

User manual Wi-Fi & ZigBee Smart RGB LED 1	User manual English Operating Instruction 1. Install the device ➤ Switches must work, please turn off the power before installing the device. 2. Download APP Android™ & iOS 3. Power on After powering on, the device will enter the Bluetooth pairing mode during the first use. The device enters the "breathing mode". ① The device will enter the Bluetooth pairing mode if you paired another device. If you need to enter this mode, please press the physical switch more times (approximately an interval of every 1s) (ON-OFF-ON-OFF-ON-OFF). The "breathing mode" indicates the light enters the pairing mode. 2	User manual English 4. Add the device Tap "Y" and select "Bluetooth Pairing", then operate following the prompt on the app. Compatible Pairing Mode If you fail to enter Bluetooth Pairing Mode, please try "Compatible Pairing Mode" input. 1. Press the light switch 5 times repeatedly at an interval of every 1s (ON-OFF-ON-OFF-OFF) and ON-OFF-ON-OFF when the light is on. The "blink fast" indicates the device enters the compatible pairing mode. 2. Tap "Y" and select "Compatible Pairing Mode" on APP. For Android system: Enter Wi-Fi password (enter "Fast"). Be patient until pairing completes. For iOS system: Enter Wi-Fi password, tap "Fast" and then "Connect". Enter Wi-Fi SSID with IPADDR:#### and enter the password: ##### and then go back to Wi-Fi and connect to "Fast". Be patient until pairing completes. ● Binding device description ① If the device is offline, it must have a light on power. For details, see Lighting Network Introduction Manual, Fast and ZigBee protocols in App, and How to use bulb as light gateway. Usage of being an ordinary bulb Power on the bulb, it will enter quick pairing mode (The bulb will change from light on and light the model), after 10s, if power off, it will go into and keep working at the highest brightness. 3
