Printed in the Netherlands by Ipskamp

Elektor is part of EIM, the world's leading source of essential technical information and electronics products for pro engineers, electronics designers, and the companies seeking to engage them. Each day, our international team develops and delivers high-quality content - via a variety of media channels (e.g., magazines, video, digital media, and social media) in several languages - relating to electronics design and DIY electronics. www.elektor.com

• Table of Contents

• Declaration	6
• Preface	7
Chapter 1 • The MAX78000FTHR Development Board	13
1.1 • Overview	13
1.2 • Basic features	13
1.3 • Pushbuttons and LEDs	15
1.4 • GPIO Pinout	16
1.5 • The FTHR board component interface signals	18
1.6 • The startup and the demo application	18
1.7 • The voltage regulator/battery charger	19
1.8 • DAP-link/SWD debug interface	19
Chapter 2 • The MAX78000 Microcontroller	21
2.1 • Overview	21
2.2 • Basic features of the MAX78000	21
2.2.1 • The Convolutional Neural Network Accelerator (CNN)	23
2.2.2 • The memory	23
2.2.3 • Comparators	23
2.2.4 • Clocking	23
2.2.5 • General-purpose input-output (GPIO) and special function pins	24
2.2.6 • Parallel Camera Interface (PCIF)	25
2.2.7 • Analog-to-Digital Converter (ADC)	25
2.2.8 • Power management (PMU)	26
2.2.9 • Real-time clock (RTC)	27
2.2.10 • Programmable timers	27
2.2.11 • Watchdog timer (WDT)	28
2.2.12 • Pulse train engine (PTE)	28
2.2.13 • I2C Interface (I2C)	28
2.2.14 • I2S Interface (I2S)	28
2.2.15 • Serial Peripheral Interface (SPI)	28
2.2.16 • UART (UART, LPUART)	29
2.2.17 • 1-Wire Master (OWM)	29
2.2.18 • DMA Controller	29

2.2.19 • Security (AES)	29
2.2.20 • True Random Number Generator (TRNG) Non-Deterministic Random Bit Generator (NDRBG)	29
2.2.21 • CRC	29
2.2.22 • Bootloader.	30
2.2.23 • Device Resets	30
2.2.24 • Interrupts and Exceptions	30
Chapter 3 • Beginning with the MAX78000FTHR Development Board	31
3.1 • Overview	31
3.2 • Installing the Eclipse MaximSDK Software	31
3.3 • Using the Eclipse MaximSDK – example MAX78000FTHR program	32
3.4 • Project 1 – Creating a C program – display message	41
Chapter 4 • Simple MAX78000FTHR Hardware Projects	46
4.1 • Overview	46
4.2 • Project 1 – External flashing LED (+1.8V output port voltage)	46
4.3 • Project 2 – Alternately flashing LEDs (+1.8V output port voltage)	50
4.4 • Project 3 – Alternately flashing LEDs (+3.3V output port voltage)	53
4.5 • Project 4 – Rotating LEDs – same port pins	55
4.6 • Project 5 – Rotating LEDs – different port pins	58
4.7 • Project 6 – Binary up counter with LEDs	60
4.8 • Project 7 – Random flashing LEDs	63
4.9 • Project 8 – Push button and LED – using an on-board button	65
4.10 • Project 9 – Two pushbuttons and two LEDs – using external buttons	67
4.11 • Project 10 – Using an external button – external interrupts	71
4.12 • Using LCDs	73
4.13 • Project 11 – LCD seconds counter.	76
Chapter 5 • Analog-To-Digital converters (ADC)	89
5.1 • Overview	89
5.2 • Project 1 – Voltmeter with LCD.	89
5.3 • Project 2 – Temperature measurement	94
5.4 • Project 3 – ON/OFF temperature controller.	97
5.5 • Project 4 – ADC with completion interrupt – displaying the temperature	101
Chapter 6 • Serial Communication – UART	104
6.1 • Overview	104
6.2 • MAX78000FTHR UART serial ports.	106
6.3 • Project 1 – Sending the temperature readings to a terminal with relative time stamping	108
6.4 • Project 2 – Calculator project using a terminal	111
6.5 • Project 3 – MAX78000FTHR and Arduino Uno serial communication	114
6.6 • Project 4 – UART interrupts	118

Chapter 7 • I2C Bus Interface	121
7.1 • Overview	121
7.2 • The I2C Bus	121
7.3 • I2C pins of the MAX78000 microcontroller	122
7.4 • Project 1 – I2C port expander	123
7.5 • Project 2 – TMP102 temperature sensor	128
Chapter 8 • SPI Bus Interface	136
8.1 • Overview	136
8.2 • MAX78000 microcontroller SPI ports	137
8.3 • Project 1 – SPI send/receive	137
Chapter 9 • Timers	142
9.1 • Overview	142
9.2 • Timer operation	143
9.3 • 32-bit single/cascade and dual 16-bit modes	143
9.4 • Project 1 – Time delay – using a one-shot timer (monostable).	143
9.5 • Project 2 – Continuously running timer (astable).	149
9.6 • Project 3 – Refreshing a 2-digit 7-segment display – seconds counter.	153
9.7 • Project 4 – Refreshing a 4-digit 7-segment display – seconds counter.	165
9.8 • Pulse width modulation (PWM)	171
9.8.1 • MAX78000 PWM	173
9.9 • Project 5 - Pulse width modulation (PWM) – generating 10 kHz square wave . .	175
9.10 • Project 6 - Pulse width modulation (PWM) – changing the brightness of an LED	177
9.11 • Project 7 - Pulse width modulation (PWM) – brushed DC motor speed control.	180
Chapter 10 • Pulse Train Engine (PT)	184
10.1 • Overview	184
10.2 • Project 1 – Generate a pulse train with a specified sequence	184
10.3 • Project 2 – Generate a pulse train with a specified frequency.	186
Chapter 11 • True Random Number Generator Engine (TRNG)	189
11.1 • Overview	189
11.2 • Project 1 – Generate random numbers	189
Chapter 12 • 1-Wire Master (OWM)	192
12.1 • Overview	192
12.2 • MAX78000 microcontroller 1-Wire pins	192
12.3 • Project 1 – DS1820 1-Wire digital thermometer	192
Chapter 13 • I2S Bus Interface	200
13.1 • Overview	200
13.2 • MAX78000 microcontroller I2S support	201
13.3 • MAX78000 microcontroller I2S pins	201
13.4 • Project 1 - I2S Bus - receiving microphone data	202

Chapter 14 • Using the Camera	208
14.1 • Overview	208
14.2 • Project 1 – Using the camera	210
Chapter 15 • The Instruction Cache	214
15.1 • Overview	214
15.2 • Project 1 – Enabling/disabling the instruction cache	214
Chapter 16 • Using a TFT Display	217
16.1 • Overview	217
16.2 • 2.4 inch TFT display	217
16.3 • Project 1 – Displaying various shapes and text on the display	219
Chapter 17 • Convolutional Neural Networks (CNN)	225
17.1 • Overview	225
17.2 • Artificial neural networks (ANNs)	225
17.3 • The ANN structure	225
17.4 • Convolutional Neural Networks (CNNs)	229
17.5 • The MAX78000 CNN accelerator	232
17.6 • Demonstration programs	233
17.7 • Using the kws20_demo	234
17.8 • Project 1 - Modified program - flashing the on-board LED with the spoken word count	239
17.9 • Operation of the kws20_demo program	240
17.10 • Modelling, Training, and Synthesis.	242
17.11 • Software/hardware requirements and software installation for training and synthesis	246
17.12 • Project 2 – Training for a new keyword	248
Appendix A • Running the Programs in this Book	258
Appendix B • References to Useful Files and Web Links	260
B.1 • Useful files	260
B.2 • Useful Weblinks	263
• Index	264
