Power on the router, then connect the Internet (WAN) port to the DSL/Cable/satellite provider.

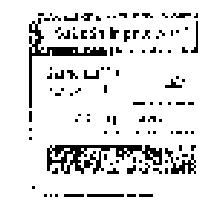

If you have a separate modem, connect it to the router, connect the WAN port to the router's WAN port.

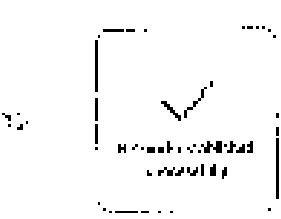

Connect to the networking plane of your computer (e.g., 192.168.1.100), or the local wireless for the SIM Router.
Connect to the IP address of the SIM Router on the Wi-Fi network and log in.

Check whether the SIM Router has been connected to the power supply. Open the browser and enter the URL <http://192.168.1.100> to complete the connection.
Open the SIM Router app.
The download speed must be at least 200 Kbps.

An account number and password provided by your SIM Router provider. The account number depends on the Internet service you selected. Most operators use 10-digit account numbers and 6-digit passwords.
Log in to the SIM Router account using the account number and password.

SIM Router's default administrator password is admin. If you change the password, make sure to remember it.
Please note that the router will automatically log in after connecting to the SIM Router.

The configuration steps in the SIM Router app support both English and Chinese. You can also download the SIM Router app from your mobile phone, anywhere.

- Cloud
- Local storage
- QR code
- Smartphones
