## ❑ Main Parameter

Product Name	Smart Security Light Camera
Model Number	MX5
Camera Resolution	1920*1800 (1080P)
Viewing angle	110°
Operational Temperature	-20C° to +50 C°
WIFI	IEEE 802.11b/g/n
Power Supply	100-240VAC ,50/60HZ,0.2A
Power	25W(MAX)
Weight	980g
Dimensions(H x W x D)	300mmx111mmx112mm

## ❑ Common Fault List

Fault type	Indicator Status	Solution
No Power	Indicator off	Check the power connection status
Boot Failed	Red & Blue LED always lights	Power off 5 seconds, then power on again
Connect to WiFi Failed	Red LED always blinks	Check the WiFi signal strength near the installation of the device through the mobile phone (it needs to be greater than or equal to 2), check whether the WiFi password is correct, if the password is not correct, please click return, reenter password.
Connect to Server Failed	Blue LED always blinks	Check whether the network is connected to the Internet normally

## NOTE

This device complies with part 15 of the FCC Rules. Operation is subject to the condition that this device does not cause harmful interference

(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna. Changes or modifications made to this equipment not expressly approved by manufacturer name) may void the FCC authorization to operate this equipment.

FCC ID:2AWK9-MX5
