Also you can create a group to control them.</p> <div></div> <div>15</div>	<h3>Using Google Home to control smart devices</h3> <div></div> <div>16</div>	<p>1. Tap "Home Control" in the hamburger menu on the Google Home app's home page.</p> <div></div> <div>17</div>	<p>2. Then tap "+".</p> <div></div> <div>18</div>	<p>3. Find "Smart life" in the list.</p> <div></div> <div>19</div>
<p>4. In the new window, select your Smart life account's region, type your Smart life Smart account and password, then tap "Link Now".</p> <div></div> <div>20</div>	<p>5. After you assign rooms for devices .</p> <div></div> <div>21</div>	<p>6. Your devices will be listed in the Home Control page.</p> <div></div> <div>22</div>	<p>Alexa Skills:</p> <p>Now, you can use Echo to conteol two different smart plugs. Like Alexa, turn on the living room/Alexa, turn on the dining room. Alexa will turn on different devices separately. When you say Alexa, turn off the living room/Alexa, turn off the dining room. Alexa will turn off the different devices separately.</p> <p>Google Assistant:</p> <p>Now you can control your smart devices through Google Home. Take bedroom light as the example, the supported voice commands are as below:</p> <p>Ok Google, turn on/off bedroom light.</p> <p>Ok Google, brighten bedroom light.</p> <p>Ok Google, dim bedroom light.</p> <p>Ok Google, set bedroom light to red.</p> <div>23</div>							

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
