OVERVIEW

The RG-S6580 series switches are new-generation high-performance and high-density switches released by Ruijie Networks for AI and other application scenarios. The switches are highlighted by the high performance and high density. The switches provide high-density 200GE or 100GE ports and can be used with the RG-S6980-64QC switch to meet design requirements of the spine-leaf network architecture.

There are two models available:

RG-S6580-48CQ8QC: 48 100GE DSFP ports and eight 400GE QSFP-DD ports

RG-S6580-24DC8QC: 24 200GE QSFP56 ports and eight 400GE QSFP-DD ports.

Product highlights

Next-Generation Data Center Network

The rapid development of AI/machine learning, and other applications drives the evolution of the next-generation data center network to the 100GE/400GE network. The next-generation data center network requires switches to have higher performance and bandwidth within a specific space. With a height of 1 RU, the RG-S6580 series switches provide a maximum of 48 100GE ports (or 24 200GE ports) and eight 400GE ports, which better meets the evolution requirements of the next-generation data center network.

High-Performance and Low-Delay Data Center Network

The RG-S6580 series switches can work with the RG-S6980-64QC switch to build end-to-end, lossless, low-latency remote direct memory access (RDMA) networks based on priority-based flow control (PFC), explicit congestion notification (ECN), and other network flow control technologies as well as the memory management unit (MMU) technology. It meets network deployment requirements in various scenarios including AI/machine learning, high performance computing, distributed storage, and big data.

Carrier-Class Reliability Protection

The RG-S6580 series switches support 1+1 power redundancy and 5+1 fan redundancy. All power supply modules and fan modules can be hot-swapped without affecting the normal operation of the switch. The switch provides fault detection and alarm functions for power supply modules and fans. It automatically adjusts the fan speed based on temperature changes, to better adapt to the environment in data centers. The switch also supports device-level and link-level reliability protection as well as overcurrent protection, overvoltage protection and overheating protection.

IPv4/IPv6 Dual-Stack Protocols and Multilayer Switching

The hardware of the RG-S6580 series switches supports IPv4 and IPv6 protocol stacks and multilayer line-rate switching. The hardware differentiates and processes IPv4 and IPv6 packets. The switch also integrates multiple tunneling technologies such as manual tunneling. Users can flexibly work out IPv6 inter-network communication solutions by using this switch based on IPv6 network planning and network conditions.

The RG-S6580 series switches support a wide range of IPv4 routing protocols, including static routing, Routing Information Protocol (RIP), RIPv2, Open Shortest Path First (OSPF), and Border Gateway Protocol version 4 (BGP4). Users can select appropriate routing protocols based on network environments, to flexibly build networks.

The switch also supports abundant IPv6 routing protocols, including static routing, Routing Information Protocol next generation (RIPng), OSPFv3, and BGP4+. Appropriate routing protocols can be selected to upgrade an existing network to an IPv6 network or build a new IPv6 network.

All-Round Management Performance

The switch provides various management interfaces such as the console interface, management interface, and USB interface, and supports Simple Network Management Protocol (SNMP) v1/v2c/v3 and universal network management platform. It supports CLI-based management, telnet, and cluster management, which facilitates device management. The supported encryption modes such as SSH2.0 and SSL ensure more secure management.

Chassis, Fan Module

Product Model	Description
RG-S6580-48CQ8QC	48 × 100GE DSFP ports + 8 × 400GE QSFP-DD ports Two power slots and six fan slots The chassis is installed with two RG-PA1200I-F modules and six M1HFAN II-F fan modules.
RG-S6580-24DC8QC	24 × 200GE QSFP56 ports + 8 × 400GE QSFP-DD ports Two power slots and six fan slots The chassis is installed with two RG-PA1200I-F modules and six M1HFAN II-F fan modules.

Power Supply Module

Product Model	Description
RG-PA1200I-F	1200 W AC module (AC/240 V HVDC)

Fan Module

Product Model	Description
M1HFAN II-F	Fan module (front-to-rear ventilation)

400GBASE Series Optical Modules

Product Model	Description
400G-QDD-SR8-MM850	400G SR8 module, QSFP-DD form factor, MPO-16 APC, 850 nm, 100 m (328.08 ft.) over MMF
400G-QDD-DR4-SM1310	400G DR4 module, QSFP-DD form factor, MPO-12 APC, 1310 nm, 500 m (1,640.42 ft.) over SMF
400G-QDD-FR4-SM1310	400G FR4 module, QSFP-DD form factor, Duplex LC, 1310 nm, 2 km (6,561.68 ft.) over SMF

100G BASE Series Optical Modules

Product Model	Description
100G-AOC-5M	100G QSFP28 AOC cable, 5 m (16.40 ft.)
100G-AOC-10M	100G QSFP28 AOC cable, 10 m (32.81 ft.)
100G-QSFP-SR-MM850	100G SR module, QSFP28 form factor, MPO, 850 nm, 100 m (328.08 ft.) over MMF
100G-QSFP-iLR4-SM1310	100G iLR4 module, QSFP28 form factor, Duplex LC, 1310 nm, 2 km (6,561.68 ft.) over SMF
100G-QSFP-LR4-SM1310	100G LR4 module, QSFP28 form factor, Duplex LC, 1310 nm, 10 km (32,808.40 ft.) over SMF
100G-QSFP-ER4-SM1310	100G ER4 module, QSFP28 form factor, Duplex LC, 1310 nm, 40 km (131,233.59 ft.) over SMF
