

Battery Safety

Do not short circuit a cell or battery. • Do not store cells and batteries haphazardly in a box or drawer where they may short-circuit each other or be short-circuited by other metal objects. • Check that the battery compartment is secure. • Only batteries of the same or equivalent (Vp) as those recommended should be used with this product. • Batteries are to be inserted with the correct polarity. • Remove any batteries from the product when it is not being used for a long period of time to avoid leakage. • Exhausted batteries should be removed from the product to avoid leakage. • In the event of batteries leaking, do not allow any liquid to come into contact with the skin or eyes. If contact has been made, wash the affected area with copious amounts of water and seek medical advice. • Keep batteries out of the reach of children. • Seek medical advice immediately if a cell or battery has been swallowed. • For rechargeable batteries, should not be recharged. • Rechargeable batteries must be removed from the product before being charged. • Rechargeable batteries should only be recharged under adult supervision. • When possible, remove the battery from the product when not in use. • Exhausted batteries must be removed and disposed of safely. • Do not dispose of batteries in a fire. • Do not crush, puncture, dismantle or otherwise damage the batteries. • Do not expose batteries to heat or fire as they may explode. • Do not mix alkaline, standard (carbon zinc) and rechargeable batteries (nickel hydride). • Do not subject the

batteries to mechanical shock. • Do not dispose of batteries in household waste. • To dispose of any batteries, take them to a local recycling station. Contact the local government offices for details. This product requires 8 x AA batteries (not included).

Care and Maintenance

Wipe the mill set with a soft, damp cloth and allow to dry thoroughly. • Do not immerse the mill set in water or any other liquid. • Never use harsh or abrasive cleaning detergents or scourers to clean the mill set as this will cause damage.

NOTE: Not suitable for dishwasher use.

CAUTION: Take care not to overtighten the grind-adjust knob, as this could cause damage to the mechanism.
Residue may build up around the dispensing

mechanism, which can prevent the finest grind setting from working. If this happens, turn the mill set upside down and begin grinding to release the trapped residue. The finest grind setting can now be used.

The 1990s were indeed a decade of change for the city, and the changes were not limited to the streets. The city's population grew by 10 percent, and the city's economy diversified. The city's major industries were manufacturing, services, and government. The city's major employers were the city government, the city's major universities, and the city's major hospitals. The city's major employers were the city government, the city's major universities, and the city's major hospitals. The city's major employers were the city government, the city's major universities, and the city's major hospitals.

Sécurité de la batterie

- Ne court-circuitez pas une cellule ou une pile.
- Ne rangez pas les cellules et les piles dans un bûcher ou un tiroir de manière désordonnée, où elles pourraient se court-circuiter ou être court-circuitées par d'autres objets métalliques.
- Vérifiez que le compartiment des piles est bien fait.
- Utilisez uniquement des piles du même type ou du même type que celles recommandées avec ce produit.
- Les piles doivent être insérées en respectant la polarité.
- Retirez les piles du produit lorsqu'il n'est pas utilisé pendant une longue période afin d'éviter toute fuite.
- Pour éviter toute fuite, retirez les piles usagées du produit.
- En cas de fuite des piles, ne laissez pas le liquide entrer en contact avec le peau ou les yeux. En
