### Data sheet for the LTD-VL3020

Product: LTE Wireless Modem

Model name: LTD-VL3020

### **Table of Contents**

- 1. Overview
- 2. Major features
- 3. Interface
- 4. Electrical specifications
- 5. RF specifications
- 6. Mechanical specifications
- 7. General specifications
- 8. RFx information
- 9. Approbation FCC

#### 1. Overview

The LTD-VL3020 is a personal mobile communication device that incorporates the latest compact radio technology, including smaller and lighter components and support LTE Band 2,4,5,13. This device acts as the vehicle's telematics system and connects to LTE wireless networks and wireless modules to allow voice and data communication. Furthermore, this device can operate on land and water as well as other similar areas.

In LTE mode (CAT4), the device provides uplink speeds of up to 50 Mbps and downlink speeds of up to 150 Mbps for seamless transfer of data such as movies and video calls. The device also supports the transfer of large amounts of data.

The device communicates with the host system via a standard RS-232 or USB port, and AT commands and control commands can be used to send data. Voice calls are also possible.

# 2. Major features

	Dimensions	34.0 x 40.0 x 3.5 mm (L x W x T) (Tolerance – width, length: ±0.15 / height: ±0.2)
	Weight	Max. 10.6 grams
Mechanical	Interface	USB, general purpose I/O pins
	Temperature*	Operation: -20 $^{\circ}$ C - +70 $^{\circ}$ C Storage: -40 $^{\circ}$ C - +85 $^{\circ}$ C
	Main chipset	MDM9628
	Memory	4Gb(NAND) / 2Gb(SDRAM)
Technology	Standard	LTE - DL Speed : 150 Mbps - UL Speed : 50 Mbps
	Band	LTE B2, B4, B5, B13
	Power	LTE : Typ. 23dBm (Power Class 3)
ETC	DC power	4 V
ETC	Functions	Voice, data, SMS

Table 1. Pin descriptions

#### 3.3 USB

This device supports universal serial bus (USB) connections for high-speed data communication. The relevant hardware satisfies the USB 2.0 specifications and supports maximum communications speeds of 480 Mbps

Pin NO.	Signal Name	Pin I/O (Modem host)	Function Description
M1	USB_D+	Ю	USB Differential data line (+)
N2	USB_D-	Ю	USB Differential data line (-)
K1	USB_VBUS	I	USB Power Supply

Table 2. USB Pin descriptions

#### 3.4 Audio

This module includes a PCM interface. The pull-up and pull-down resistors attached to these pin must provide more than 50 Kohm of resistance.

Pin NO.	Signal Name	Pin I/O (Modem host)	Function Description
W1	PCM_SYNC	I	PCM Interface sync
X2	PCM_CLK	I	PCM Interface clock
Y1	PCM_TXD	0	PCM Interface digital audio data out
Y3	PCM_RXD	I	PCM Interface digital audio data in

Table 3. PCM Pin descriptions

#### 3.5 User interface

Pin No.	Signal Name	Direction	Function
15	BOOT_OK	0	Indicates that the Modem boot is complete.
C3	RESET_IN	I	Control line to unconditionally restart the module.
H4	MSG	0	Indicates that the Modem receive Urgent message.
G3	168H_END	O Indicates that the 168hr sleep mode is e	
H6	ACC_ON_SLEEP	I	Control line to power on or 168hr sleep mode.
A3	Phone_ON	I	Control line to power on / off

Table 4. User interface Pin descriptions

### 4. Electrical specifications

#### 4.1 Power supply specifications

The host system provides the power supply (VPH\_PWR)DC 4 V, 2.5 A to the device. The internal power supply module manages the power supplied to the integral circuits and maintains constant voltages. This module also controls each power block to minimize power consumption.

In particular, the PAM (power amplifier module) consumes a lot of power, so it receives a direct power supply of 4 V from the VPH\_PWR. Therefore the VPH\_PWR signal inputs only the supply power of the PAM, even when the absolute rating is higher. In addition, the entire power input module blocks and protects against high surges and ESD in the NAD module.

Pin No.	Signal Name	Direction	MIN	ТҮР	MAX
A7,C7,B8,A9, B14,A15,B16, A17	VPH_PWR (for PAM / for PMIC)	1	3.9 V	4 V	4.1 V

Table 5. Power supply specifications

## 4. Electrical specifications

### 4.2 Logic level specifications

### 4.2.1 Digital logic level specifications

Signal Name	Туре	Low		High		l loit	
		Min	Max	Min	Max	Unit	
BOOT_OK	0	0	0.45	1.35	1.8		
RESET_IN	I	-0.3	0.63	1.17	1.8		
MSG	0	0	0.45	1.35	1.8	V	
96H_END	0	0	0.45	1.35	1.8		
ACC_ON_SLEEP	I	0	0.63	1.17	1.8		

Table 6. Digital logic level specifications

### 5. RF specifications

#### 5.1 LTE

#### 5.1.1 Receiver

- .- Bandwidth: 3GPP TS 36.521-1 Table 5.4.2.1-1
- .- Frequency: B2(1930~1990 MHz), B4(2110~2155 MHz), B5(869~894 MHz), B13(746~756 MHz)
- .- Modulation method: QPSK, 16QAM and 64QAM
- .- RX Sensitivity: B2, B5 (≤-94.3dBm @QPSK, BW: 10MHz)

B4 (≤-96.3dBm @QPSK, BW: 10MHz)

B13 (≤-93.3dBm @QPSK, BW: 10MHz)

#### 5.1.2 Transmitter

- .- Frequency: B2(1850~1910 MHz), B4(1710~1755 MHz), B5(824~849 MHz) B13(777~787 MHz)
- .- Maximum RF Output: Power class 3, 20.3dBm ~ 25.7dBm max.
- .- Modulation method: QPSK and 16QAM
- .- Baseband to RF Direct conversion (Zero IF)

### 6. Mechanical specifications

### 6.1 Environment specifications

```
.- Storage temp.: -40 ^{\circ}C - +85 ^{\circ}C .- Operating temp.: -20 ^{\circ}C - +70 ^{\circ}C (-20 ^{\circ}C - +70 ^{\circ}C : 3GPP specifications are satisfied -30 ^{\circ}C - -20 ^{\circ}C, +70 ^{\circ}C - +80 ^{\circ}C : May cause performance degradation)
```

.- Operating humidity: 80% (60°C) relative humidity

#### 8. RFx information

The strength of the RF field produced by the wireless module or modules embedded in the TCU is well within all international RF exposure limits known at this time. Because the wireless modules embedded in the TCU emit less than the maximum amount of energy permitted in radio frequency safety standards and recommendations, the manufacturer believes these modules are safe for use.

Regardless of the power levels, care should be taken to minimize human contact during normal operation. This module should be remain more than 20 cm (8 inches) from the body when wireless devices are on and transmitting.

This transmitter must not be collocated or operated in conjunction with any other antenna or transmitter. Operation is subject to the following two conditions: (1) this module does not cause interference, (2) this module accepts any interference that may cause undesired operation.

#### 8.1 Information for the integrator

The integrator must not provide information to the end user regarding how to install or remove this RF module in the user manual of the end product. The user manual that is provided by the integrator for end users must include the following information in a prominent location. To comply with FCC RF exposure requirements, the antenna used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be collocated or operated in conjunction with any other antenna or transmitter.
