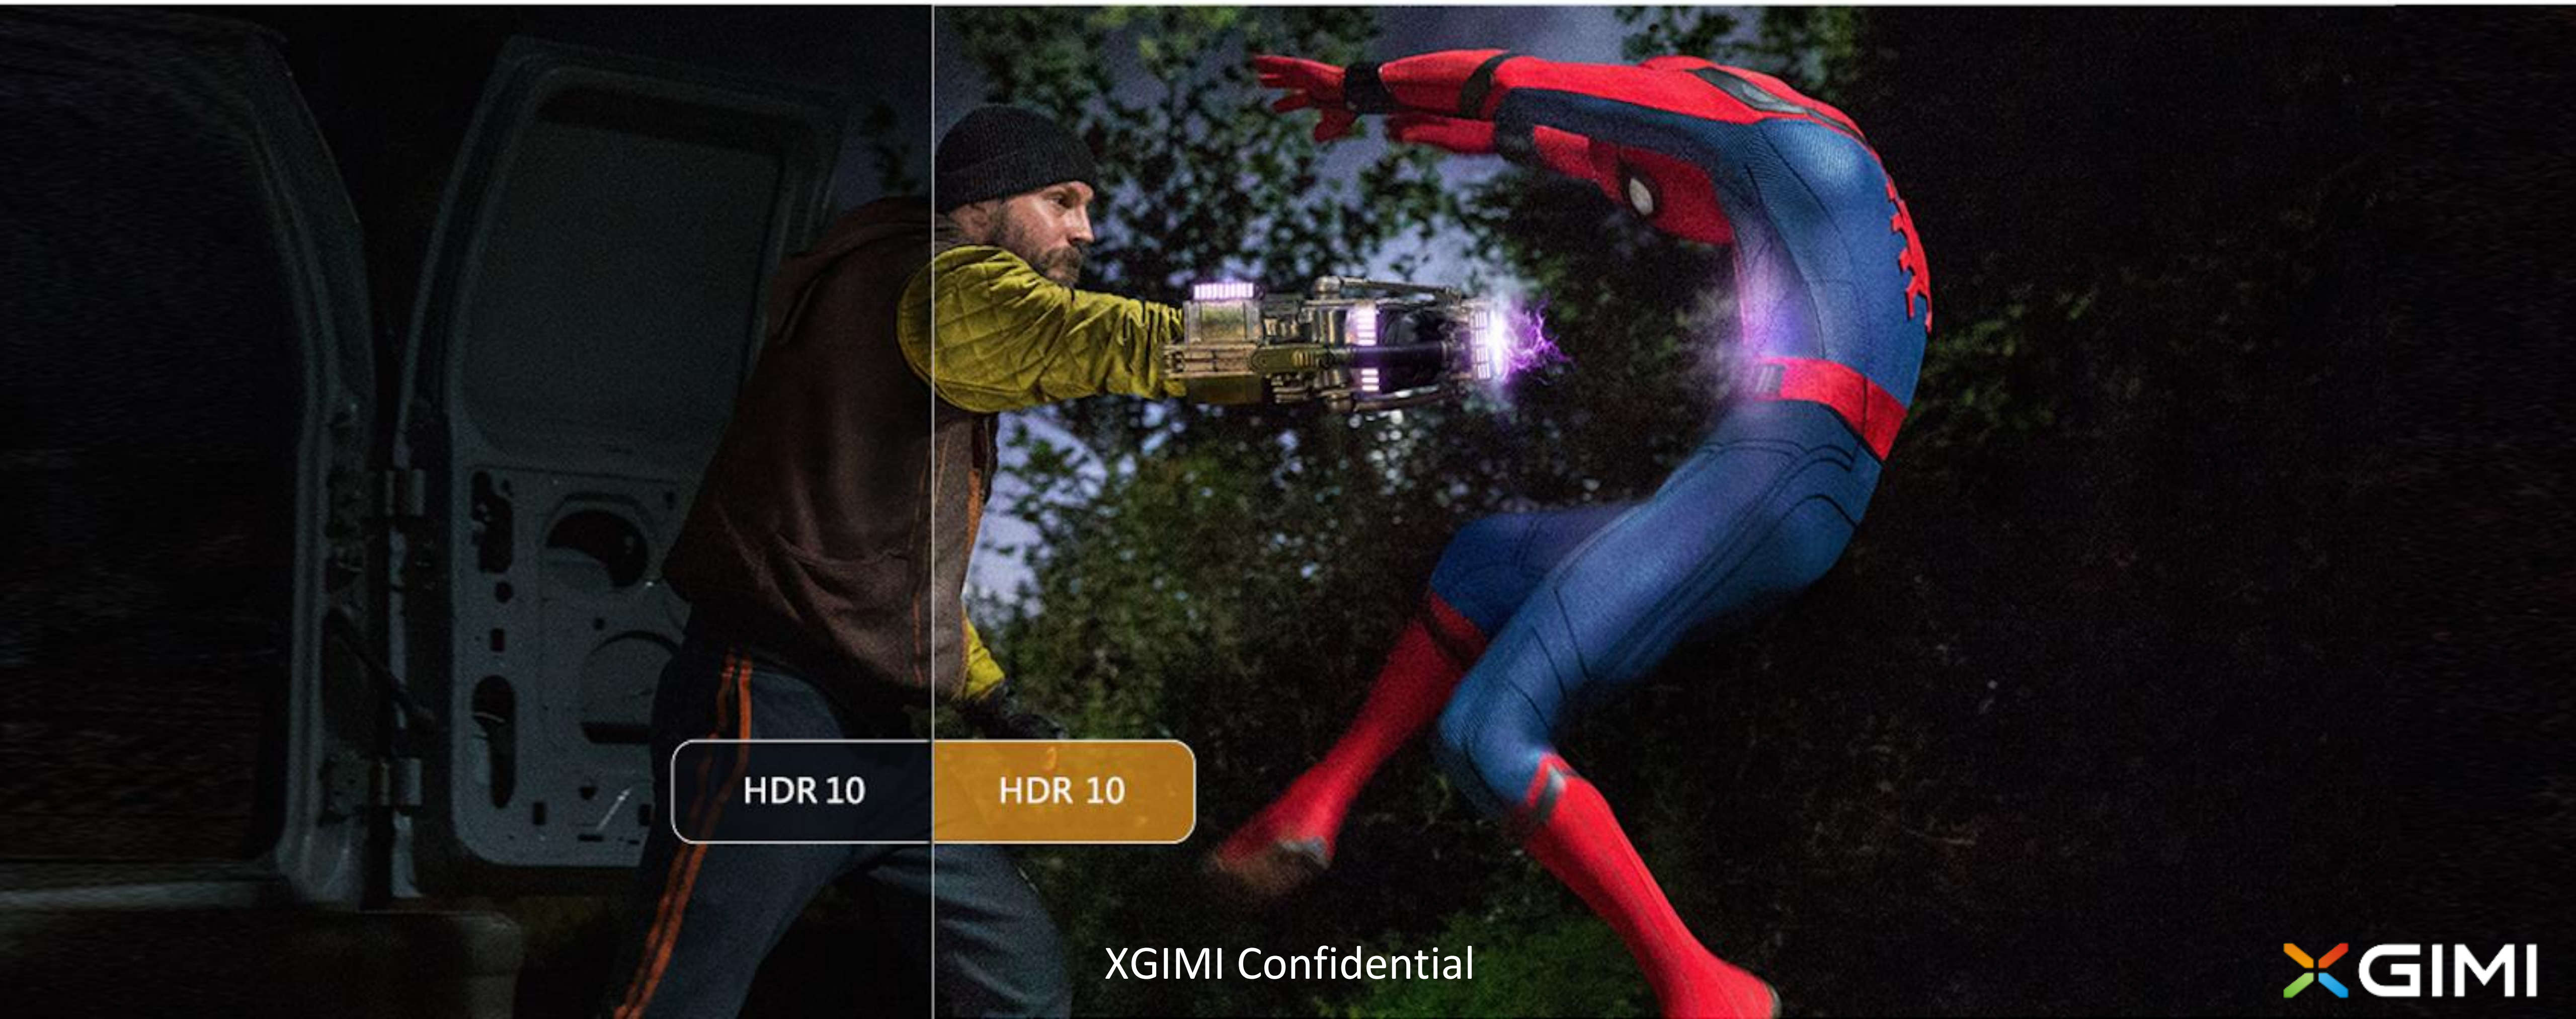

XGIMI Confidential

Distinct Gradations, Rich details

Z6 supports HDR 10 decode in order to solve low-contrast problem. It presents a wider color range and more details on bright and dark areas.

XGIMI Confidential

Crystal Clear Picture With Square Pixel Structure

Comparing to diamond-shaped pixel, Z6 Polar adopts square pixel structure that makes the image edge more smoothly and natural. The text is more clear and sharp

Square pixel

Meet Your 180-inch Private Cinema

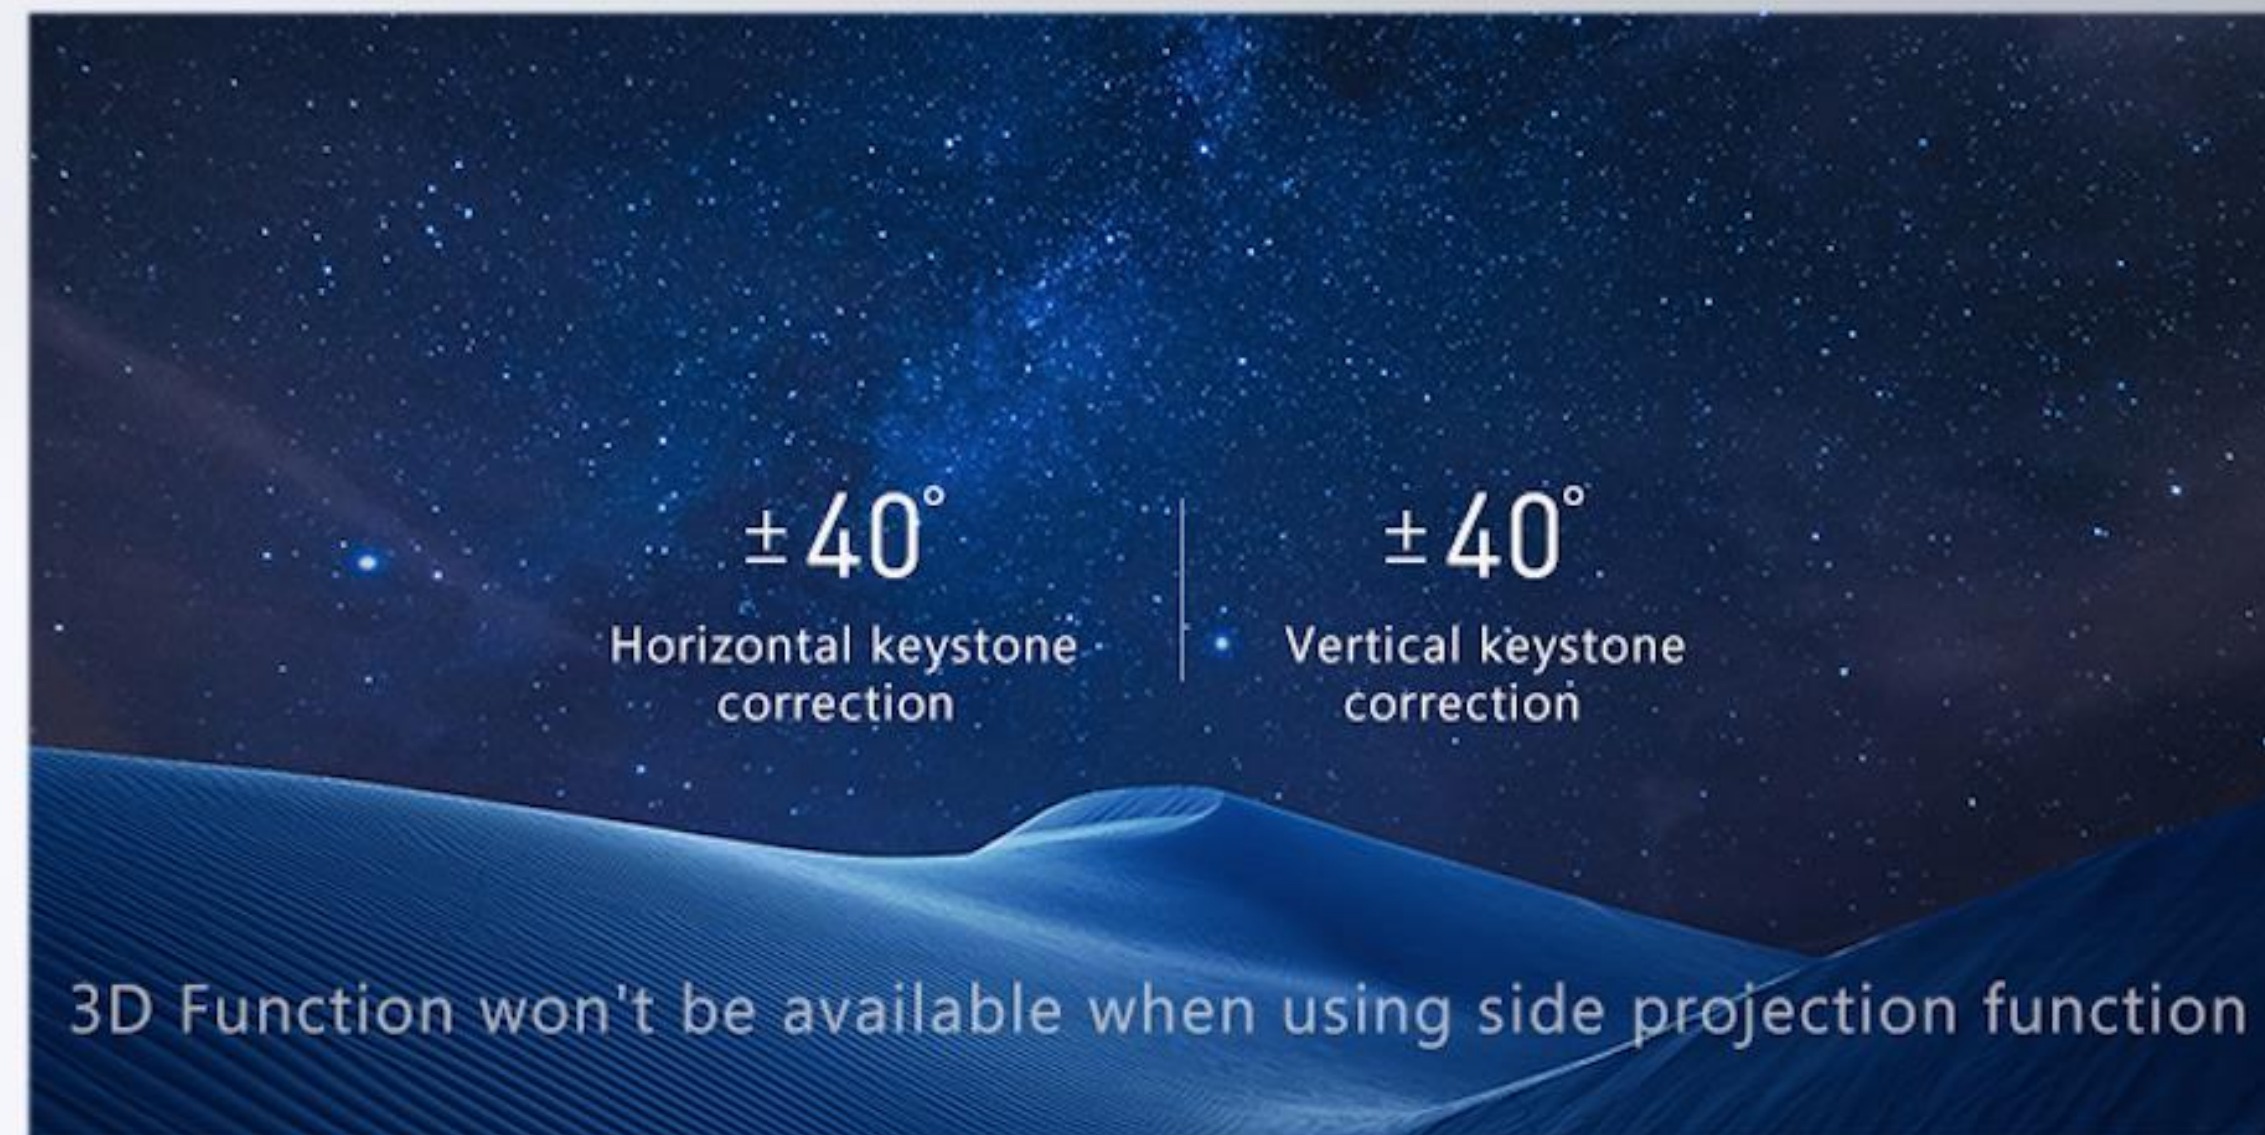

Z6 Polar is built in with fast auto focus function and professional high-definition camera, the image will be auto focused once the projector is on instead of manual operation.

Fast Auto Focus/ Sensitivity HD Camera Lens

Side Projection Function Can Always Find A Perfect Position For Z6 Polar

Z6 Polar is built with extensive keystone correction software, which provides an optimal image to users from virtually any angle and eliminating many of the hassles of optimal set-up

Integrative enclosed lens design

Z6 Polar's enclosed lens is more ware-resisting and capable to provide overall lens protection.

More Powerful CPU + GPU

Z6 Polar is able to support videos with higher frame frequency and create immersive audio-visual experience base on the brand new Mstar 838 CPU and Mail-T820 GPU
