1. GENERAL DESCRIPTION

Camden Door Controls CM-40 (4 1/2" round faceplate), CM-41 (4 1/2" round faceplate with 4 1/2" square back plate) and CM-60 Series (6" round faceplate) 'all active' push plate switches are heavy-duty, weather resistant and ADA compliant door activation switches. The CM-40 and CM-41 switches mount to standard 2 x 4 electrical boxes. The faceplates are stainless steel or solid brass, and the assembly is designed for easy installation in single-gang electrical boxes, or with included adapter plate – double-gang and 4x4 boxes. The switches are UL/CSA approved, and rated 15 amps @ 30 VDC. The push switches are offered with different graphics, and in various architectural finishes. Watertight configurations are also available.

3. APPLICATION

Camden all-active switches are designed for areas where an easy-to-activate, high visibility switch is desired. Ideal for high-traffic areas, hospitals, wheelchair access, seniors' residences, etc. They can be surface or flush mounted.

Camden all-active switches are designed to control electric strikes, electromagnetic locks, and automatic doors. They may also be used for shunting, bypassing alarms, request to exit, timed functions, and many other applications.

The switches are made for high frequency usage, in both indoor and outdoor environments. Camden switches are versatile, and can be supplied in various configurations and finishes, to suit any commercial, industrial, or institutional application.

5. INSTALLATION AND WIRING

Mounting Options:

- The CM-40, CM-41 and CM-60 can be installed using either flush or surface mounting methods.

Selecting a Surface Mount Enclosure:

- Refer to the "Parts and Information" section (Page 5) to choose a suitable Enclosure.

Installation Process:

- Use two #6-32 x 1 1/4" screws for mounting.
- Insert the screws into the designated mounting holes, but do not fully tighten them at this stage.

Attaching the Switch:

- Align the switch so that the screw heads slide into the slots on the back of the switch.
- Once the switch is in position, proceed to secure it in place.

Securing the Switch:

- Insert the hex key into the holes on the faceplate to access and tighten the screws.

Note: To flush mount the CM-60, first secure the adapter plate using four #6-32 x 1/2" pan head Phillips screws.
