USER GUIDE

How to use the two buttons under your desk

1. Reset

- Press and hold the **+** and **-** buttons together for 3 seconds.
- The desk will lower to its lowest position. Keep holding both buttons until you hear 1 beep, indicating the desk has reset (3 beeps indicate an error).
- Release the buttons after the beep to complete the reset.

2. Adjusting Desk Height

- ***To Raise the Desk***
  Press and hold the **+** button. Release it when the desk reaches your desired height.
- ***To Lower the Desk***
  Press and hold the **-** button. Release it when the desk reaches your desired height.

3. Memory Function

- ***Save Memory Position 1:***
  - Adjust the desk to your preferred height.
  - Double-click the **+** button. The desk will beep to confirm.
  - Double-clicking the **+** button again will overwrite the previous setting.

- ***Save Memory Position 2:***
  - Adjust the desk to your preferred height.
  - Double-click the **-** button. The desk will beep to confirm.
  - Double-clicking the **-** button again will overwrite the previous setting.

- ***Recall Memory Positions:***
  - Press the **+** button once to move to Memory Position 1.
  - Press the **-** button once to move to Memory Position 2.

***** ***Note: The sensor and keypad cannot be used at the same time. The control box responds to only one at a time.***
