INSTRUCTIONS FOR USE

Power button

Lever Buttons

Power button

Toggle the power switch to control the fan on/off. Upon powering on, the digital display shows the battery level for 3 seconds before switching to the speed level. Toggle to (—) for power on and to (O) for shutdown.

Lever Buttons

After powering on, push this button up to increase the speed level. Hold the button to continuously increase the level up to 100. Push this button down to decrease the speed level. Hold the button to continuously decrease the level down to 01.

Note: Each time the level is adjusted, the display shows the level for 3 seconds, then switches to display the battery level for 3 seconds, and then returns to showing the level. If there is no operation for 5 minutes, the screen will turn off.

Charging display

a. When the charging cable is connected, the digital display shows the current battery level, and the battery icon lights up (blinking). If there is no operation for 5 minutes, the battery level display turns off, and the charging icon continues to blink. Once fully charged, the charging icon stays lit.

INSTRUCTIONS FOR USE

b. When using while charging: after selecting a speed level, the display shows the level for 3 seconds, and the battery icon lights up (flashes). The display then returns to show the speed level. If no operation is performed for 5 minutes, the screen turns off, but the battery icon remains lit.

c. When the battery is low (below 10%), the red percentage icon flashes. During charging, the green icon flashes slowly, and when fully charged, it stays solid green.

01 / Make sure that the power cord is pulled out of the USB port when cleaning or products are not used for a long time.

02 / Forced or violent pulling of USB power cord may lead to wire damage. Please pinch the plug and unplug it.

03 / When wiring, please pay attention to the position to avoid trip up.

04 / Do not twist, heavy pressure, over-tightly winding or process USB power cord by yourself.

PROCEDURE FOR REMOVING BATTERIES

1. Pry off the back cover.

2. Remove the battery holder from the mainboard and take out the battery.

*The battery must be removed before disposing of the appliance; The appliance must be powered off when the battery is removed; Batteries should be disposed of safely.

Important: Save These Instructions For Future Reference

Safety Notes (Please read carefully and follow strictly)

○ This product uses lithium battery, on memory function, too much or too much will affect the use of the product. Life, please charge in time and disconnect the power after full charge.

○ Do not use a power supply with an output other than 5V = 1A, as it may cause overheating or malfunction, and in severe cases, could lead to fire.

○ When the fan is working, the blades rotate at a high speed. Do not put your fingers into the fan to avoid danger.

○ Do not disassemble parts without permission, which may lead to product failure or damage.

○ This product is not a children's toy, children under 14 years old, please use under the care of a guardian.

○ Avoid being subjected to huge vibrations or impacts during use, and avoid falling the product off from high altitudes.

○ This fan is not waterproof, please do not use it if water enters the fan.

○ The battery should not be disassembled, hit, crushed or put into fire. If severe bulging occurs, do not continue to use. Do not place in high temperature environment.
