UTVSTEREO.COM

DRIVEN BY PASSION

I STARTED UTV STEREO WITH ONE OBJECTIVE, TO BUILD THE ABSOLUTE BEST UTV AUDIO SYSTEMS.

THIS VISION WAS INFLUENCED BY MY PASSION FOR RIDING IN GLAMIS, CA. THE EXCITEMENT AND THRILL OF ENJOYING A KILLER AUDIO SYSTEM IN A SXS IS SOMETHING SPECIAL, AND I WANT EVERYONE TO EXPERIENCE THIS.

MY BELIEF IS THAT A UTV AUDIO SYSTEM SHOULD BE LOUD, BUT MORE IMPORTANTLY ENJOYABLE. THE POWER AND QUALITY OF A SOUND SYSTEM IS WHAT TRULY SETS US APART.

I WOULD LIKE TO THANK ALL OUR CUSTOMERS WHO SHARE MY PASSION. NOTHING IS MORE FULFILLING THAN MEETING A FELLOW RIDER WHO LOVES THEIR UTV STEREO SYSTEM. I WILL CONTINUE TO INNOVATE AND PUSH THE LIMITS AND AM EXCITED FOR THE FUTURE OF UTV STEREO.

Chase Moll
OWNER, UTV STEREO

ELITE SERIES

8" COMPRESSION HORN SPEAKERS V2

UTVS-E84

600W^{PEAK}

Specifications:

- 8" 2-Way Speaker System
- Peak Power: 600W
- Continuous Power (RMS): 150W
- Nominal Impedance: 4 Ohm
- Frequency Response: 50Hz~20KHz
- Sensitivity: 93dB ±3dB
- Mounting Diameter: 183mm
- Mounting Depth: 98mm
- IP65 - Dustproof & Water-Resistant
- Integrated RGB Lighting

RETAIL:

\$850

LONG DISTANCE FIDELITY

Designed to deliver focused, long-throw sound output at an insane distance. These speakers thrive in wide, unconfined spaces where traditional coaxial speakers fall short. They perform exceptionally well at full volume ensuring that your music will cut through engine noise, wind, and open air, reaching listeners clearly, even at high speeds or across wide open terrain.

AUDIBLE FROM OVER
900

LONG-THROW
HORN

HIGH EFFICIENCY OUTPUT

Compression drivers deliver massive output by compressing the sound and driving it through the long throw horn, projecting audio further than a traditional speaker ever could. Tuned for outdoor use, they deliver concert-level sound performance with exceptional clarity at high volumes. Achieve maximum sound projection while maintaining sound quality and fidelity.

FEATURES

ILLUMINATE YOUR TUNES

Each Compression Horn Speaker is equipped with RGB LEDs. Wire in your favorite color or use our RGB Controller (sold separately) for millions of color choices.

DUSTPROOF & WEATHER-RESISTANT

Built with marine-grade components, UV-resistant housings, and corrosion-proof hardware to withstand dust, mud, moisture, and punishing outdoor elements. Tackle the toughest off-road conditions with the confidence of protected components designed to deliver reliable, long-lasting performance season after season.

EXCEPTIONAL BASS RESPONSE

Experience deep refined bass in vehicles with limited installation depth, delivering high-performance low frequencies in a compact design. Its low-profile frame allows for distortion-free bass even at high volumes.

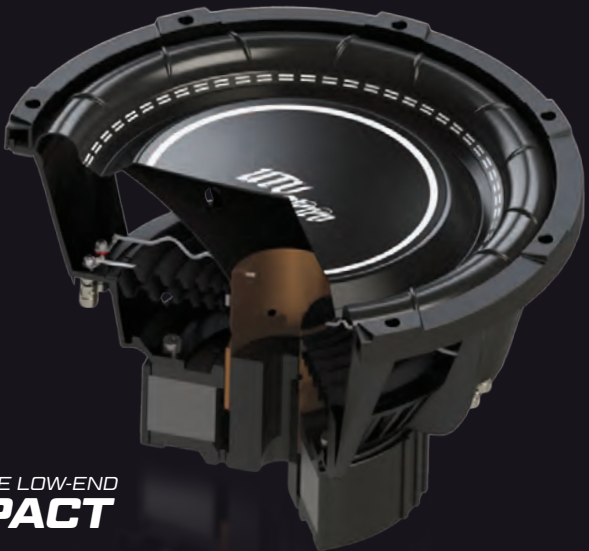

LOW FREQUENCY PERFORMANCE

Create immersive bass that is musical yet powerful. This 10" Elite subwoofer is truly the reference point for quality bass that any listener can appreciate. No matter what the application or song track you can expect smooth enjoyable bass.

DEEP POWERFUL BASS

Specifically designed to maximize low frequencies in a UTV environment where enclosure specifications may be limited but output is not. Nothing compares to the bass response and performance of the 12" Elite subwoofer.

MAXIMIZE YOUR BASS

From deep drops to heavy hits, this subwoofer brings bass that punches through your chest. This subwoofer was built to push the limits of bass that can be achieved in a UTV and satisfy the bass head who is looking for earth shaking low frequencies.

SIGNATURE SERIES

POWERFUL AND DYNAMIC

Create detailed & accurate sound reproduction in your UTV with the Signature Series amplifiers. Focused on power aligned with sound quality, they are the best option for the audiophile looking to bring a more immersive and lifelike listening experience to the off-road environment. These amplifiers create exceptional clarity, balance, and definition across the entire frequency spectrum.

BUILT FOR
SOUND QUALITY

SLEEK STREAMLINED PROFILE

PRECISION CNC MACHINED

The stylish profile enhances the amplifier's visual appeal and makes it fit seamlessly into any setup. The amplifier's chassis is machined from a solid piece of aluminum to promote optimal heat dissipation while protecting internal components and ensuring reliability. These amplifiers are the icon of UTV Stereo's quality and performance.

DUSTPROOF & WEATHER-RESISTANT

Built with marine-grade components, UV-resistant housings, and corrosion proof hardware to withstand dust, mud, moisture, and punishing outdoor elements. Tackle the toughest off-road conditions with the confidence of protected components designed to deliver reliable, long-lasting performance season after season.

WHAT SETS OUR
BATTERIES APART

ALWAYS fresh & fully charged, NEVER stored for extended periods before reaching the customer. This means longer lifespan and better performance from day one.

Built purely for CAPACITY. More amp hours mean stronger & longer-lasting voltage under load. Engineered for long-lasting energy, not just a quick start.

Extremely reliable with a defect rate near zero. Rest assured that these batteries can handle some abuse and will offer years of performance.

SYNCHRONIZE YOUR LIGHTING

Take full control of your UTV's lighting setup with complete LED synchronization across all your light zones—rock lights, speaker lights and led rings. Our system easily links multiple control modules to communicate across your LED zones, ensuring every light displays the same color, pattern, and effect at the exact same time.

PLAYS WITH THE MUSIC

With 4 different music modes, your lights will flash, fade and pulse to the beat of your favorite track. The integrated mic captures your music and syncs the lighting effects with the rhythm. Because the mic is built directly into the controller, the timing is tighter and more responsive, creating a visual show that will transform your UTV into a concert on wheels.

PURE WHITE + BRAKE FUNCTION

With the UTV Stereo rock light kit you are able to produce true pure-white output with a dedicated white LED chip (not RGB mixed), perfect for high-visibility tasks or clean aesthetic lighting. For added safety, simply connect the brake light trigger to ignite bright red when the vehicle's brakes are applied.
