Product Information

BladeRunner™ Belt Types	A1-A3
Special Application Belts	A4-A5
Industrial Belts	A6-A7
Belt Tools, Display	A7-A8

Index by Manufacturer & Equipment Type	B1-B13

Belt Application Alphabetical Listings for:

Walk-Behind Mowers	1-45
Riding Mowers	46-232
Compact Tractors	233-235
Snow Blowers	236-256
Tillers	257-293
Edgers, Trimmers, Brush Cutters	294-299
Blowers, Vacuums, Chippers, Shredders	300-302
Lawn Equipment	303-311
Lawn Attachments	312-344

Manufacturers' Part Numbers	345-410

Belt Dimensions	411-424

Competitive Changeover	425-449

WARNING

Be safe! Do not use Gates belts, pulleys or sprockets on any aircraft propeller or rotor drive systems or in-flight accessory drives. Those Gates products are not designed or intended for aircraft use.

CAUTION

Use Gates products only on applications specified in Gates literature. Install and maintain products according to the vehicle manufacturers' recommended procedures and with recommended tools. Failure to follow these instructions could result in injury or property damage. Gates disclaims all liability due to failure to follow these instructions.

LIMITED WARRANTY FOR THE LIFE OF THE MERCHANDISE

Merchandise is warranted to be free from defects in material or workmanship for the life of the merchandise. Damages from misuse, abuse or gradual wear from normal use are excluded from this warranty. Gates Corporation will, at its option, replace or repair any merchandise proved defective in material or workmanship, or both, during the warranty period. This is the exclusive remedy. For warranty service, please contact the Service Department, Gates Corporation, 1551 Wewatta Street, Denver, Colorado 80202. THERE IS NO OTHER EXPRESS WARRANTY. IMPLIED WARRANTIES, INCLUDING THOSE OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO THE EXPRESS WARRANTY PERIOD. LIABILITY FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES UNDER ANY AND ALL WARRANTIES ARE EXCLUDED TO THE EXTENT EXCLUSION IS PERMITTED BY LAW. Some states do not allow the exclusion or limitation of incidental or consequential damages, and some states do not allow limitations on how long an implied warranty lasts, so the above limitation and exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights, which vary from state to state.

This publication contains the latest information available to our engineers. If you require additional application or part number information, contact the Automotive Product Application Tech Line at 303-744-5651.

BladeRunner™

OE Fit belts...

When only the best will do!

- OEM Fit
- OEM Construction
- More Value & Longer Life
- 7 Belt Types
- 25 OE Manufacturers'

Built to withstand the rigorous start and stop operation of lawn and garden equipment. Many of the applications in this catalog currently use a fractional horsepower belt as a replacement. Although these fractional horsepower belts do work on these on these applications, their performance is not that of an OE equivalent, such as the BladeRunner™. Using a BladeRunner™ belt reduces costly downtime and labor associated with replacing a belt.

Along with TruFlex® and heavy-duty PowerRated® belts, BladeRunner™ Exact OE Fit lawn and garden belts provide the highest quality and best coverage in the lawn, garden and farm market.

Don't settle for less than the best, BladeRunner™ exact OE fit lawn and garden belts!

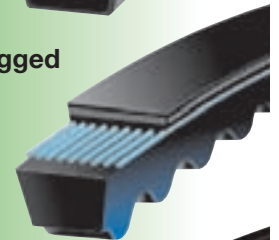

Wrapped

Raw Edge

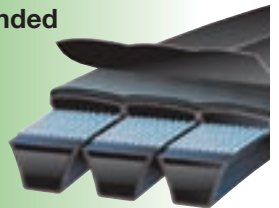

Cogged

Double-V

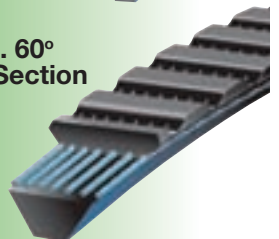

Banded

Ribbed

Ind. 60°
M Section

BladeRunner™ belts offer an exact OE replacement for seven different styles of belts. Here are some of the features and benefits for each of these different types:

Wrapped

- Superior resistance to oil, heat, ozone, sunlight and weather.
- Concave sidewalls assure full contact with sheave sides and uniform wear distribution for increased belt life.
- Arched top provides superior strength to prevent dishing.
- Tensile members carry load evenly relieving internal stress.
- Flex-Weave® cover.
- Superior performance on clutching and backside idler drives.
- Exact OEM fit and construction.

Raw Edge

- Special tensile cords are treated with a material that bonds the cords with the surrounding rubber.
- Meets or exceeds RMA standards for static conductivity.
- Exact OEM fit and construction.

Cogged

- Cog matrix design improves flex fatigue and wear resistance.
- Meets or exceeds RMA standards for static conductivity.
- Special tensile cords are treated with a material that bonds the cords with surrounding rubber.
- Exact OEM fit and construction.

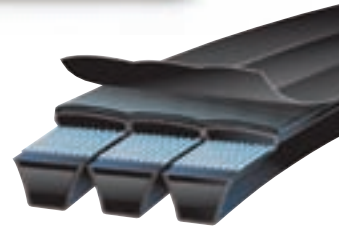

Double-V

- Oil and heat resistant.
- Unique design for reduced bending and maintaining maximum sidewall contact.
- Static conductive.
- Flex-bonded cords.
- Transmits power on both sides of the belt.
- Exact OEM fit and construction.

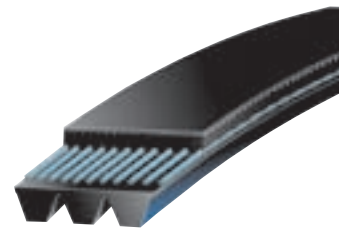

Banded

- Oil and heat resistant.
- Static conductive.
- Flex-bonded cords.
- High stability with no belt twisting.
- Exact OEM fit and construction.

Ribbed

- Oil and heat resistant.
- High modulus, low stretch tensile member.
- Static conductive.
- Fiber-reinforced ribs.
- Truncated (shortened) rib profile.
- Up to 80% higher horsepower capacity than RMA standards.
- Small drive package.
- Smooth running.
- High-speed power transmission.
- Exact OEM fit and construction.

Industrial 60° M Section

- Lateral rigidity.
- High-speed power transmission.
- Low vibration.
- Smooth running.
- Fatigue and wear resistant.
- Exact OEM fit and construction.

PowerRated® V-Belts

Patented Flex-Weave® cover
and aramid fiber construction
combine to provide:

- ✓ Smooth clutching operation
- ✓ Length stability not found in standard fractional horsepower V-belts
- ✓ Quiet operation
- ✓ Heat, oil and crack resistance

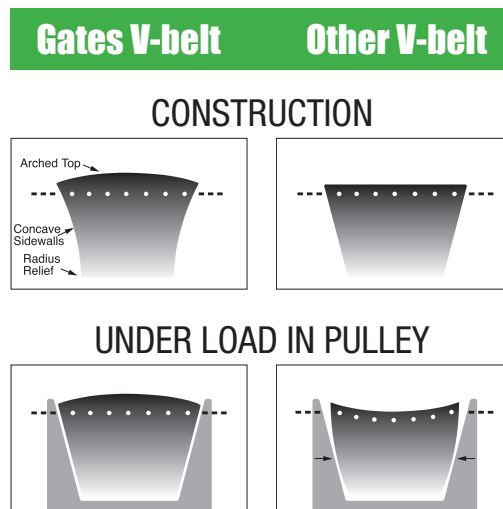

Plus...we've got some great curves!

Pictured below are two significantly different V-belts. The Gates belt has the exclusive “Curve” feature; the other brand does not. V-belts change shape when running in a sheave. Gates’ patented curves maximize belt life by adjusting to fit the pulley correctly.

The Arched Top provides superior strength to prevent “dishing.” As a result, the tensile members work as a team to carry the load evenly, relieving internal stress.

Concave Sidewalls assure full contact with sheave sides. Wear is distributed uniformly for increased belt life.

Radius Relief reduces corner wear, working in conjunction with the concave sidewalls to assure proper support which results in uniform tensile loading.

Special Application Belts

BladeRunner™ V-Belts

An aftermarket belt designed and appicated to specific unique applications providing exact OEM fit, construction, and performance of leading lawn and garden equipment manufacturers. Built to withstand the rigorous start and stop operation of outdoor power equipment.

- Meets or exceeds the performance of each specific application.
- Utilizes Aramid cord construction in most cases.
- Smooth operation during frequent and severe shock loads.
- Reduces costly downtime and labor associated with replacing a belt.
- Superior performance over fractional horsepower belts on recommended applications.

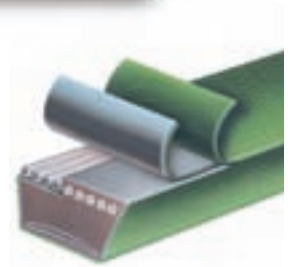

PoweRated® V-Belts

Design-engineered to handle virtually any utility application, no matter how demanding or what the conditions are. PoweRated belts transmit more horse-power than conventional utility belts... up to 17 horsepower. Gives outstanding performance on drives with backside idlers.

- Reinforced with aramid tensile cord, pound for pound stronger than steel.
- Green Flex-Weave® cover resists heat, oil and cracking.
- Superior performance on clutching and backside idler drives.

NOTE: PoweRated V-Belts can be substituted for equivalent sizes of Tru-flex V-Belts.

NOTE: For dimensions, see size list section.

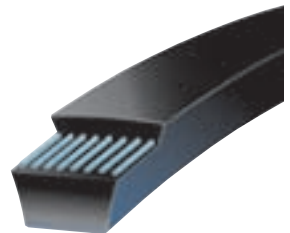

Truflex® V-Belts

Recommended for lower horsepower lawn and garden equipment, heating and home air conditioning drives, light-duty appliances, shop and miscellaneous fractional horsepower applications.

- "Universal Construction" features cord placement that combines with oil and heat-resistant Flex-Weave® cover to provide smooth, quiet operation with reduced vibration.
- Concave sides fill out to make even contact with the sides of the sheave grooves to distribute wear uniformly.
- Oil and heat resistant. Also resists ozone, weather and many chemicals and detergents.
- Meets or exceeds RMA standards for static conductivity.

NOTE: Do not use on clutching drives and applications where PoweRated belts are recommended. (Product Type 8400)

NOTE: For dimensions, see size list section.

Industrial Belts

Hi-Power® II V-Belts

Designed to give long, dependable service and superior performance on heavy-duty A, B, C, D and E Section single or multiple V-belt drives.

- Composite multi-purpose construction reduces flex fatigue.
- Superior resistance to oil, heat, ozone, sunlight, weather.
- Meets Rubber Manufacturer's Association tests for static conductivity.
- Superior length stability means less tensioning and takeup during service.

NOTE: For dimensions, see size list section.

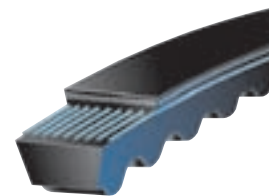

Tri-Power® Belts

Constructed to provide superior performance on the toughest heavy-duty A, B and C Section industrial drives. Carry a higher horsepower rating than conventional cross section belts. Ideal for drives with smaller diameter sheaves (where conventional A, B and C Section belts are not recommended).

- Vextra construction.
- Special molded notch reduces bending stresses, especially on drives with smaller diameter sheaves.
- Tough tensile members for superior resistance to fatigue and shock loads.
- Bandless cut edge for even wedging action and uniform fit.
- Meets or exceeds Rubber Manufacturer's Association tests for static conductivity.

NOTE: For dimensions, see size list section.

Super HC® and Super HC Molded Notch V-Belts

Recommended for use on special drives where space and weight limitations are critical. Belts can transmit up to three times the horsepower of conventional V-belts in the space drive space. In many cases, they can replace high maintenance chain and gear drives.

- Vextra construction.
- Reduce weight and overhung load on bearings.
- Sheaves can be smaller in diameter and operate at belt speeds up to 6,500 fpm without dynamic balancing.
- Special material that resists oil, heat, sunlight, ozone, weathering and aging.
- Special tensile cords treated with a material that bonds with the cords and surrounding rubber.
- Meets or exceeds RMA standards for static conductivity.

NOTE: For dimensions, see size list section.

Industrial Belts

Industrial Micro-V® Belts (J, L and M Series)

Specially designed to replace OE belts on extra heavy applications such as machine tools, compressors, pumping equipment and other industrial equipment requiring V-ribbed belts.

- Exclusive Gates truncated belt design offers up to 80% higher horsepower capacity than RMA standards.
- Increased flexibility, reduced heat buildup permit extra high speeds on smaller diameter sheaves.
- Highly resistant to oil, heat and other adverse conditions.
- Less sensitive to debris in sheave groove.
- Meets or exceeds RMA standards for static conductivity.
- Energy efficient.
- Runs cooler than conventional belts.
- High power density.

(Product Type 9171, 9173 and 9174)

NOTE: For dimensions, see size list section.

Truflex® and PoweRated® Belt Length Finder

(Part No. 91104)

Improved belt length finder measures FHP belts up to 107" to determine equivalent Truflex or PoweRated belt numbers.

- Instructions for using Finder packed with unit.
- Packaging: Individually cartoned.

Krikit V-Belt Tension Gauge

(Part No. 91107. Charge Item.)

Permits user to tension belts during installation, while engine is shut off. This is important to belt life and performance. Easy to use.

- Instructions packed with product.
- Scale reads in pounds and kilograms. Measures tension from 30 to 160 lbs., and 15 to 75 kg.
- Die-cast aluminum body, nylon indicator Arm and Pressure Pad.
- Fits in pocket like a pen. Has stainless steel pocket clip.

Packaging: Individually boxed.

NOTE: Not for use on timing belts.

Industrial Belts

PoweRated "70" Belt Merchandiser

(Part No. 91230)

(Part No. 91234 - Display unit without belts - Charge Item)

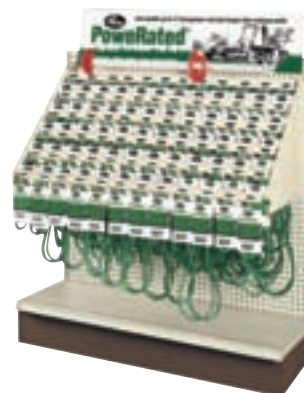

Eye-appealing merchandiser encourages self-service retailing.

Takes up approximately 4 feet of gondola space.

Provides 78% coverage on applications in the 3 to 17 horsepower range.

- Belt measuring device makes it easy to select the correct replacement belt.
- Complete application catalog also furnished.
- Six 4 ft. metal racks.
- Belt number tags.
- 4 ft. header sign.
- One each in the top 70 sizes included.

NOTE: Pegboard and gondola not included.

Truflex® and PoweRated® Belt Dimensions

Showing Nominal Belt Top Widths and Outside Lengths With Corresponding Belt Numbers

Both Truflex® and PoweRated® belts are listed for your convenience. Standard series Truflex® V-Belts are available in four different sizes: the "0000" series, "1000" series, "2000" series and "3000" series V-Belts. The second and third digits in a standard series belt number indicates the outside circumference of the belt, in inches and the fourth digit indicates additional tenths of an inch of belt length, if any.

IMPORTANT: The top width shown is the width obtained by placing a steel tape across the top of the belt. The outside length is determined by placing a steel tape around the outside of the belt. These methods have been used because they are the ones most commonly used by Dealers and Jobbers when measuring a belt.

Hi-Power® II Belts Listed by Number

Showing Hi-Power® II Belts With the Corresponding Top Widths and Outside Lengths

PLEASE NOTE: V-Belt drives which use the belt as a clutch requires special consideration because the heat generated by belt slip (during engagement and disengagement) on some clutching applications can cause the V-Belt tensile materials in the belts listed below to shrink in length. The shrinkage may cause a belt, which is already engaged and driving, to not de-clutch, or a de-clutched belt may engage itself and start driving the machine unexpectedly. Depending on the machine and circumstances, either situation could prove dangerous to the machine operator or bystanders.

Belts especially designed to minimize or eliminate heat shrinkage may be required.

IMPORTANT: The outside length is determined by placing a steel tape around the outside of the belt. This method should be used because it is the one most commonly used by Dealers and Jobbers when measuring a belt.

Super HC® Belts Listed by Number

Showing Super HC® & Super HC® Molded Notch Belts
With the Corresponding Top Widths and Outside Lengths

IMPORTANT: The outside length is determined by placing a steel tape around the outside of the belt.
This method should be used because it is the one most commonly used by Dealers and Jobbers when
measuring a belt.

Tri-Power® Belts

Listed by Number

Showing Tri-Power® Belts With the Corresponding Top Widths and Outside Lengths

PLEASE NOTE: V-Belt drives which use the belt as a clutch requires special consideration because the heat generated by belt slip (during engagement and disengagement) on some clutching applications can cause the V-Belt tensile materials in the belts listed below to shrink in length. The shrinkage may cause a belt, which is already engaged and driving, to not de-clutch, or a de-clutched belt may engage itself and start driving the machine unexpectedly. Depending on the machine and circumstances, either situation could prove dangerous to the machine operator or bystanders.

Belts especially designed to minimize or eliminate heat shrinkage may be required.

IMPORTANT: The outside length is determined by placing a steel tape around the outside of the belt. This method should be used because it is the one most commonly used by Dealers and Jobbers when measuring a belt.

Industrial Micro-V® Belts

Listed by Number

Showing Micro-V® Belts With the Corresponding
Top Widths, Nominal Lengths and Number of Ribs

Industrial Micro-V® Belts are identified by a three-part symbol consisting of:

1. Standard Length Designation
2. Cross Section
3. Number of Ribs

For example, the belt designation **780L12** represents:

- (1.) 78.0" in Length
- (2.) L Cross Section
- (3.) 12 Ribs Wide

J Section – including 4, 6, 10, 16 and 20 ribs

L Section – including 6, 8, 10, 12, 14, 16, 18 and 20 ribs

M Section – including 6, 8, 10, 12, 14, 16, 18 and 20 ribs

NOTE: Rib combinations noted are RMA standard configurations. Belts available in most multiples.

* Available In 4 And 6 Rib Or Full Slab (30 Rib) Configurations Only.

❖ Available Only Up To 10 Rib Configuration Due To Ground Rib Construction.

Competitive Changeover Listing

Special Application Belts

The Gates numbers shown in the following listings were determined by comparing the applications and physical characteristics of the product. This is a guide for changing over stocks to Gates numbers, and does not mean that the competitive number shown will fit all applications recommended for the Gates number. If a customer asks for a product to replace a product of another brand, do not use this list. Ask for the make, model, year and engine size on which it is to be used, and refer to the alphabetical listing to determine the proper replacement.
