Wash impeller cover and impeller

FQA

Q: Why doesn't the product work after connecting the wires?
A: The USB head is not inserted all the way, please insert it again.
The power cable is broken inside, please replace a new one.
Please check if the socket switch is turned on.

Q: How often does the filter need to be replaced
A: The service life of the filter replacement may be longer or shorter depending on the specific usage. It is recommended to replace it every 1 month.

Q: Why is there black powder floating in the water?
A: This is carbon powder, which is safe and harmless. You can clean the filter replacement to remove the powder.

Q: Why does the pump make abnormal noise during use?
A: The small foreign objects may have entered the water pump, please disassemble and wash the water pump and reinstall it.
