

Dishwasher Cleaner Instructions

1

Ensure Dishwasher Is Empty

Active dishwasher cleaner should be used alone in an empty dishwasher.

Do not use this product with dishes in the machine.

2

Add 1 Tablet In The Detergent Dispenser Tray

Remove the tablet from the wrapper and place it in the detergent dispenser tray.

Do not add detergent or other cleaners. Only use one tablet at a time.

3

Run The Dishwasher On A “Normal” Wash Cycle

For dishwashers with a “clean” option, use that setting.

4

Open The Dishwasher Door And Let It Air-Dry

Repeat this process twice a month to keep your dishwasher clean and fresh.

Note, for the first cleaning or extra dirty dishwashers, you may need to repeat the steps above to achieve a full clean.

Usage Tips

- Dishwashers with heavy residue may require multiple cleanings to loosen and remove all the grime.
- If stains or odors still remain after the first cleaning, repeat instructions steps 1-4 above.
- Most dishwashers have a filter in the bottom of the machine. If possible, we recommend removing this filter and cleaning it by hand to remove any food and other residue.
