Current Status

This report provides the status of Eaton's testing.

Evaluating	The initial state in the process. The security update is being evaluated.
Testing	The security update is being tested. The Client Recommendation will remain on "Hold" until all issues have been addressed.
Testing Complete	Testing has been completed and the Client Recommendation now contains the proposed course of action.
Not Tested	Testing has not been completed because the security update is not applicable to the product.

Client Recommendation

This report provides Eaton's recommendation based on the test results.

Hold	Initial state in the process. The customer should take no action until Eaton has tested the update and issued a recommendation.
Install	Eaton considers that this update addresses security issues with functions or services used by its product, or underlying platform services, which would be at risk if not updated. The update has been tested and no adverse side effects have been observed. The customer should install the update at the earliest convenience.
Not Applicable	Eaton considered the security update unnecessary and did not test it. The customer does not need to install it since it does not address any function or service used by the product.

There are no understandings, agreements, representations, or warranties, express or implied, including warranties of merchantability or fitness for a particular purpose, other than those specifically set out by any existing contract between the seller and buyer. Any such contract states the entire obligation of the seller. The contents of this report shall not become part of or modify any such prior or existing agreement.

The recommendations in this report are based on Eaton experience and judgment. THIS INFORMATION SHOULD NOT BE CONSIDERED AS ALL-INCLUSIVE OR COVERING ALL CONTINGENCIES. If further information is required, Eaton should be consulted.
