MP3 format: 32kbps/128kbps
Default 512 kbpsWAV format recording

2. Recording segmentation: No segmentation can be set, with options of 30 minutes, 60 minutes, and 90 minutes. During the recording

---

process, the recording file is automatically saved according to the set time length.

3. **Voice control recording:** The voice control function can be set to be off or on.
The sensitivity of voice control is 1-7 poles. The larger the number, the smaller the decibel of sound detection, and the more sensitive the voice control effect. It is 4 by default.
Note: When "Enable voice control" is turned on, in the recording state, the product will automatically sense the surrounding sound. When the surrounding sound reaches a certain standard value, the product will automatically record. If the surrounding sound is below the standard value, the recording will be automatically suspended. It is not recommended to use this function in important circumstances.

4. **Recording gain:** Gain level in the range of 1-7. The larger the number, the louder the recording sound. It is 5 by default.

5. **Noise reduction recording:** Press OK to select "On" or "Off". After turning on the noise reduction function, audio will be recorded at a fixed bit rate of 512Kbps during recording.

6. **Recording monitoring:** Please insert the headset before enabling this function. After enabling the function, you can choose to turn it on or off. After enabling the function, you can use a headset to monitor the recording in real time.

7. **Timed recording**
Timed recording switch: on/off

Cycle: You can select a single cycle, daily, and press OK to confirm.

IX. System settings

Select the system settings menu on the main interface and press "OK" to enter the menu.

1. Time and Date: Set the system date and time.
Set time: When the interface appears, press "M" to select the hour or minute, press "+" or "-" to make adjustment, press "OK" to confirm, and long press "M" to return the interface.
Set Date: The interface displays the Year/Month/Day, press "M" to select the time or year/month/day, press "+" or "-" to make adjustment, press "OK" to confirm, and long press "M" to return the interface.

2. Language: Support languages such as Chinese, English, French, German, Portuguese, and Russian.

3. Screen saver time: There are four options to set the machine backlight time: 30 seconds, 20 seconds, 10 seconds, AOD (Always on Display).
