

# SET UP WEBMAIL through the Apple iPhone

1. Tap Settings, then Passwords and Accounts.
2. Select Add Account.
3. Choose Other, then Add Mail Account.
4. Enter your Name, Email (full address), Password and Description (recommended if you have multiple emails), then tap Next.
5. Select IMAP at the top of the screen.
6. Enter the following under Incoming Mail Server:
  - A. Host Name: `webmail.arvig.net`
  - B. Username: full email address
  - C. Password: your email password
7. Enter the following under Outgoing Mail Server:
  - D. Host Name: `webmail.arvig.net`
  - E. Username: full email address
  - F. Password: your email password
8. Tap Next, then close Settings.
9. Open the Mail app and pull/swipe down on the screen to refresh and check for mail.
