e-3
 x 2

The diagram is divided into two horizontal sections by a dashed line. The top section, labeled 'e-1' in a blue circle, shows a monitor connected directly to a wall outlet. A red prohibition sign (a circle with a diagonal line) is placed over the wall outlet, indicating this is an incorrect and unsafe practice. The bottom section, labeled 'e-2' in a blue circle, shows a monitor connected to a power strip, which is then plugged into a wall outlet. A callout box with a double-headed arrow indicates a distance of 15 cm (6 inches) between the monitor and the power strip. A yellow warning triangle with a black lightning bolt is also present in this section, indicating a risk of electric shock. The power strip is shown with a blue cord connected to the monitor and another blue cord connected to the wall outlet.
