

MOONRAKER

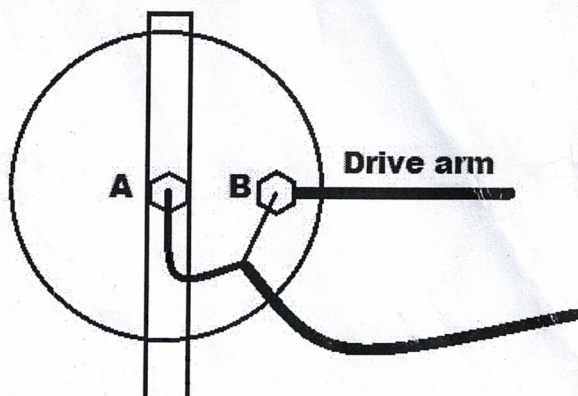

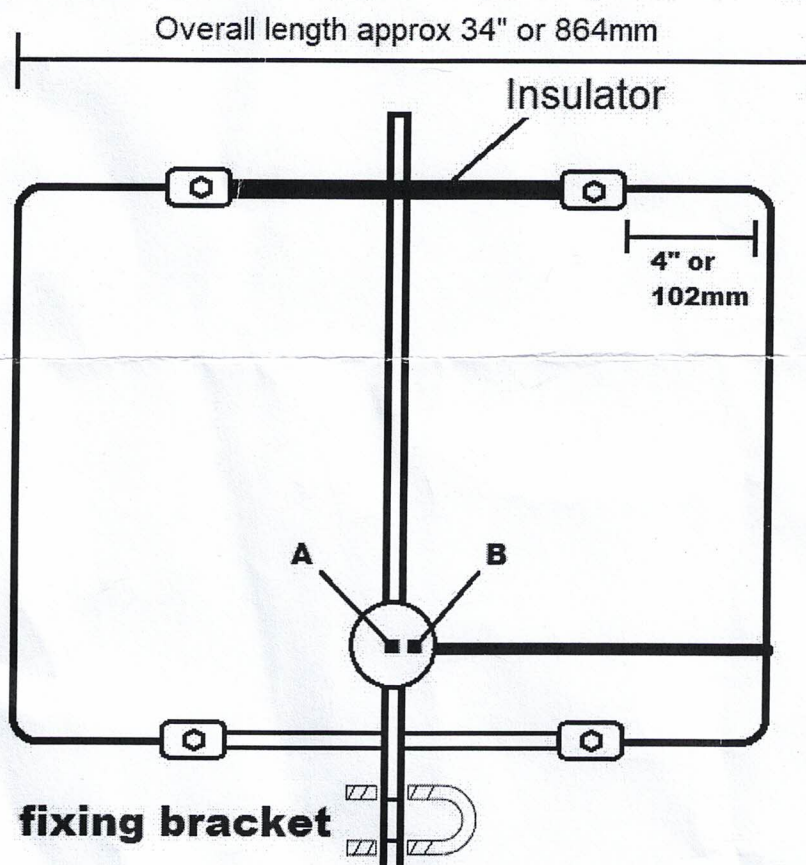

6 Metre 50 MHz Halo

SKU: 11-098

Tuning stub RG-58 @ 300mm long, Trim a couple of mm per cut you should end around 265mm +/-

Good starting point below, please try to keep each side equal.

Connection instructions

A This is the center bolt through the boom, connect the braid to this.

B This is the center core of your chosen coax, this connects to the driven arm please make sure they're connected well and have no shorts. Then fit the cap.

We hope you have many QSO's and wish you all the best in the hunt for DX, 73 The Moonraker team.
