Y600

PLEASE READ THIS MANUAL CAREFULLY BEFORE USING YOUR ELECTRIC SCOOTER

CATALOGUES

Thank you for choosing to join the ENGWE-BIKES family.

We invite you to read through this user manual to learn about your electric scooter and what it is like to own one. First and foremost, remember to be safe out there. Your scooter is an accessory to your lifestyle and activities. Always follow best practices and traffic rules. Even in this ever-evolving technology, it therefore requires basic maintenance and care to always function properly. Preventive maintenance is the name of the game. We invite you to grow with us and take advantage of our modular technical design. Instructions, videos and live support are being created to provide you with all the knowledge you need to make the most of your Engwe scooter.

1、Safety Instructions

- 1.Electric bikes are not allowed on public transport roads, please observe local laws and policies when driving the Y10
- 2.Scooters are a leisure product, You will need to practice before you can master the riding skills. Engwe is not responsible for any injury or damage caused by the rider's inexperience or failure to follow the instructions in this document.
- 3.Before lending your scooter to someone, make sure they have read this manual, watched the instructional video and received a beginner's guide, It is your responsibility to ensure the safety of your new passenger. Please assist him/her in learning to use the product until he/she learns the basic operation of the scooter. Please ensure that each new rider wears a helmet and other protective equipment
- 4.Following the tips and warnings in this manual will reduce the risks, but will not eliminate all risks. Please remember that when you use a scooter you may be at risk of injury or death through loss of control, collisions and falls, Scooters are only suitable for use on the hard surfaces above. It is recommended that you use them in relatively enclosed road environments (e.g. small areas, parks, dedicated fields, etc.) and do not cross areas with obstacles and contact points. Be alert and slow down when entering unfamiliar environments.
- 5.To reduce the risk of injury, you must read and follow all the 'Caution' and 'Warning' notices in this manual. Do not exceed the speed limit and do not ride on motorways.
- 6.For your first ride, do not choose areas where children, pedestrians, pets, vehicles, bicycles, etc, may be an obstacle and a potential hazard.
- 7.Please respect the rights of pedestrians when riding. Avoid frightening pedestrians, especially the elderly, children, the disabled and pregnant women. Alert pedestrians when approaching them from the rear and slow down when overtaking them. Please obey local traffic laws.
- 8.When riding in countries and regions where there are no laws or regulations relating to electric scooters, the safety requirements for riders in this manual must be strictly adhered to. Engwe shall not be liable for any property damage, personal injury, accident or legal dispute arising from the user's violation of the safety tips in this manual.
- 9.Before riding the scooter, check and ensure that there are no loose fasteners or damaged parts. If the scooter makes an unusual noise or alarm, stop using it immediately and consult your point of purchase or send an email to the manufacturer.
- 10.When riding, please observe the road surface, avoid obstacles and have level ground (including but not limited to wet ground, loose sand, rocky ground, ice).
- 11.This product is suitable for ages 14-60 and weighs up to 120kg.
- 12.Do not attempt to charge your electric vehicle when the charging port, charger or power outlet is wet.
- 13.Ensure that the scooter is charged with the original Engwe charger.
- 14.Use only Engwe approved parts and accessories. And do not modify your scooter.
- 15.Children should not use scooters or play with scooter parts. When riding, the body vibration of the scooter can cause the driver's body to vibrate.
- 16.It is recommended to park on a flat, firm surface. If parking on a slope, the stand must face downhill to prevent tipping over. Do not allow the scooter to rush down to prevent the kickstand support from closing under gravity and the vehicle from tipping over. After lowering the kickstand, check that the vehicle is stable to prevent it from tipping over (slipping, wind, shaking). Do not park in busy areas. It is recommended to park against a wall. Please try to park the scooter on a flat road.
- 17.For a better driving experience, regular maintenance of the product is recommended.
- 18.Please read the user manual before charging.
- 19.Do not touch the brake parts of the scooter as this may cause injury.

Please observe the following safety tips:

- A. People who are not suitable for this mobility scooter include: people under the influence of alcohol or drugs, people who are unable to perform strenuous exercise due to illness, people who are unable to maintain their balance. People whose weight exceeds the prescribed limit (see "Specifications" in the instructions for use), and pregnant women.
- B. Minors need to be supervised by adults on scooters.
- C. Please observe local laws and regulations when riding. Please do not ride your scooter in areas where it is prohibited by local law.
- D. In order to ride safely, you must ensure that you can see the area in front of you and that you can be seen by others.
- E. Do not ride in snow, rain, slippery, muddy or icy weather for any reason. Do not ride your scooter over obstacles (sand, rocks or barricades) as this may result in a loss of balance or grip, which could lead to a fall.
- F. Damage and losses caused by water ingress are not covered by the warranty.
- G. Please do not drive at night.
- H. Please do not accelerate or decelerate suddenly. Please do not exceed the speed limit; otherwise, there may be a risk of loss of control, collision and fall.

2.5.3 Pull the folding pin and rotate it to other positions, then press the folding button and fold the folding riser down into place to complete the folding of the whole car.

2.5.4 Once the scooter is folded, hold the risers for handling.

3. Maintenance

1. Cleaning

Use a soft, damp cloth to wipe the main unit. To remove hard dirt, scrub with a toothbrush and toothpaste, then clean with a soft, damp cloth.

2. Warning Do not use alcohol, gasoline, kerosene or other corrosive, volatile solvents to clean your scooter. These substances may damage the exterior and interior structure of the scooter body. It is forbidden to spray water on the scooter with a pressure water gun or hose. Before cleaning, make sure the scooter is powered off, the charging cable is unplugged, and the rubber cover of the charging port is closed. Otherwise, the electronic components or battery may be damaged.

3. Storage When the scooter is not in use, place it in a bright, dry place. Do not park the scooter outdoors, Sunlight exposure or extreme temperature conditions (too hot and too cold) will accelerate the deterioration of the plastic parts and may result in shorter battery life.

4. Battery removal and maintenance Do not use third-party batteries without permission, as this is a safety hazard. Do not store or charge the battery at temperatures beyond the specified limits (see specifications).

4. Specification table

Performance index	Project	Y600
Basic Parameters	Packing box size	1220*240*480MM
	wheel Size	10Inches
	Body Material	Al
	Maximum Load	264lbs(120KG)
	Vehicle weight	58.4lbs(26.5KG)
Main Parameters of the	Maximum Speed	28mph(45km/h)
Whole vehicle	Maximum Gradient	15°
	Mileage Range	43.5miles(70km)
	Working Temperature	-48-138°F(-5-45°C)
Battery Parameters	Rated Voltage	48V
	Battery Capacity	18.2AH
	Service Life	500 Times
Motor Parameters	Motor Power	600W
	Motor Type	Brushless Gear Motor
	Maximum Torque	28Nm
Charger Parameters	Input voltage	100-240V
	output voltage	54.6v
	output Current	2A

5. Instrumentation & Operation

5.1 Interface Description

5.2 Operating Instructions

5.2.1 Open the power lock and long press the power button for 2 seconds, the instrument light will be on to switch on, long press the power button for 2 seconds to switch off the instrument in the on state.
