How to connect with Google Home by "eWelink Smart Home"

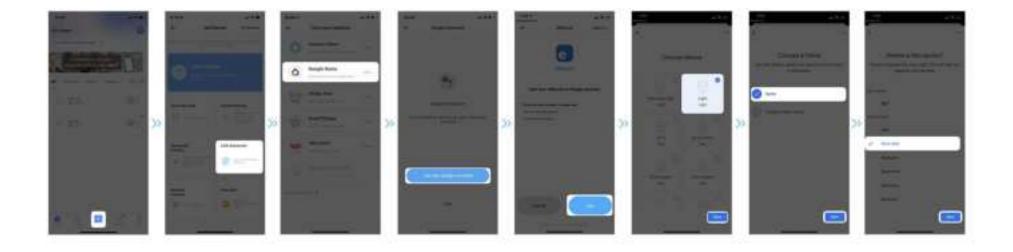

1. Sign up and log in your Google account and add your Google Home speaker.
2. Open eWelink app and log in to your account.
3. Tap the "⊞" button on the home page's button bar and select "Link Accounts" on the next page.
4. Choose "Google Home" from the list of third-party platforms, then select "Link" and "Link with Google Assistant"
5. Review the Notices section, then tap "Link" to proceed.
6. You will be taken to the Google Home app to select the eWelink devices you want to sync.
   Configure the devices' information, including which home they belong to and their location.
