## FEATURES & SPECIFICATIONS

**INTENDED USE** — Lithonia Linear is a suspended linear fixture designed for open, mixed, grid, or hard surface applications. The perfect blend of configurability and simplicity - Lithonia Linear is perfect for contractors, design builders, architects and specifiers for use in almost any application including open ceilings, retail, office, hospitality, education, healthcare, and transportation.

**CONSTRUCTION** — Lithonia Linear is built on an extruded aluminum chassis for the perfect blend of strength, weight, and thermal performance. The power modules/ end caps are made of injections molded plastic and lens is constructed of polycarbonate.

**OPTICS** — Lithonia Linear utilizes a frosted polycarbonate diffuser which provides an optimal 13% uplight to prevent a dark ceiling effect without reducing overall fixture efficiency.

**CONTROLS** — **Integrated Sensor (nLight® Wired Networking):** This sensor is nLight-enabled, meaning it has the ability to communicate over an nLight network. When wired, using CAT-5 cabling, with other nLight-enabled sensors, power packs, or WallPods, an nLight control zone is created. Once linked to a Gateway, directly or via a Bridge, the zone becomes capable of remote status monitoring and control via SensorView software.

**Integrated Smart Sensor (nLight Air Wireless Platform):** The RES7 sensor is nLight AIR enabled, meaning it has the ability to communicate over the wireless nLight control platform. It is available with an automatic dimming photocell, and either a digital PIR or a microphonics (PDT) dual technology occupancy sensor. It pairs to other luminaires and wall switches through our mobile app, CLAIRITY+, which allows for simple sensor adjustment

**Integrated Wireless Sensor (single room control):** Sensor Switch™ VPIR or VAPIR luminaire-embedded occupancy and ambient light sensor allows the luminaire to power off when the space is unoccupied or when enough ambient light is entering the space.

**INSTALLATION** — Lithonia Linear is designed to be extremely easy to install in multiple applications. Adjustable mounting points and aircraft cable make it easy to order, without knowing exact layouts and mounting points ahead of time. Just by determining if you have an open ceiling or T-grid style ceiling, you can order everything you need for a hassle-free installation. All power cords are factory installed and suspension hardware is included with each luminaire. We have taken the guesswork out of what you need for the installation.

**LISTINGS** — UL certified to US and Canadian safety standards. Damp location listed. IP5X Option. DesignLights Consortium® (DLC) qualified product. Not all versions of this product may be DLC qualified. Please check the DLC Qualified Products List at [www.designlights.org/QPL](http://www.designlights.org/QPL) to confirm which versions are qualified.

**WARRANTY** — 5-year limited warranty. This is the only warranty provided and no other statements in this specification sheet create any warranty of any kind. All other express and implied warranties are disclaimed. Complete warranty terms located at: [www.acuitybrands.com/support/warranty/terms-and-conditions](http://www.acuitybrands.com/support/warranty/terms-and-conditions)

**Note:** Actual performance may differ as a result of end-user environment and application.

All values are design or typical values, measured under laboratory conditions at 25 °C.

Specifications subject to change without notice.

**MOUNTING HARDWARE** — Mounting hardware included and optional replacement parts table on page 3.

		APDT	Occ sensor dual tech (passive infrared & microphonics) and auto dimming photocell
		VPIR	Vertex passive Infrared OCC sensor with on/off photocell
		VAPIR	Vertex passive Infrared Occ sensor with auto-dimming photocell
SSAIR	Wireless standalone embedded control by SensorSwitch. ‡	(blank)	No sensor, Control Input function only
		VAPIR	Vertex passive Infrared Occ sensor with auto-dimming photocell

End Cap Options (When ordering EPD. See page 5 with configuration examples. Aesthetic pieces only)		Options	
(Blank)	Center Power Drop	IP5X	Gasketing to meet IP5X rating ‡
DEC	Decorative End Cap	NLG	No Lithonia Logo
DEM	Decorative End Module		

NOTE: ‡ Indicates option chosen has ordering restrictions or note. Please reference ordering notes chart. Options are sorted alphanumerically.

‡ Ordering Notes/ Restrictions	
Option value	Restriction
LL16	LL16 EPD ordered with controls must be EZCR. LL16 CPD ordered with NLTAIR, SSE/SSAIR can be ordered with EZCB and EZCR. If ordering NLIGHT, NLIGHTER, NLIGHTLM, NLIGHTERLM must be EZCR.
Lumens	Nominal lumen output.
CPD, EPD	CPD comes with (DEC) decorative end caps. CPD is not available in LL4. EPD ships with choice of decorative end caps (DEC) or decorative module (DEM). LL16 EPD ships with decorative module (DEM).
MIN1	Only available with nLight, nLight Air and EldoLED.
ZT	Not available with MIN1, Controls or EM, 347V.
ZTR	Generic driver available with with 347V, EM or GTD. Not available with MIN1 and controls
SLD	Only available with remote box driver. Not available with controls, 347V or MIN1.
EZCR	When ordering EZCR luminaire, two cords will run from the remote driver box to the power module on the fixture.
EZTB, EZCB	Not available with EM or 347V. EZTB not available with any Control options.
347	Must be remote driver box mounted. Not available with Emergency, GTD or ZT, EZTB, EZCB.
IE10WCP, IE10WCPHE, IE7WCPHE GTD	Not available with 347. Must be remote mounted – EZTR, EZCR, ZTR. Not available with ZT.
Mounting Type/ Overall Suspension	All mounting/suspension cable and hardware included. Refer to the Mounting/Suspension Hardware Included Key on page 3 for the number of suspension drops and power feed(s).
Finish	Metal components painted after fabrication.
NLTAIR2	Can be used as a normal power sensing device for nLight AIR devices and luminaires with EM emergency options. EZCR or EZCB must be chosen. Not available with MIN10.
NLTAIREM2	See UL924 Sequence of Operation. Leave Sensor option group blank, not available with APIR, APDT, APIREM and APDTEM. EZCR or EZCB must be chosen. Not available with MIN10.
NLIGHT, NLIGHTER, NLIGHTLM, NLIGHTLERM	Must be remote box mounted EZCR. Not available with MIN10.
SSAIR	Only available with EZCR and EZCB.
IP5X	Gasketing for the driver enclosure to meet IP5X. Only available with ZT.

## Performance You Can Count On

SensorSwitch™ offers standalone wired and wireless lighting controls solutions designed for room-based applications. Our products offer reliable performance and ease of installation.

[Sensorswitch.com](http://Sensorswitch.com)

### Wired Embedded Controls

### Wireless Embedded Controls

### Single Lighting Controls Platform for Indoor & Outdoor Spaces

nLIGHT® is your networked lighting controls platform, for indoor and outdoor applications, providing wired or wireless options. Scaling from room to campus-wide applications, it is the one platform that grows with your business today and tomorrow; to seamlessly address energy cost optimization, building code compliance, improved occupant comfort, and much more. nLIGHT also interfaces with DALI®, BACnet®, DMX and additional third-party devices.

**nLIGHTcontrols.com**

#### Wired Embedded Controls

1. Install the luminaires with embedded controls
2. Install the nLight Wired wall switch.
3. Connect the luminaires using standard CAT-5e cables and the controls devices will automatically discover each other and work (plug and play).

#### Wireless Embedded Controls

1. Install the luminaires with embedded controls
2. Install the nLight AIR battery-powered wall switch
3. Use CLAIRITY + mobile app to pair the fixture with the wall switch and is desired, customize the sensor settings
