ABUS ALARMBOX 2.0

Simple anti-theft device for a variety of uses

The ABUS AlarmBox 2.0 is a versatile and compact security device designed to protect your belongings from theft. Battery operated it is equipped to detect vibrations and movement. Once activated, it emits a loud 100dB alarm for 15 seconds if it senses continued movement, which helps alert you to potential theft.

AlarmBox 2.0 can be mounted to a wide range of items like bags, push bikes, camping equipment, gas bottles, BBQ's or anything that you would like protect. Once armed the Alarmbox detects movement & gives an audible warning if movement persists it triggers a 100dB alarm for 15 seconds, alerting the owner of potential theft.

Now available in 3 models, the AlarmBox 2.0, AlarmBox 2.0 with Cable & AlarmBox 2.0 with Chain.

*Know when your
valuables are moved!*

ABUS AlarmBox 2.0 ABUSAB

2-in-1 alarm & locking system

When a thief is on the prowl, they want to attract as little attention as possible. That's exactly where this portable alarm system can deter theft and alert you to issues.

Features:

- Alarm function with min. 100 dB for 15 seconds, followed by reactivation.
- 3D Position Detection - alarm system that detects vibrations and the smallest movements in all three dimensions and triggers the alarm.
- Smart alarm – the AlarmBox 2.0 only emits a small warning beep in the event of minor and brief vibrations.
- CR2 battery included and connection option for ABUS adapter chains and cables.

Curtis Warburton

Coast to Country Locksmiths | Caboolture, QLD

Please provide a short personal biography about yourself

I started my locksmithing journey at Noosa Lock Service in 2018 as a new apprentice. My next-door neighbour knew a locksmith looking for an apprentice, and I thought it would be a great fit for me.

After completing my apprenticeship in Noosa, I decided to start my own business in the Moreton Bay Region. It has been both challenging and rewarding, and I love being able to serve my local community.

I enjoy all aspects of locksmithing but specialise in residential and commercial services, including creating master key systems, hardware installations, and lock maintenance. The best part of my job is that every day is different, and I'm always faced with new challenges that keep me motivated.

What are some of the skills and abilities necessary for someone to succeed as a locksmith?

In my experience there are many skills required to becoming a locksmith. With such a large variety of tasks that clients need solutions for, a wide range of skills will help with keeping clients happy. Some of the abilities that I think are most important are:

- Problem-Solving Skills
- Attention to Detail
- Patience
- Customer Service Skills
- Integrity and Trustworthiness
- Time Management

What key issues do you think will affect the locksmith industry in the coming decade and how do you think these should be approached?

The key issues we often face & think are going to continue are:

1. **Dodgy Locksmiths and Mandatory licencing**
We are constantly hearing stories of people being scammed by "\$45 locksmiths" that quote a low price and then charge hundreds and even thousands for low quality work. This could be fixed by shutting down these false locksmiths and enforcing security licencing.
2. **Economic Factors**
The current economic environment is affecting consumer spending on locksmith services and security products.
3. **Consumer Awareness and Education**
There is a lack of consumer awareness about the importance of using a professional locksmith service. We are always trying to promote the locksmith trade at local events and on social media. We have found this is to be the best way to inform the public of our trade.

Tell us why you should be Australia's best young locksmith.

I consider my combination of technical expertise, a customer first approach, and big passion for the locksmithing community to be a great asset. I believe I express the potential of Australia's best young locksmith. I am excited about the future and look forward to continuing to serve my local community with quality security solutions & integrity.

SILCA AUTOMOTIVE RELEASES

NEW

**ADVANCED
DIAGNOSTICS**

SMART PRO BYPASS CABLES

TOYOTA - ADC2021 D756924AD

Certain late model Toyota vehicles feature enhanced security using a challenge-response code, known in the industry as 'TIS' (Technical Information System). This process involves extracting a challenge code from the vehicle and providing the correct response code, typically obtained through dealers or intermediaries like NASTF.

The ADC2021 cable bypasses the TIS code challenge by providing a direct, secure connection to the vehicle's Smart ECU and wiring loom, saving technicians time and eliminating ongoing intermediary fees.

- Applicable to BA platform with Texas Instruments & Hitag AES transponders, connecting directly to the Smart ECU and wiring loom.
- Bypasses TIS requirement, eliminating further intervention or spiking.
- Requires the ADC2015 emulator when all keys are lost.

SD756924AD

TOYOTA - ADC2018 D756295AD

On select Toyota vehicles an active alarm can prohibit key programming. Where a manual override of the alarm fails the ADC2018 cable bypasses the active alarm status and allows the complete execution of the key programming procedure. This is achieved by connecting direct to the Smart ECU and wiring loom.

- Bypasses Toyota active alarm where manual override has failed.
- Connects directly to the vehicle Smart ECU and wiring loom.
- No spiking of looms or further intervention required.

SD756295AD

Refer to release notes, CarLab & MYKEYS Pro for applications list & more.

SOFTWARE FOR RENAULT 2019 - ADS2287 (AD)

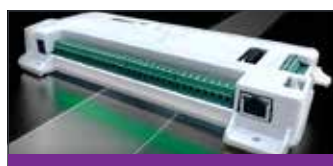

Advanced Diagnostics have released a comprehensive software update to the existing Renault software ADS2287. The update includes additional models and enhances the programming procedure across both bladed and proximity key models. Additionally, the software now has the ability to recover the UCH where data files have become corrupted.

SMART PRO REGION SELECTION

Hone-in to the right vehicle software

TECH TIP

The Advanced-Diagnostics SMART Pro is a global tool with an extensive vehicle selection menu covering nearly every region and vehicle version.

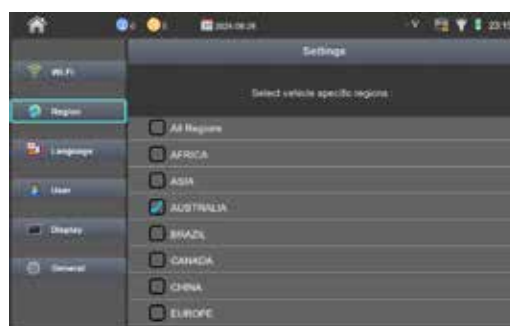

Different regions require specific software for successful communication and programming. A vehicle with the same name may have various software versions depending on the market.

The SMART Pro allows you to filter vehicle options to those relevant to your market. The Australia-specific menu, curated by the local LSC Tech Support team, is recommended to save time onsite.

The default setting displays all regions and options. It's advisable to set SMART Pro to display only Australia. With the Australian-specific menu, the device becomes more streamlined and easier to navigate.

From the home screen select > Settings > Region. If "All regions" are currently set, deselect this, and re-tick "Australia" by itself.

If another region needs to be accessed, tap the "Filtered" button in the vehicle menus to temporarily display other regions. It will revert to Australia after use.

Cable Runners Rec. Retain

Electric Strikes

The Duprin electric strikes provide the advantage of remote unlocking and locking of doors. They are designed for use with exit devices and most cylindrical, disc, and pin lock sets. The locking components and housing are precision machined to insure proper alignment and smooth operation.

For further information see the Duprin brochure or visit our website.

P.O.A.

Electric Power Transfer Hinges

The EPT-210 is required for a Von Duprin LS-2000 exit device. The hinge is made of stainless steel and is designed to transfer power from the door to the lock. The hinge is made of stainless steel and is designed to transfer power from the door to the lock.

For further information see the Duprin brochure or visit our website.

P.O.A.

Magnetic Locks

The magnetic lock is a device that uses a magnet to hold a door closed. It is made of stainless steel and is designed to transfer power from the door to the lock.

For further information see the Duprin brochure or visit our website.

P.O.A.

THE KEY TO COMBINED ELECTRONIC & MECHANICAL SECURITY

Combines your ABUS 14 key system with the flexibility of the SALTO wire-free locks and the power of the Protege WX integrated access control system.

LSC MONTHLY NEWS

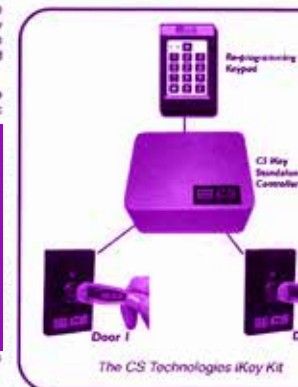

LOCKSMITHING SUPPLY COMPANY

September 2005

ELECTRONIC RESTRICTED KEY SYSTEMS

The fastest growth sector of our industry over the next ten years will be access control. LSC has watched the market for access control grow over the past few years, and we haven't been sitting still – we've been searching for the right companies to bring access control products and solutions to our customers.

With this in mind, we are pleased to announce that LSC is now the distributor to the locksmithing industry for CS Technologies electronic restricted key systems.

JOURNEY OF ELECTRONIC SECURITY

AUSTRALIAN MANUFACTURERS OF SCHLAGE LOCKS

PRICE LIST No. 3
21st MAY 1986

RESIDENTIAL

In the early 2000's, Mark Johnson returned from a trip to America and shared the news that locksmiths in the USA were getting into "Electronic Security".

While LSC had sold electric strikes since the 1980's, there wasn't really a focus within the suppliers or the industry – that would soon change.

Locksmiths might have been exposed to a form of electronic security in the early 1990's by programming of car keys to Commodore vehicles, but there was an end-user ahead of the time and it was hotels. Locksmiths had often been asked to install Unican or Vingcard hotel locks that utilised a magnetic stripe. These were popular from the late 1980's and through until recent times.

Dabbling in Electronic Security was pretty specialised, but local producers like CS-Technologies which was formed in 1987 helped interested customers get into the business. CS-Technologies were innovative, made quality products and were ahead of the pack. They featured on ABC's Beyond 2000 show in 1996 with a segment showing their i-button.

LSC seriously started looking for products our customers could offer from the early to mid 2000's.

In 2004 things started to ramp up, and we were offering IEI locks and

keypads. The "LS" series of locks were quite popular and reliable.

Keypads less so. We offered the Keri Systems "Intelliprox 2000" single door controller with 500 users.

We were offering the CS-Technologies stand-alone 'plug-and-play' single and dual door controllers with the Dallas "i-button" credentials. Locksmiths liked them because they incorporated an installer code, allowing them to offer a similar level of security around replacement credentials to what they were used to with mechanical key systems.

Early training focused less on security concepts, and much more around wiring – how to make good connections, paying attention to colours and connector types, and which kind of wire to use for what job.

We started selling the Presco PAC1 controllers from local company NIDAC. Founded in 1966, they'd become famous for door beepers (the "Nichols Electronic Eye doorway alarm" to give it the proper name). Locally designed and made, it was innovative and ahead of it's time.

An early driver within LSC who could see the future was our own Ian Ross, and we appointed him as Product Manager for "Access Control" systems in August 2005.

Many customers will remember Ian's passion for "Electronic Access

KERI SYSTEMS
IntelliProx2000

IntelliProx2000 is an economical, feature packed proximity type access control system which is easy to use, easy to set up, and easy to sell.

LSC have sourced this system specifically to match the needs of locksmiths. The system is small enough to be easy to use, and large enough to grow or integrate with other systems when required.

THE IEI LS SERIES

IEI LS Series Locksets are flexible and easy to use!

The IEI LS Series locksets have been designed as a stand alone, keypad programmable lockset, which have some unique and interesting features, which make them ideal for use in conjunction with larger access control systems.

There are 3 general models in the range and all 3 models share these great features:

- Non-volatile memory (batteries charge and store programming without data loss)
- Non-flashed and easy to install
- Popular PC style cylinder (SG1) plug allows compatibility with rekeyed systems
- Unique wire technology means for ease of installation, and ensures wires to not get pinched
- Highly durable braided encoiled keypad
- Service codes allow single entries
- Two-stage low battery alarm
- Multifunction key controls
- Over 100,000 openings from 4 x AA batteries

Model LSS: has all of the features described above, and allows 120 users

Model LSE: has all of the features described above, but with 8000 users, and 2000 events logged in the audit trail. LSE also features infra-red programming of the user codes, via the use of a Palm Pilot (not included) and IEI's HUBMaster Professional software which is FREE. Using this software, you can sit at your desk and set up the users

IEI "ILM" Series Narrow Profile Keypads

Need a keypad for a shopfront or aluminium framed door? The IEI "ILM" Series narrow profile

MICROLOCK

MicroLock electric door strike with a combined access control keypad and iButton reader, a small in-built battery. Installation is extremely simple. External cabling and

• be installed in new and existing swing door frames. The MicroLock can be used with a dead latch complete with levers or pull handles.

• individual offices, serviced office, business centres, common entries office, home and computer rooms, electrical and telecommunications cupboards, storerooms, storage lock (with time delay option).

Locksmiths' Supply Company

- stand alone door levers
- stand alone door latches
- stand alone door bolts
- stand alone door locks
- stand alone door handles
- stand alone door pulls
- stand alone door knobs
- stand alone door levers
- stand alone door latches
- stand alone door bolts
- stand alone door locks

Control" as we soon renamed it to, and this aligned well with the locksmith's traditional business – historically they gave access via mechanical means. With EAC, the door opened to adding time zones, audit trails and upgraded security with electronics.

By 2010 we were offering CCTV from ABUS. The quality was very good, and it opened the door for locksmiths. Prior to ABUS, lots of locksmiths didn't know where to start, their retail ready offerings, and simple startup packs helped many customers dip that first toe into the water. In 2012 we launched the Microlatch product, and this became very popular, with locksmiths in all states embracing the ease of install. CS Technologies continued to sell well and continued integration development kept the product relevant.

In this same year we started selling SALTO, only 10 years after the company was founded close to San Sebastian in Spain. For many customers, SALTO turbocharged their entry and adoption of Electronic Security products, as doors didn't need wiring back to a controller – everything was contained on the door. Sophistication of use, and ease of programming made the brand a favourite. The first customers were all locksmiths.

In 2013 we launched the "Electronic Security" Showbus, featuring ICT, SALTO, ABUS and STI amongst others. Travelling to all states, we showed

locksmiths how upskilling could boost their businesses, and gave them new levels of security and convenience to sell to their customers.

More recently, we've launched the Neptune brand of security products, featuring quality accessories and basic controllers. These, added to our vast range of strikes, mag locks, electric mortice locks, along with cable and power products mean LSC is a true one-stop-shop for your electronic security projects.

We're bringing locksmiths a better alarm brand than ever before, with market leading RISCO now available from LSC in easy-to-use kits, or in separate components.

Customers can now upskill themselves online, with our dedicated TechEd training portal now hosting sophisticated online learning content covering CCTV, Intrusion, Access and deterrence topics.

The future for electronic locking and electronic security products is bright. With consumers now looking for Smart Home products, and with locking high on the wish list, no other segment is poised to benefit from the next big 'thing' in Security than locksmiths.

The *Lockwood* Story

Lockwood's legacy spans over 90 years, marked by excellence, innovation, and customer satisfaction. Renowned for its quality and reliability, Lockwood has earned the trust and loyalty of generations, becoming a symbol of durability in the industry, and continues to lead with cutting-edge products and service.

SALTO CREDENTIALS

Salto Advises Transition to MIFARE DESfire® for Enhanced Security

Salto Systems has issued a credentials security advisory urging clients and partners to switch from MIFARE Classic® to the more secure MIFARE DESfire® technology. This recommendation addresses recent developments that make cloning non-secure credentials, like MIFARE Classic®, easier.

Adopting MIFARE DESfire® is crucial for maintaining high security standards in access management systems and protecting valuable assets. To facilitate this transition, Salto has introduced a cost-effective 2K version of DESfire credentials through LSC.

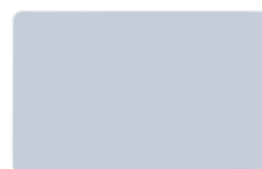

Salto also advises updating lock firmware to counteract emerging cloning tools and attack vectors. While this update may not resolve all MIFARE Classic® security issues, it will help reduce new vulnerabilities.

For more information, please contact your local account manager.

INTERNATIONAL VISITORS | MLAA NATIONAL CONFERENCE 2024

Sebastian Rothe

Before he started his career at ABUS in 2000, Sebastian spent one year abroad, including half a year in Australia. During this time, he fell in love with this beautiful region, hoping he would one day work in or for this area. Sebastian, now ABUS Export Manager, has been with the company for over 22 years, making valuable contributions and playing a key role in the company's success.

Matthew Wise

Matthew, an Australian native living in Stockholm, joined ABUS in 2001 where he worked in the Mobile Security department until 2013, rejoining in 2023 as Asia Pacific Area Sales Manager. With 20+ years in export sales & product management, he's eager to collaborate with AUS & NZ customers & team LSC. Matthew obviously speaks fluent English, but looks forward to brushing up on his Australian!

Fabian Mayer

After successfully graduating with a Master's degree in Sales Engineering and Product Management, Fabian worked in the lighting industry on a number of exciting projects in the smart building sector and logistics industries, focusing on innovation and technological integration. Fabian joined ABUS in 2021 as a Product Manager for digitalisation projects for their padlocks.

Alessandro Faraon

Alessandro began his career at Silca, Italy, in 2003, holding roles in Service, Product Management, and Market Development for the Far East. After the acquisition of Advanced Diagnostics, he spent three years in the UK as Global Automotive Product Manager. Since 2019, he's been Area Sales Manager for Middle East, Africa, and APAC, supporting LSC in helping develop the market for keys, machines, and auto devices.

CELEBRATE NATIONAL FAMILY BUSINESS DAY

As a proud family-owned business for nearly 100 years, we are thrilled to celebrate National Family Business Day on 19 September 2024. This special day honours the essential role that family businesses like ours play in driving innovation, creating jobs, and fostering a sense of community in AUS & NZ. Our legacy is built on dedication, hard work, and a deep commitment to our customers and community. We invite you to support, choose, and celebrate family businesses — today, and every day.

SHOWROOM SHOWCASE: CELEBRATING LOCKWOOD 90 YEARS

Our branches are transforming their showrooms to showcase Lockwood's remarkable products and rich history. As the premier destination for security professionals, we take pride in our longstanding partnership with Lockwood.

TERMS & CONDITIONS
Product features and pricing in this newsletter are subject to change without notice. Special promotional prices advertised here are for the month the newsletter has been published. However, some offers may commence on or extend beyond the promotional period. Most products have been photographed in-house and are identical to what you will receive. Information presented in this newsletter has been checked and is believed to be correct at the time of printing, however, errors and omissions may occur. LSC can not guarantee prices, specifications, or features of products that may change after printing.
