This is a unified manual of EPIC products.
Products features may change for improvement purposes.
Contents of this manual may be modified without prior notice.

User Pin Number Registration

Caution

Please perform while door is open Default Pin Number is [1, 2, 3, 4].
Don't forget your Pin Number.
If you forgot your Pin Number, New registration of Pin Number,
RFID Card, Fingerprint, Guest Pin Number and Remote Control is not possible.

- Open the battery cover and press the [Registration] button.
- Enter the User Pin Number followed by the [#] button.
(First registration: Initial User Pin Number [1, 2, 3, 4] + [#] button.)
- After entering the Registration Mode, press the [1] button.
- Enter 4~12 digits New User Pin Number and press the [#] button.

- Re-Enter the New User Pin Number
and press the [Registration] button to complete the process.

- Note**
- Only 1 user Pin Number can be saved.
 - When error occur during registration [2] will be lighted together with an error sound.
 - During each process, when [Registration] button is pressed, the registration process will end.
 - When the registration process has completed, a completion sound will be heard.

User RFID Card Registration (all-at-once)

- Open the battery cover and press the [Registration] button.
- Enter the User Pin Number followed by the [#] button.
(First registration: Initial User Pin Number [1, 2, 3, 4] + [#] button.)
- After entering the Registration Mode, press the [2] button.
- Place the Card to be registered on the card reader.
When the Card has been successfully registered,
the 3 digits Card Placement Number will be displayed on the number pad
and registration is complete.
(If you want to register additional Card, repeat step 4.)
- When registration of all Card is done,
press the [Registration] button to complete the process.

User RFID Card Registration (one-by-one)

- Open the battery cover and press the [Registration] button.
- Enter the User Pin Number followed by the [#] button.
(First registration: Initial User Pin Number [1, 2, 3, 4] + [#] button.)
- After entering the Registration Mode, press the [2] button.
- Enter the Card Placement Number from 001~200
on the number pad followed by the [#] button.
(When the selected Card Placement Number is already in use,
the error sound will be heard and [7] button will be lighted
on the number pad.)
- Place the Card to be registered on the card reader.
When the Card has been successfully registered,
the 3 digits Card Placement Number will be displayed on the number pad
and registration is complete.
(If you want to register additional Card, repeat step 4.)
- When registration of all Card is done, press the [Registration] button
to complete the process.

- Note**
- Up to 200 cards can be registered.
 - New registration will not delete previously registered card in the system.

User Fingerprint Registration (all-at-once)

- Open the battery cover and press the [Registration] button.
- Enter the User Pin Number followed by the [#] button.
(First registration: Initial User Pin Number [1, 2, 3, 4] + [#] button.)
- After entering the Registration Mode, press the [3] button.
- Check the total number of the registered Fingerprint displayed
on the number pad, then enter the Fingerprint to be registered for 4 times.
When the Fingerprint has been successfully registered,
the 3 digits Fingerprint Placement Number will be displayed
on the number pad and registration is complete.
(If you want to register additional Fingerprint, repeat step 4.)
- When registration of all Fingerprint is done,
press the [Registration] button to complete the process.

- Note**
- Up to 100 Fingerprints can be registered.
 - You can also re-register registered Fingerprints.
 - When error occur during registration LED [2] will be blinking.

User Fingerprint Registration (one-by-one)

- Open the battery cover and press the [Registration] button.
- Enter the User Pin Number followed by the [#] button.
(First registration: Initial User Pin Number [1, 2, 3, 4] + [#] button.)
- After entering the Registration Mode, press the [3] button.
- Check the total number of the registered Fingerprint displayed
on the number pad, enter the Fingerprint Placement Number
from 001~100 on the number pad followed by the [#] button.
(When the selected Fingerprint Placement Number is already in use,
the error sound will be heard and [7] button
will be lighted on the number pad.)
- Enter the Fingerprint to be registered for 4 times.
When the Fingerprint has been successfully registered,
the 3 digits Fingerprint Placement Number will be displayed
on the number pad and registration is complete.
(If you want to register additional Fingerprint, repeat step 4.)
- When registration of all Fingerprint is done,
press the [Registration] button to complete the process.

User Guest Pin Number Registration

- Open the battery cover and press the [Registration] button.
- Enter the User Pin Number followed by the [#] button.
(First registration: Initial User Pin Number [1, 2, 3, 4] + [#] button.)
- After entering the Registration Mode, press the [4] button.
- Enter 4~12 digits User Guest Pin Number and press the [#] button.
- Re-Enter the User Guest Pin Number
and press the [Registration] button to complete the process.

- Note**
- If you register a new guest Pin Number, the old one will be deleted.
 - Only 1 Guest Pin Number can be saved. It will be deleted after 1 usage.

User Remote Control Registration (all-at-once)

Caution

If the Remote Control receiver module is not connected and number [5]
button does not light up, the Remote Control cannot be registered.

- Open the battery cover and press the [Registration] button.
- Enter the User Pin Number followed by the [#] button.
(First registration: Initial User Pin Number [1, 2, 3, 4] + [#] button.)
- After entering the Registration Mode, press the [5] button.
- Press the [Open] button of the Remote Control to be registered.
When the Remote Control has been successfully registered,
the 3 digits Remote Control Placement Number will be displayed
on the number pad and registration is complete.
(If you want to register additional Remote Control, repeat step 4.)
- When registration of all Remote Control is done,
press the [Registration] button to complete the process.

User Remote Control Registration (one-by-one)

Caution

If the Remote Control receiver module is not connected and number [5]
button does not light up, the Remote Control cannot be registered.

- Open the battery cover and press the [Registration] button.
- Enter the User Pin Number followed by the [#] button.
(First registration: Initial User Pin Number [1, 2, 3, 4] + [#] button.)
- After entering the Registration Mode, press the [5] button.
- Enter the Remote Control Placement Number from 001~010
on the number pad followed by the [#] button.
(When the selected Remote Control Placement Number is already in use,
the error sound will be heard and [7] button will be lighted on the screen.)
- Press the [Open] button of the Remote Control to be registered.
When the Remote Control has been successfully registered,
the 3 digits Remote Control Placement Number will be displayed
on the number pad and registration is complete.
(If you want to register additional Remote Control, repeat step 4.)
- When registration of all Remote Control is done,
press the [Registration] button to complete the process.

- Note**
- The Remote Control module should be installed on the unit to work.
 - Up to 10 Remote Controls can be registered.
 - New registration will not delete stored ones in the unit.

User RFID Card Deletion (all-at-once)

- Open the battery cover and press the [Registration] button for 3 seconds.
- Enter the User Pin Number followed by the [#] button.
(First registration: Initial User Pin Number [1, 2, 3, 4] + [#] button.)
- After entering the Deletion Mode, press the [2] button.
- When the number pad turns on press the [#] button for 5 seconds.
The melody will be heard and all registered Cards will be deleted.

User RFID Card Deletion (one-by-one)

- Open the battery cover and press the [Registration] button for 3 seconds.
- Enter the User Pin Number followed by the [#] button.
(First registration: Initial User Pin Number [1, 2, 3, 4] + [#] button.)
- After entering the Deletion Mode, press the [2] button.
- Enter the registered Card Placement Number from 001~200
to be deleted followed by the [#] button.
(If you want to delete additional Card, repeat step 4.)
- When specific Card is deleted,
press the [Registration] button to complete the process.

User Fingerprint Deletion (all-at-once)

- Open the battery cover and press the [Registration] button for 3 seconds.
- Enter the User Pin Number followed by the [#] button.
(First registration: Initial User Pin Number [1, 2, 3, 4] + [#] button.)
- After entering the Deletion Mode, press the [3] button.
- When the number pad turns on press the [#] button for 5 seconds.
The melody will be heard and all registered Fingerprints will be deleted.

User Fingerprint Deletion (one-by-one)

- Open the battery cover and press the [Registration] button for 3 seconds.
- Enter the User Pin Number followed by the [#] button.
(First registration: Initial User Pin Number [1, 2, 3, 4] + [#] button.)
- After entering the Deletion Mode, press the [3] button.
- Enter the registered Fingerprint Placement Number from 001~100
to be deleted followed by the [#] button.
(If you want to delete additional Fingerprint, repeat step 4.)
- When specific Fingerprint is deleted,
press the [Registration] button to complete the process.

User Remote Control Deletion (all-at-once)

- Open the battery cover and press the [Registration] button for 3 seconds.
- Enter the User Pin Number followed by the [#] button.
(First registration: Initial User Pin Number [1, 2, 3, 4] + [#] button.)
- After entering the Deletion Mode, press the [5] button.
- When the number pad turns on press the [#] button for 5 seconds.
The melody will be heard and all registered Remote Control will be deleted.

User Remote Control Deletion (one-by-one)

1. Open the battery cover and press the [Registration] button for 3 seconds.
2. Enter the User Pin Number followed by the [#] button.
(First registration: Initial User Pin Number [1, 2, 3, 4] + [#] button.)
3. After entering the Deletion Mode, press the [5] button.
4. Enter the registered Remote Control Placement Number from 001~010 to be deleted followed by the [#] button.
(If you want to delete the additional Remote Control, repeat step 4.)
5. When specific Remote Control is deleted, press the [Registration] button to complete the process.

User Registered Information & Settings Reset

1. Open the battery cover and press the [Registration] button for 3 seconds.
2. Enter the User Pin Number followed by the [#] button.
(First registration: Initial User Pin Number [1, 2, 3, 4] + [#] button.)
3. After entering the Deletion Mode, press the [0] button.
4. Press the [Open/Close] button, then press the [Registration] button for 10 seconds.

- ①Note
- All user properties and settings will be reset.
 - Even if the registration reset is performed the initial administrator Pin Number will remain.

RFID Card Auto Recognition / Manual Recognition

1. Touch the number pad to turn on all LED.
2. Enter the User Pin Number followed by the [#] button.
(First registration: Initial User Pin Number [1, 2, 3, 4] + [#] button.)
3. Press the [1] button or [4] button.
4. Press the [Registration] button to complete the setting.

- ①Note
- LED [1] : Card Auto Recognition / LED [4] : Card Manual Recognition

- Detect high temperature (If the temperature sensor is at 60°C ± 10°C for 5 seconds) the deadbolt open action will be activated after 10 seconds.
- After opening the door, a High Temperature Alarm of 80 dB is generated for 2 minutes.
- Examine the opening status every 5 seconds. If the deadbolt does not open, retry open operation.
- Pressing any button from inside will execute deadbolt open operation.
- Deadbolt open action are executed, even if the Internal / External forced lock is set.
- You can disabled the High Temperature Alarm through authentication of Pin Number, Cards, Fingerprints and Remote Controls.
- When the Door Lock power is off, the High Temperature Alarm Function is disabled.
- During High Temperature Alarm Function, the [8] LED lights up.

Locking from Outside

- When the Deadbolt Auto Lock is set, if the deadbolt sensor is detected, the deadbolt will automatically lock after 2 seconds.
- Even if the Deadbolt Auto Lock is set, when you touch the number pad for 2 seconds before the deadbolt auto locks, Lock action will be activated.
- If the Deadbolt Manual Lock is set, touch the number pad for 2 seconds Locking action will be activated.

Locking from Inside

- Sub Type : Press the [Open/Close] Button. Turn the knob.
- Main Type : Press the [Open/Close] Button.
- When the Deadbolt Auto Lock is set, if the deadbolt sensor is detected, the deadbolt will automatically lock after 2 seconds.

Self-Diagnosis

- ★ LED [2] : Registration & Deletion Error
(Pin Number, Card, Fingerprint, Guest Pin Number, Remote Control, Dual Authentication ON setting failed)
- ★ LED [3] : Registration Error
(Number of Card, Fingerprint and Remote Control registration is "FULL" or No Registered Fingerprint)
- ★ LED [4] : Deadbolt Operation Error
- ★ LED [5] : Intrusion Alarm
- ★ LED [6] : Authentication Error
(Unregistered Pin Number, Card, Fingerprint, Guest Pin Number)
- ★ LED [7] : An Already Registered Placement Number
(Card, Fingerprint, Remote Control)
- ★ LED [8] : High Temperature Alarm
- ★ LED [9] : Internal / External Forced Lock Setting
- ★ LED [0] : Fingerprint Module Error

Rule Part 15.19(a)(3): This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Rule Part 15.21: The users manual or instruction manual for an intentional or unintentional radiator shall caution the user that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help
