Installation example

Type IDH

Induction unit for ceiling installation, with one-way or two-way air discharge, vertical heat exchanger and condensate drip tray

Induction unit for heating and cooling, with 2-pipe heat exchanger, for freely suspended installation in large internal spaces, e.g. exhibition or production halls. The condensate drip tray is useful if the temperature temporarily falls below the dew point.

- Very high heating capacity and cooling capacity (up to 27 kW) when installed at a height of 8 to 25 m
- High comfort levels due to low airflow velocity in the occupied zone
- Non-combustible nozzles made of aluminium
- Motorised damper blade allows for precise setting of air discharge direction
- Heat exchanger with plain Cu pipe (Ø22 mm) for the water connection

Optional equipment and accessories

- Control system
- One-way or two-way air discharge
- Powder coating in many different colours, e.g. RAL CLASSIC
