**Comfort with
safety**

The **Plus** in safety, comfort and ergonomics!

You can recognise safe and ergonomic products with this sign.

Our society grows older – and stays actively.

At the same time our body will be influenced negativ by unilateral and wrong loading. We as KRAUSE realised the resulting consequences for our products and implemented it in our new product line.

Customers place importance on product features like safety, comfort and ergonomics. We are convinced: These aspects will become more important in the future.

PlusLine

We take our customers seriously – for more ergonomics at home and in the job.

In the PlusLine we combine products which are already orientated during the construction and development on ergonomic aspects. These products convey a unique standing comfort and a maximum on safety, comfort and ergonomics. So we ensure that health, wellbeing and comfort with easy handling and low product weight are connected.

The relation between the young and the old is changing*.

Noticeable changes in the age structure will reach Germany already in the coming decade. Especially the age class of the 50- to 65-year-old (+ 24 %) and the 80-year-old and the elderly (+ 48%) will grow until the year 2030. The number of the under 50-year-old will however decrease (- 16 %).

Age development of the target group:

Others call it “Avoiding accident and injury risks”. We call it: PlusLine.

Temporary climbing solutions like chairs or stools are always on hand. Unfortunately such makeshifts lead to accidents in household and job with serious injuries.

People are looking for safety – PlusLine provides it.

Extensive studies prove what our product development and sales figures show already for years: People want to feel safe in each situation. Products with ergonomic performance characteristics are demanded stronger. Products of the PlusLine fulfill this requirements in exemplary manner. The advantages for the users are apparent: They stand more comfortable, can work more relaxed and feel safer than on comparable standard products.

You will feel and
recognise it –
“safe” is so
comfortable!

Step ladder **Sepuro®**

The comfortable and ergonomic step ladder offers effortless standing thanks to 125 mm deep steps and a multifunctional tray with cable holders.

- + High ergonomic safety rail with integrated bucket hook and storage surface incl. tool holder and cable holders
- + Rail-surrounding safety hinge system (4CS) for a stable connection
- + 250 mm deep, profiled aluminium safety platform with slip-resistant inserts
- + 6-fold riveted step/rail connection for high stability
- + 125 mm deep safety steps with slip-resistant profiling for comfortable and safe ascent and descent
- + Additional corner struts on the lower step for more stability
- + Newly developed, large foot caps with soft part insert - stronger profiled, slip-resistant and floor-protecting thanks to larger and softer footprint (SafetyCap)
- + Pre-equipped with a wosatec QR code label for easy digitalisation of work equipment inspection documentation

+ 100% standing width

+ 60% step depth
