---

3. Inserting the Memory Card

Due to limited internal storage, insert a MicroSD card to record videos, photos, and MP3 files.

**Steps to insert MicroSD card:**
1. Open the rubber cover to access the card slot.
2. Insert card with metal contacts facing up. Push until it clicks. Cards insert only one way. Do not force if misaligned.
3. Close the rubber cover.
4. To eject: Gently push the card to release it.
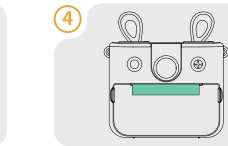

---

4. Loading Thermal Paper

①

30mm
57mm

Paper Specifications:
Use thermal paper with width ≤57mm and diameter ≤30mm.

②

Press the cover release slot and slide open as indicated.

③

Place paper with printable side facing up.

④

Pull paper through exit slot >1cm, then close cover.

⚠️ **Note** If printing is blank, ensure printable side faces up.

---

10. FCC Statement

FCC STATEMENT: This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
This device may not cause harmful interference, and
This device must accept any interference received, including interference that may cause undesired operation.

WARNING: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
Reorient or relocate the receiving antenna.
Increase the separation between the equipment and receiver.
Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
Consult the dealer or an experienced radio/TV technician for help.

RF warning statemet:
The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

If you encounter any quality issues with the product or have any suggestions, please contact us promptly via our after-sales service email, and we will provide you with a satisfactory response.
