

Replacement Instructions for FOTILE Recirculation Kit carbon filters

- To ensure the best results of the product, we recommend replacing the carbon filters every 6 months. (You may also replace the carbon filter more frequently if needed)
- All 5 pieces of carbon filters need to be replaced at the same time.
- The replacement package includes:

One piece of carbon filter number ①, two pieces of carbon filter number ② and two pieces of carbon filter number ③.

Replacement steps

Step.1

Uninstall the entire recirculation kit from the range hood and disassemble the 5 pieces of carbon filters.

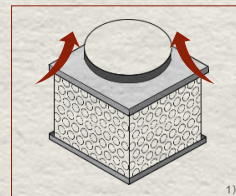

Step.2

Clean the recirculation kit and wipe dry.

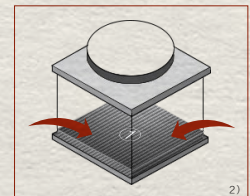

Step.3

Take out the 5 pieces of carbon filters from the replacement package.

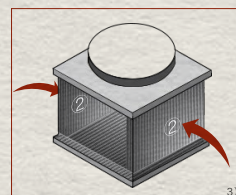

Step.4

Place the recirculation kit with the air inlet facing upwards

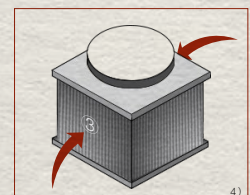

Place carbon filter number ① on the base of the recirculation kit

Place the two pieces of carbon filter number ② on the symmetrical sides of the recirculation kit

Attention: Edge "a" should be attached to carbon filter number ①.

Lastly, place the two pieces of carbon filter number ③ on the other symmetrical sides of the recirculation kit.

Step.5

Install the replaced recirculation kit back to the range hood and seal the connecting point with duct tape.
