## AUTOMATIC POURING DUST FROM DUST CONTAINER

There is a bag in the construction of the charging station into which the robot automatically removes dirt from the dust container every time it returns to the station or at intervals that you choose in the application. **The capacity of the bag will last you up to 2 months of regular cleaning.** As soon as the bag is full, the robot will alert you to the need to replace it.

## CYCLONE POWER

The bagless vacuum cleaner is equipped with a highly efficient ECO motor with a power of 800 W, which has sufficient power for perfect cleaning of the entire household. The cyclone system consists of centrifugal force acting on the impurities during the rotation of the exhaust air and their subsequent centrifugation in a collecting container. The main advantage of cyclone vacuum cleaners is the absence of bags and their constant power when vacuuming. In addition, there is no swirling of dust during cleaning. The washable HEPA filter 13 captures even the finest dust particles, so it is also suitable for allergic people and asthmatics.

## PET BRUSH – HAIR SPECIALIST

The basic equipment also includes a smartly designed attachment for the gentle treatment of your pet's skin and fur. The main advantage is that you can comb and vacuum all excess hair without unnecessary clutter in one move.
