Product&Notes

What's in the Box

- Lumary Neon Rope Light

Get Ready

- Know your Wi-Fi network and password.
- Make sure your mobile device meets the following requirements:
For iOS: Ensure your device is running iOS 13.3 or higher.
For Android: Ensure your device is running Android 9.0 or higher.
- Ensure that you are connecting to a 2.4GHz Wi-Fi network as Lumary devices are not compatible with 5GHz networks.

Notes

Button Functions:

1. Hold down the button for 5 seconds to enter network configuration mode. Upon powering up, the factory-set equipment will automatically make the lights flash.
2. A single press changes the mode, which varies with each press.
3. Pressing the button twice quickly will turn the device off. It will remember the color or the state from before the last time it was turned off.

(Note: A long press of 5 seconds, in any mode, will initiate the network configuration mode.)

Installation diagram

Bending direction matters needing attention

Installation method 1: Fastener installation

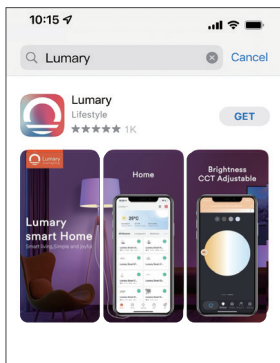

Installation method 2: Ground plug installation

It can be installed into the suitable scene as needed. If you have any questions, please contact the after-sales email : support@lumary.tech. We will give you guidance and support.

Install the "Lumary" App

1. Find and install the "Lumary" App on Apple Store, Google Play.

2. Register a Lumary account.

Note:Please select your region and country.

3. Connect

NOTE: Lumary's products can't connect to 5GHz networks.

Steps:

1. Advised to enable Bluetooth, Enable Bluetooth to add some Wi-Fi device easily;

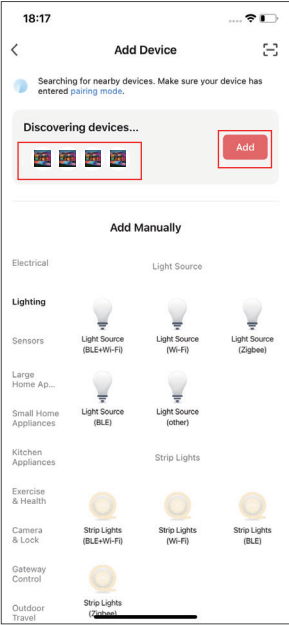

2. Each time the device without distribution network is powered on, confirm the light is breathing or blinking pairing mode;

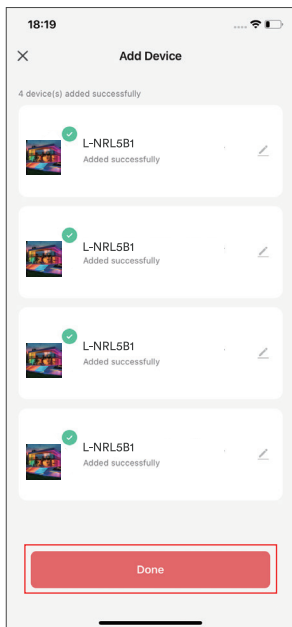

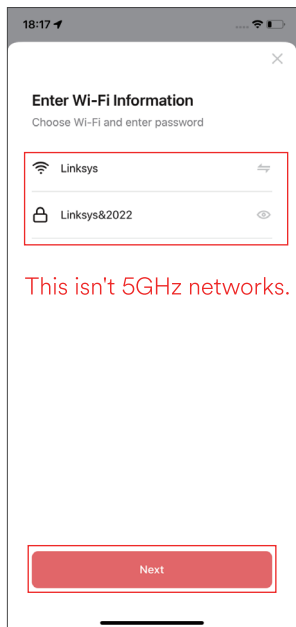

3. Open the Lumary App, In the top corner of the Devices screen, click "+" and select "Add Device" to confirm that the device is paired.

If not, you need long press button 5s confirm the light is blinking.

4. Find the device, choose Wi-Fi and enter password, press "Next". Click "Add", and wait patiently. After that, click "Done", and the device is successfully added to the App.

5. Other ways to add devices, Open the Lumary App>> In the top corner, click ">> Choose "Lighting">> Select "Light Source (BLE + Wi-Fi)">> Select "AP Mode" or "EZ Mode" in the upper right corner.

4. Troubleshooting

1. Can't connect to your Wi-Fi network.

Make sure you entered the correct Wi-Fi password during the Wi-Fi setup. Check whether there are any Internet connection problems.

If the Wi-Fi signal is too weak, reset your Wi-Fi router and try again.

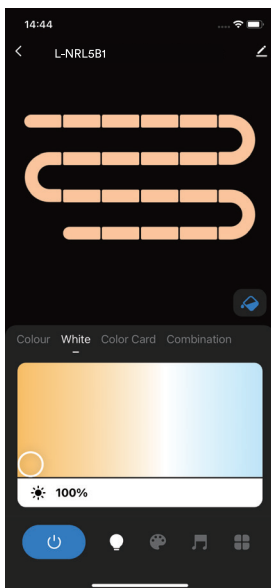

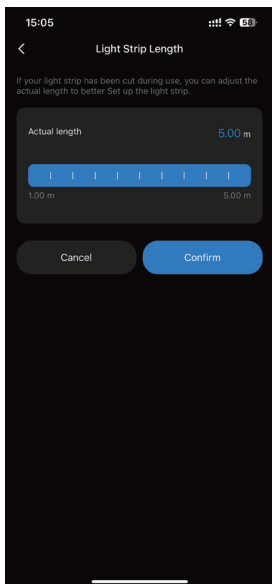

2. If you fail to bind, you will need two phones, one to set the hotspot and the other to connect the hotspot and add the device through the app. If the device is successfully added, the device is normal. The problem may be in the router, you need to check your router Settings to see if there are MAC and DHCP restrictions. Lumary's products do not support 5GHz networks.

3. If you have any questions. You can contact us via our after-sales email: support@lumary.tech or leave a message on our official social media account.

App functions for you

When you enter the App, you can see five sections: On/Off, Colour, Scene, Music, Plan. Detailed function description please check below:

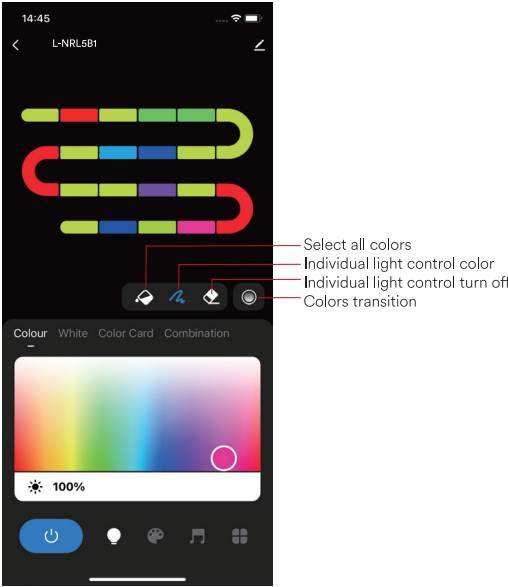

3.1. On/Off. The switch button controls the power of the entire set of string lights, allowing you to turn them on or off with a single tap.

Initial use defaults to the default value, no need to set, please click confirm.

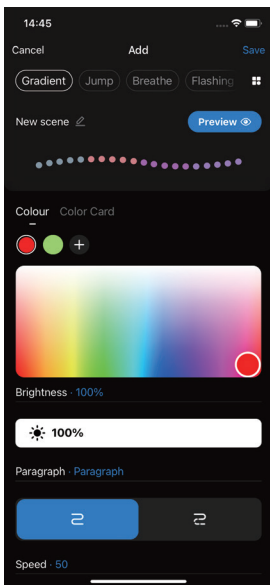

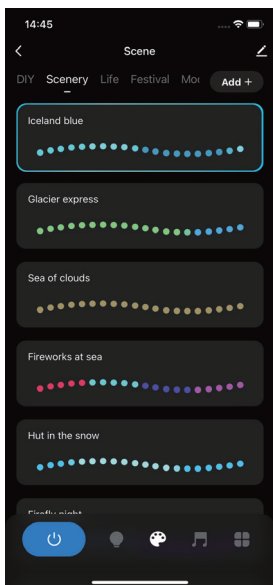

3.2. Colour. After the successful connection, enter this Colour UI page by default. This UI page is with 2 icons and 1 digital display.

Click on the two icons to switch between the two available color format choices.

3.3. Scene. It has 44 different scene mode. Supports DIY 50+ scenes, edit your favorite scenes .

(Note: When you're done editing, be sure to preview and click Save. Next time you open this page, the DIY scene will also be saved.)

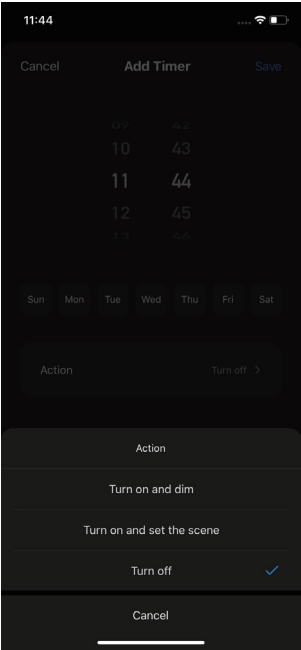

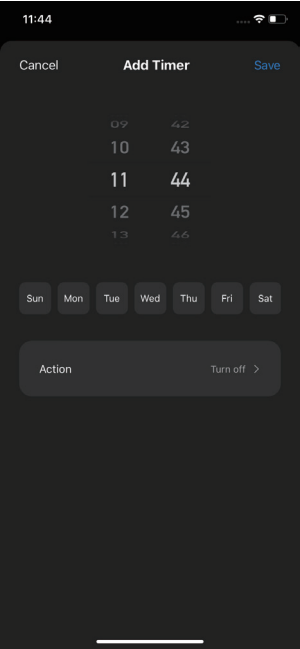

3.4. Music Rhythm: When you activate the music rhythm mode, the lights will synchronize with the music in the following two scenarios:

If you open the music app on the controlling mobile phone and start playing music, the lights will synchronize with the rhythm of the music. If the controlling mobile phone is not playing music but receives other sounds, such as notifications or incoming calls, the lights will synchronize with the rhythm of those sounds.

Tip: Exiting the music rhythm mode will stop the synchronization with the rhythm.

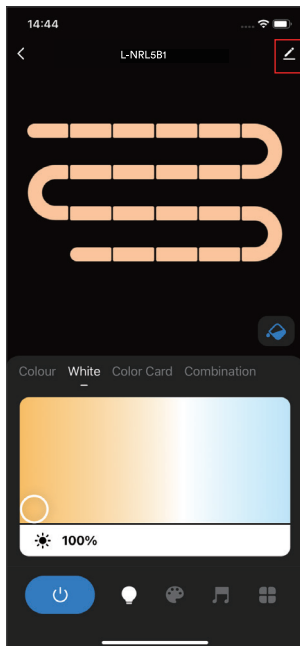

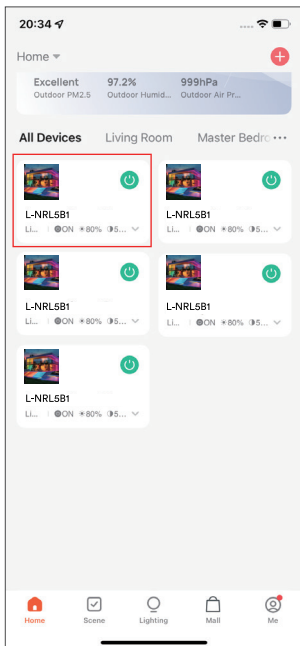

3.5. Plan. The owner can freely set the on/off time of the string light every day.

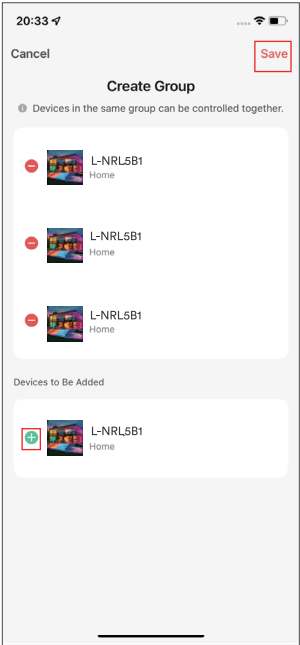

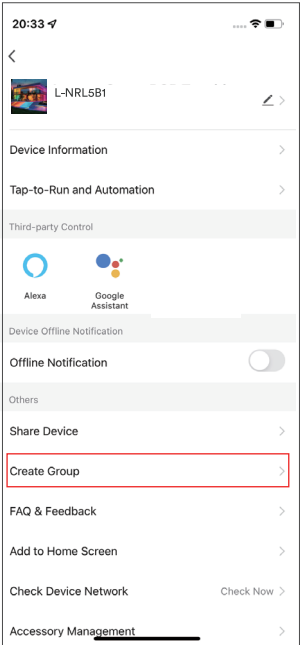

Group Control

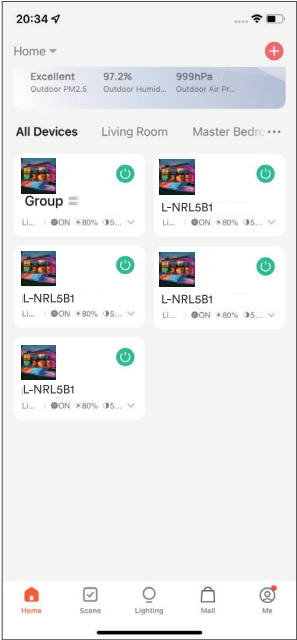

1. Log in to Lumary App, tap the smart device and enter into, click" ∠ " in the top right corner.

2.Click "Create Group", then select a device and save.

3.You can reset the group name and save it, and the group can control devices.

Remote Control

The remote control can operate both networked and unconnected devices. Here's how to handle each scenario:

1. For unconnected devices:

- Wait until the device stops flashing.
- Press the on/off button for 3 seconds. Note that this method is not recommended.

2. For devices connected to the network:

- Power off and then on the device.
- Long press the on/off button for 3 seconds.
- The light will blink to indicate successful pairing.

FAQ

1. What should I do, if I don't have internet access to my Lumary product?

If you don't have access to a network, you'll need two mobile phones. One phone will be used to set up a hotspot, and the other phone will connect to the hotspot and add the device via the app (please refer to the guide for detailed instructions).

2.If my Wi-Fi internet goes down, will Lumary App still work?

Lumary products require a Wi-Fi connection to enable remote usage. However, they can also be controlled locally using the app via LAN (Local Area Network) and Bluetooth. This means that functionalities such as turning on/off, dimming, adjusting color temperature, and changing colors can be controlled directly through the app even without an internet connection, provided the devices are connected to the same network or via Bluetooth connection.

3. Why does the flickering occur with Lumary products?

Lumary's products come with factory default network configurations. If the device hasn't been connected to the network, it will flash for three minutes each time it's powered on. Once connected to the network, the flashing will cease. If the device is connected to the network, it will stop flashing and automatically reconnect to the network when switched off and on via the wall switch after a 15-second interval.

4.Can I share with family and friends?

Yes, you can share access to your Lumary devices with others. Here's how to do it:

1. In the Lumary App, go to your main device list.
2. Click on the device you want to share access to.
3. Press the "... " button located at the top right corner for advanced settings.
4. Click on "Share Device."
5. From there, you can give or revoke sharing permissions as needed.

To share access, the other user should have already downloaded the Lumary App and registered an account. Once shared, they will be able to control the device accordingly.

5.Can I group multiple Lumary devices together?

Yes, you can group multiple devices of the same type based on room, location, or any other criteria you prefer. The same devices can belong to multiple groups. For instance, if you create a group named "Bedroom" and another group named "Entire House," your Bedroom lights can be included in both groups. To create a group, follow these steps:

1. From your main device list, select one of the devices you want to group.
2. Tap the "... " button located at the top right corner for advanced settings.
3. Select "Create Group."
4. Name the new group and choose which devices you'd like to include in the group.

6.My Lumary device has a funny name. How do I rename it?

From your main device list, follow these steps to rename a device:

1. Click on the device you want to rename.
2. Press the "..." button located at the top right corner for advanced settings.
3. Click on "Modify Device Name" (or "Modify Group Name" if you are renaming a group).
4. Choose a more familiar name for the device.

7.What's the wireless range?

The range of your home Wi-Fi is largely determined by your home router and the conditions within the room. For precise information about the range of your Wi-Fi network, refer to the specifications provided by your router manufacturer. They should provide details regarding the coverage area and range capabilities of your specific router model.

8.What should I do if the device Appears offline or is unreachable?

Ensure that your Wi-Fi router is online and within range, and make sure you have the latest Lumary functionality by following these steps:

1. Click "Check for firmware update" in your device settings to ensure you have the latest firmware installed.
2. If issues persist, try the following troubleshooting steps:
 - a. Turn off the Lumary device.
 - b. Clear the application cache on your mobile device.
 - c. Reboot the router by powering it off and on again.
 - d. Wait for one minute, then turn the Lumary device back on.
 - e. After five minutes, check and confirm the status of the device.

Following these steps can help resolve connectivity issues and ensure optimal performance of your Lumary device.

9.How many devices can I control?

- The maximum number of timers that can be added to a single device: 30
- Maximum number of devices that can be added in a single home: 120
- The maximum number of Tap-to-Run that a single home can create: 100

Made in China

CAUTION:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
