Attention

 The driver should not operate this product while driving. Aside or carelessness in front of you may cause traffic problems. When operating by the driver, be sure to park the vehicle in a safe place before proceeding. This product is intended to be used as a reference

material in the event of an accident. We do not guaran-

tee its effectiveness as complete evidence.

Please note that this product may infringe on privacy and other rights depending on how it is used. We are

not responsible for these cases.

Since this product uses a wide-angle lens, part of the image may be distorted. It also differs from the actual perspective. This is a characteristic of wide-angle lenses and is not a malfunction.

Please use the original power cable provided in package, do not use other power cables. Other power cable may make the camera mirror unstable even

damaged.

Do not use Socket distributor.

7. Although we offer brackets for rear camera to install inside car, we don't suggest to install in car. Because the windshield glass and film will decrease the color saturation and sharpness of the video.

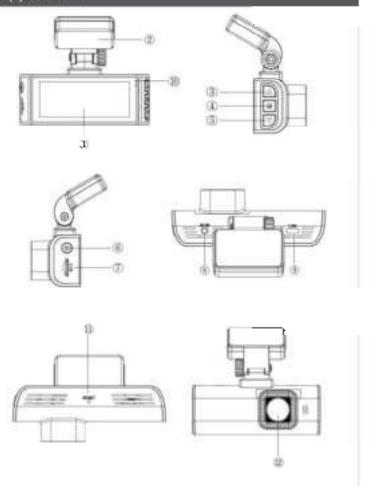

This product is for DC12V / 24V vehicles only.

The specifications and appearance of this product. are subject to change without notice for improvement.

About the Micro SD Card

When using a new MicroSD card, be sure to format it on the main body.

- Do not remove or insert a Micro SD card while the power is on.
- Use a Micro SD card with Class 10 or higher(8GB-258GB).
- A micro SD card that has reached the end of its life will not operate normally due to a card error such as being unable to be read by a computer.
- For stable use, it is recommended to format the microSD card regularly. Recommend: Once a month.
 Note: Formatting will erase all recorded data.

How to insert and remove Micro SD card

 Pay attention to the orientation of the MicroSD card and insert it into the slot.

- Make sure that the microSD card is securely inserted inside the slot.
- #Insert until you hear a click.
- When removing the microSD card, push in the microSD card and pull it out after the microSD card pops out a little.

Installation

How to install the main body

 Remove dirt and grease from the windshield and attach the electrostatic adsorption sheet to the windshield.

How to use the electrostatic adsorption sheet

Since the adhesive strength in strong on both sides and it is difficult to peed off once in a posted, it will be troublesome if the pasting position is recommit. The plantings, the attendants about plant is attended to the weakline life has one worky realized to attaining the duubbe-eated tape on the troubt and pasting it all.

 Peel off the double-sided tape attached to the GPS built-in bracket and attach it on the electrostatic adsorption sheet on the windshield.

If To strengthen the Ening Social, do not attach the main body and leave is for 24 hours or more.

mile-sticking may weaken the adherive strongth of the sape and cause it to full off.

- Insert the attached cigar plug cord into the jack of the main body and the cigar lighter socket of the vehicle.
- ® Coverest the oper plug and covereiter in the correct prioritation.
- this connecting in the energy direction may cause matternation or damage. If you cannot connect syccoscitally, check the connection part carefully before connecting.

Installation

How to install the rear camera

Step 1: Fix camera with 3M adhesive Find a best location, tear off the 3M adhesive on the rear camera, fix the rear camera near by the car license plate lamp. (if you need to adjust the angle, please attach the rear camera bracket to the rear camera and tighten it with screws first).

Step 2: Remove the Panel Remove your trunk's interior panel to expose the cars rear wiring chambers. Pop open your trunk and look for a solid interior panel covering the opposite side of your license plate mounting area. Then insert a trim removal tool or other thin device behind the panel and pry it off.

Step 3: Snake the cable
Use a trim removal tool to pop out tallgate
trim, then run the cable from outside of
the car into the trunk of your car.

Step 4: Connect the rear cameras power cable to the extension cable.

After snaking your rear camera's extension cable, connect the power cable to your rear camera's extension cord.

The red wire on the rear camera cable

#The red wire on the rear camera cable does not need to be connected, (Designed for another model of our products)

Installation

Step 5: Route your rear camera's power cable to the front of the car. If you'd like, use a trim removal tool to pop out the headlining panel directly above your windshield. Then, run your cable through the exposed chamber.

Step 6: Power on the dash cam with box included car charger, don't charge it with your own chargers.

Note

- For safe driving, install and wire so that it does not obstruct the driver's view or drive. It is recommended to install within 20% of the entire windshield from the top of the windshield.
- Please use the original power cable provided in package, do not use other power cables. Other power cable may make the camera mirror unstable even damaged.
- · Do not use Socket distributor.
- Please tear off the films on the screen and lens before using.
- . Connect all accessories before turning on the power.
- Do not connect or disconnect the rear camera cable while the power is on. It will be the cause of the failure.
- When installing the rear camera, make sure that the image is not upside down on the LCD screen of this product before installing it.

FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- - Reorient or relocate the receiving antenna.
- - Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Statement

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance of 20cm the radiator your body. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.
