Smooth, diffused light.

Available in 2700K, 3000K, 4000K, and dim-to-warm (1800–3000K) models, the ARCTAPE emits a continuous band of flawless, non-pixelated light with no hot spots...even if it's installed without a lens. And with an average of over 200lm/ft, it blows away the competition's output.

Easy, tailored installs.

Because it's cuttable every 2 inches, you can customize the ARCTAPE's length to your exact needs and link your runs with connectors (*sold separately*). All models include 3M® adhesive tape backing so you can just peel, stick, and light! Ideal for indirect lighting in corridors, stairs, coves, handrails, skirtings, etc.

One complete system.

Various ARCTAPE components are available for easy installs, including drivers, connector kits, and channel+ cover kits, which are ideal for professionally finishing your installation and rendering a softer, more uniform light.

YY	2700K	Dim to Warm	90CRI			
Blank	Tunable	(1800-3000K)*				

*Dim-to-Warm only available with tunable white.

Waterproof design.

FLEXTAPE is IP67 rated and offers energy-efficient lighting that disappears into architecture while dramatically elevating its design.

FEATURE PAGE

Easy, tailored installs.

Available in 2700K, 3000K, and 4000K models, our FLEXTAPE is cuttable every 2 3/16 inches so you can customize tape length to your exact needs. All models also include 3M® adhesive tape backing so you can just peel, stick, and light!

One complete system.

Various FLEXTAPE components are available for easy installs, including drivers, connector kits, power feed kits, channel+cover kits, and mounting clips (*ideal for securing outdoor installs*).

Watch us flex.

The NEOFLEX can be freely bent in any direction, vertically or horizontally, to create countless shapes and emits a smooth, diffuse 3000K light. Because it's waterproof, it's great for all indoor and outdoor applications. And because it's made with silicone, it is much more resistant to yellowing than PVC products.

Waterproof design.

This flexible LED tape is IP67 rated and offers energy-efficient lighting that disappears into architecture while dramatically elevating its design.

Cut to any length.

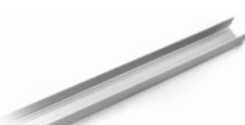

Get as precise as you want, because you can trim the NEOFLEX to exactly any size—it doesn't matter where you cut!

One complete system.

Configure your NEOFLEX in any form your imagination takes and easily install it with these various components and accessories (endcaps and hardware included).
