

**Water Pulsating Sprinkler**  
**Asperseur d'Eau Pulsant**  
**Aspersor de Agua Pulsante**  
**MOD: 300007**

## 1. IMPORTANT SAFEGUARDS

Read these instructions before use. If this product is passed to a third party, these instructions must be included.

When using the product, safety precautions should be followed to reduce the risk of injury, including:

- For outdoor use with cold water only.
- Do not use near electrical components.
- Check all parts before using the product. Do not use if parts are damaged.
- Operate in an upright position only.
- Do not modify the product.
- Turn the water off after each use.
- Do not use the product for any other purpose for which it was not intended.
- Do not operate at high water pressure, see Section 7.
- Do not leave water running or unsupervised.
- Do not expose the product to freezing temperatures with water remaining in the product.
- This product is not intended to handle drinking water.

**DANGER Risk of suffocation!** Please remove and keep packaging materials away from children and pets.

## 2. Intended Use

- \* This product is intended to water a lawn or garden patch.

## 3. Product Description

- A** Fixing nut to hose
- B** Range control
- C** Intake filter
- D** Base/Spike

## 4. Product Usage and Function

### CAUTION

**Risk of damage!** Please ensure the water supply does not exceed the maximum pressure.

- \* Position the sprinkler on the surface, making sure the Base is level and upright. Do not operate the sprinkler with a tilted Base.
- \* Attach the garden hose to the Fixing nut.

- \* Turn the water tap on. Water comes out the nozzle and the sprinkler head should start moving/pulsating.
- \* After use, turn off the water supply and disconnect the sprinkler from the hose.

### 4.1 Operating tips:

- \* Remove any obstructions which can interfere with the movement of the Sprinkler head.
- \* Water at cooler temperatures to minimize loss to evaporation, e.g. mornings.
- \* Water for a period of at least 30 minutes to obtain deep root moisture.
- \* Install a sediment filter to the garden hose to minimize clogging of the nozzles.
- \* Coverage is very important to maximize the use of the water and minimize loss of water on other surfaces, e.g. paved roads.
- \* Please study the shape and geometry of your lawn and choose the proper coverage settings. **See Section 4.2.**
- \* We suggest some initial observation of the working sprinkler to ensure coverage is satisfactory.
- \* Please check the Range controls every time before usage.
- \* After use, drain water from the product to extend the life of your sprinkler.

## 4.2 Adjusting the coverage/range.

The coverage is adjusted using the Range controls.

### Full coverage: full circle

### Partial coverage: 1/4 circle

### Partial coverage: 3/4 circle

### Partial coverage: 1/2 circle

## 4.3 Adjusting the spray pattern.

Use the Spray pin.

## 4.4 Adjusting the jet distance.

Use the Jet Distance Control.

## 5. Cleaning and Storage

### 5.1 General cleaning.

- \* To clean, wipe with a soft, damp cloth. Microfiber preferred.
- \* Never use gasoline, acetone, or any other corrosive chemicals. Never use metal brushes or sharp utensils to clean the sprinkler.

### 5.2 Storage.

- \* Drain water out of the product before storage.
- \* Avoid storing the product at conditions below 32°F.

### 5.3 Unclogging the nozzle.

- \* Use any cylindrical object 1/16" in diameter.

## 6. Frequently Asked Questions

Problem:	Solution:
The Sprinkler head moves very slowly	When the water pressure is too low, there is not enough flow to move the tube <ul style="list-style-type: none"><li>* Check for a partially open tap.</li><li>* Check for an obstruction in the hose, e.g. kink.</li><li>* Clean the Intake filter.</li></ul>
The Sprinkler head does not move	Remove any obstructions which could interfere with the operation of the tube <ul style="list-style-type: none"><li>* Check for water flow.</li></ul>
The spray patter is irregular	Remove any obstructions in the nozzles <ul style="list-style-type: none"><li>* Unclog the nozzle.</li><li>* Rinse the product.</li></ul>
The nozzle clogs frequently	<ul style="list-style-type: none"><li>* Install a sediment filter to the water supply.</li><li>* Replace the hose.</li><li>* Change water supply.</li></ul>

## 7. Specifications

Working pressure	20 – 100 psi	Storage temperature	33°F – 105°F
Flow rate	3.0 – 5.0 gal/min	Weight	18 oz
Operating temperature	33°F – 105°F	Dimensions (in)	8" x 5" x 5"
