You are advised to fully charge the battery (▉). Charging status is indicated by a percentage displayed on screen. The percentage increases as the tablet is charged.

Learn more about battery life and proper use to maximize your battery's performance.

• Don't use or place your device in extreme temperatures. Extreme temperatures, whether too high or too low, can accelerate battery degradation and reduce its overall lifespan. For optimal performance, the manufacturer's recommended operating temperature range is 0°C (32°F) to 40°C (104°F).

• Deactivate Wi-Fi, GPS, Bluetooth when not in use.

• Deactivate auto-syncing of apps, close unnecessary apps.

• Turn display off by pressing the power key when the device is not in use.

• Set Screen timeout to a short interval.

• Lower the screen brightness.

• After charging 100%, disconnect charger from the plug. Do not keep device constantly under charge, this will reduce the battery life.

• Think of activating your tablet's **Intelligent charging mode (Settings > Smart Manager > Battery > Battery health > Intelligent charging mode)** to stop charging at 80% battery level, for a longer battery life.

• To minimize the effect, it is recommended to use fast charging only when necessary and avoid keeping the battery at high charge levels for extended periods.

Battery capacity and usage hours may vary depending on device settings and usage patterns.

Note: For environmental reasons this package may not include a charger, depending on the device you purchased. This device can be powered with most USB power adapters and a cable with USB Type-C plug.

To correctly charge your device you can use any charger as long as it meets all applicable standards for safety of information technology equipment and office equipment with minimum requirements as above listed.

Please do not use chargers which are not safe or do not meet the above specifications.

For more information about battery management, please go to **Settings >Smart Manager > Battery> Battery health.**

9   Regulatory & safety

Safety and use

📖   Please read this chapter carefully before using your device. The manufacturer disclaims any liability for damage, which may result as a consequence of improper use or use contrary to the instructions contained herein.

• Do not use your device when the vehicle is not safely parked. Using a hand-held device while driving is illegal in many countries.
• Comply with restrictions on use specific to certain places (hospitals, planes, gas stations, schools, etc.).
• Switch the device off before boarding an aircraft.
• Switch the device off when you are in health care facilities, except in designated areas.
• Switch the device off when you are near gas or flammable liquids. Strictly obey all signs and instructions posted in a fuel depot, petrol station, or chemical plant, or in any potentially explosive atmosphere when operate your device.
• Turn off your mobile device or wireless device when in a blasting area or in areas posted with notifications requesting "two-way radios" or "electronic devices" are turned off to avoid interfering with blasting operations.

Please consult your doctor and the device manufacturer to determine if operation of your device may interfere with the operation of your medical device. When the device is switched on, it should be kept at least 15 cm from any medical device such as a pacemaker, a hearing aid, or an insulin pump, etc.

• Do not let children use the device and/or play with the device and accessories without supervision.

- To reduce exposure to radio waves, it is recommended:

 - To use the device under good signal reception conditions as indicated on its screen (four or five bars);

 - To use a hands-free kit;

 - To make reasonable use of the device, particularly for children and adolescents, for example by avoiding night calls and limiting the frequency and duration of calls;

 - Keep the device away from the belly of pregnant women or the lower abdomen of adolescents.

- Do not allow your device to be exposed to adverse weather or environmental conditions (moisture, humidity, rain, infiltration of liquids, dust, sea air, etc.). The manufacturer's recommended operating temperature range is 0°C (32°F) to 40°C (104°F). At over 40°C (104°F) the legibility of the device's display may be impaired, though this is temporary and not serious.

- Use only batteries, battery chargers, and accessories which are compatible with your device model.

- Do not use a damaged device, such as a device with a cracked display or badly dented back cover, as it may cause injury or harm.

- Do not keep device connected to charger with battery fully charged for a long period of time as it can cause overheating and shorten battery life.

- Do not sleep with the device on your person or in your bed. Do not place the device under a blanket, pillow, or under your body, specially when connected to the charger. Do not charge the device in a confined space, as this may cause the device to overheat.

PROTECT YOUR HEARING

To prevent possible hearing damage, do not listen at high volume levels for long periods. Exercise caution when holding your device near your ear while the loudspeaker is in use.

Waste disposal and recycling

Device, accessory and battery must be disposed of in accordance with locally applicable environmental regulations.

This symbol on your device, the battery, and the accessories means that these products must be taken to:

- Municipal waste disposal centres with specific bins.

- Collection bins at points of sale.

They will then be recycled, preventing substances being disposed of in the environment.

In European Union countries: These collection points are accessible free of charge. All products with this sign must be brought to these collection points.

In non-European Union jurisdictions: Items of equipment with this symbol are not to be thrown into ordinary bins if your jurisdiction or your region has suitable recycling and collection facilities; instead they are to be taken to collection points for them to be recycled.

Battery

In accordance with air regulations, the battery of your product is not fully charged. Please charge it first.

- Do not attempt to open the battery (due to the risk of toxic fumes and burns).

- For a device with a non-removable battery, do not attempt to eject or replace the battery.

- Do not puncture, disassemble, or cause a short circuit in a battery.

- For a unibody device, do not attempt to open or puncture the back cover.

- Do not burn or dispose of a used battery or device in household rubbish or store it at temperatures above 60°C (140°F), this can result in an explosion or the leakage of flammable liquid or gas. Similarly, subjecting the battery to extremely low air pressure may result in an explosion or the leakage of flammable liquid or gas. Only use the battery for the purpose for which it was designed and recommended. Never use damaged batteries.

CAUTION: RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.

Charger [(1)]

Mains powered chargers will operate within the temperature range of: 0°C (32°F) to 40°C (104°F).

The chargers designed for your device meet the standard for safety of information technology equipment and office equipment use. They are also compliant with the ecodesign directive 2009/125/EC. Due to different applicable electrical specifications, a charger you purchased in one jurisdiction may not work in another jurisdiction. They should be used for the purpose of charging only.
The power delivered by the charger must be between min 2 Watts required by the radio equipment,and max 15 Watts in order to achieve the maximum charging speed.

2-15 W USB PD

For environmental reasons this package may not include a charger, depending on the device you purchased. This device can be powered with most USB power adapters and a cable with C-C USB cable plug. To correctly charge your device you can use any charger as long as it meets all applicable standards for safety of information technology equipment and office equipment with minimum requirements as above listed. Please do not use chargers which are not safe or do not meet the above specifications.

Regulatory information

Hereby, TCL Communication Ltd. declares that the radio equipment of type T Tablet 2 is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following internet address: https://www.tcl.com/global/en/EC_DOC

SAR and radio waves

This device meets international guidelines for exposure to radio waves.

The radio wave exposure guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit for mobile devices is 2 W/kg for Head SAR and Body-worn SAR, and 4 W/kg for Limb SAR.

When carrying the product or using it while worn on your body, either use an approved accessory such as a holster or otherwise maintain a distance of 0 mm from the body to ensure compliance with RF exposure requirements. Note that the product may be transmitting even if you are not making a device call.

Maximum SAR for this model and conditions under which it was recorded		
Body-worn SAR (0 mm)	5G NR n78 + Wi-Fi 2.4GHz	1.68W/kg
Limb SAR (0 mm)	5G NR n78 + Wi-Fi 2.4GHz	1.68W/kg

Frequency bands and maximum radio-frequency power

This radio equipment operates with the following frequency bands and maximum radio-frequency power:

GSM 900MHz: 33.00 dBm

GSM 1800MHz: 30.00 dBm

UMTS B1 (2100MHz): 24.00 dBm

UMTS B8 (900MHz): 24.00 dBm

LTE FDD B1/3/7 (2100/1800/2600MHz): 24.00 dBm

[(1)]   If sold with the device, depending on the device you purchased.

LTE FDD B8/20 (900/800MHz): 25.50 dBm

LTE FDD B28 (700MHz): 24.00 dBm

LTE TDD B38 (2600MHz): 24.00 dBm

5G NR FDD n1/n3/n7/n28(2100/1800/2600/700 MHz): 24.50 dBm

5G NR TDD n38 (2600 MHz): 24.50 dBm

5G NR TDD n78 (3500 MHz): 27.00 dBm

EN-DC Combination: 27.00 dBm

Bluetooth 2.4GHz band: 9.19 dBm

Bluetooth LE 2.4GHz band: -4.03 dBm

802.11 b/g/n 2.4GHz band: 16.88 dBm

802.11 a/n/ac 5150 – 5350 MHz: 13.07 dBm

802.11 a/n/ac 5470 – 5725 MHz: 13.26 dBm

802.11 a/n/ac 5725 – 5875 MHz: 13.39 dBm

Restrictions:

This equipment may be operated in all European countries. The 5150-5250 MHz of Wi-Fi 5GHz can be used indoors and outdoors only when the equipment is not attached to a fixed installation or to the external body of road vehicles, a fixed infrastructure or a fixed outdoor antenna. The 5250-5350 MHz of Wi-Fi 5GHz can be used inside buildings only. The 5470-5725 MHz band of Wi-Fi 5GHz can't be used in road vehicles, trains, aircraft or UAS (Unmanned Aircraft System) scenarios for the following countries:

	BE	BG	CZ	DK	DE	EE	IE	EL	ES	FR	HR
	IT	CY	LV	LT	LU	HU	MT	NL	AT	PL	PT
	RO	SI	SK	FI	SE	NO	IS	LI	CH	TR	UK (NI)

	Third countries										
	UK										

This radio equipment is also subject to certain restrictions when it is placed on the market in United Kingdom (UK):

In accordance with the relevant statutory requirements in the UK, the 5150 to 5350 MHz frequency range is restricted to indoor use in the United Kingdom.

Software update

The connection costs associated with finding, downloading and installing software updates for your mobile device's operating system will vary depending on the offer you have subscribed to from your telecommunications operator. Updates will be downloaded automatically but their installation will require your approval.

Refusing or forgetting to install an update can affect your device's performance and, in the event of a security update, expose your device to security vulnerabilities. For more information about software update, please go to tcl.com

10 Troubleshooting

Before contacting the service center, here are some instructions to help you troubleshoot your device:

• For optimal operation, fully charge the battery.

• To improve the tablet's performance, remove unnecessary files or apps on your tablet.

• Update your tablet's software, go to **Settings > System > System Update**.

- Reset your tablet via **Erase all data (factory reset)**. Touch **Settings > System > Reset** options. Another method is to hold down the **Power** key and the **Volume up** key at the same time when your tablet is powered off, and then select **Wipe data/factory reset** by pressing volume down key. All your tablet data will be lost permanently. It is strongly advised to fully back up your tablet data before resetting.

and carry out the following checks:

My tablet can't be switched on or is frozen

- When the tablet can't be switched on, charge for at least 20 minutes to ensure the minimum battery power needed. Then switch it on again.
- When the tablet falls into a loop during power on animation and the user interface can't be accessed, press and hold the **Power** key to reset. This eliminates any abnormal OS booting issues caused by third party applications.
- If neither method is effective, reset the tablet by pressing the Power key and the Volume up key at the same time, selecting a language, and then selecting **Wipe data/Factory reset**. Press the **Volume** key to select, and press the **Power** key to confirm each selection.

My tablet has not responded for several minutes

- If your tablet doesn't respond, turn off your tablet by pressing and holding the **Power** key until it turns off and then restart it again.
- If your tablet has a removable battery, remove the battery and reinsert it, then restart the tablet.
- If it still doesn't work, reset the tablet.

My tablet turns off by itself

- Check that your screen is locked when you are not using your tablet, and make sure that the **Power** key is not accidentally pressed while the screen is unlocked.
- Check the battery charge level.
- If it still doesn't work, reset the tablet or update software.

My tablet can't charge properly

- If your tablet has a removable battery, make sure that your battery is inserted properly and clean the battery contact if it's dirty. It must be inserted before plugging in the charger.
- Make sure that your battery is not completely discharged; if the battery power has been empty for a long time, it may take around 20 minutes to display the battery charging indicator on the screen.
- Make sure that charging is carried out under normal conditions (0°C (32°F) to 40°C (104°F)).
- When abroad, check that the voltage input is compatible.

My tablet can't connect to a network or "No service" is displayed

- Try connecting to the network by moving to another physical location.
- Verify the network coverage with your operator.
- Try connecting at a later time if the network is overloaded.

My tablet can't connect to the internet

- Check your tablet's internet connection settings.
- Make sure that you are in a place with network coverage.
- Try connecting at a later time or another location.

I can't use the features described in the manual

- Check with your operator to make sure that your subscription includes this service.
- Make sure that this feature doesn't require an **TCL** accessory.

I can't connect my tablet to my computer

- Check to make sure the USB port is not broken. If it's not working, try another USB port on your computer.
- Make sure USB drivers are properly installed.
- If you are using a Windows computer, make sure it supports MTP mode. If you are using a Mac, make sure to install Android File Transfer from www.android.com/filetransfer/.

I can't download new files

- Make sure that there is sufficient tablet storage space for your download.
- Select the microSD card as the location to store downloaded files.

- Check your subscription status with your operator.

The tablet can't be detected by others via Bluetooth

- Make sure that Bluetooth is turned on and your tablet is visible to other users.
- Make sure that the two tablets are within Bluetooth's detection range.

The battery drains too fast

- Make sure that you follow the complete charge time (minimum 120 minutes).
- After a partial charge, the battery level indicator may not be exact. Wait for at least 20 minutes after removing the charger to obtain an exact indication.
- Adjust the brightness of screen as appropriate.
- Extend the email auto-check interval for as long as possible.
- Update news and weather information on manual demand, or increase their auto-check interval.
- Exit background-running applications if they are not being used for extended periods of time.
- Turn off Bluetooth or Wi-Fi when not in use.

The tablet becomes warm following game playing, internet surfing or running other complex applications

- This heating is a normal consequence of the CPU handling excessive data. Ending the above actions will make your tablet return to normal temperature.

After a factory data reset is performed, I can't use my tablet without entering Google account credentials

- After a reset is performed, you must enter the original Google account credentials that were used on this tablet.
- If you don't remember your Google account credentials, complete Google account recovery procedures.
- If you still cannot access your tablet, apply to the authorised repair centre, but remember that it will not be regarded as warranty case.

I forget some passwords/codes/keys on tablet

- Perform a factory data reset.
- If you still cannot access your tablet, apply to the authorised repair centre, but remember that it will not be regarded as a warranty case.
