3. After the machine completely dry out, put on the bag and place it in a cool and well ventilated place.
4. If you do not use it for a long time, in the basic of previous steps, please turn on the machine for a few minutes from time to time to ensure a good performance.

Notice: Please don't drop any water into the machine when clean the air outlet.

FAQ

SITUATION	REASON
No working	● Is it plugged into a power socket? Is there a power outage? ● Is the home leakage switch or fuse cut off? ● Is the filter replacing indicator keep flashing?
Poor performance	● Is there any dust in the surface of pre-filter? ● Is there any obstacle blocking the air inlet/outlet.
Significant noise	● Is there anything stuck on the fan in the air outlet? ● Is the machine tilted? ● Please set a lower grade of wind speed if the noise is too loud , or set low grade of wind speed when using in bedroom at night.
Coming out nasty smell	● It is the normal phenomenon that the machine emits the smell of plastic for the first time. The machine will emit nasty smell if the filter is dusty, so in this situation, please clean or replace the filter. ● If the burning smell emits from the machine, please unplug the power socket and contact with buyer or customer service.
The reminder of replacing filter is still flashing after user have replaced a new one.	● Please press the power button  for 7s to reset the machine and the life counter of the filter will start.

Notice: If the above FAQ can not solve your problems and need maintenance, please contact the supplier or after sales service center. Please do not disassemble the machine to maintain by yourself.
