

Plantronics Savi 700 Series Upgrade Guide

COMPARISON OF:

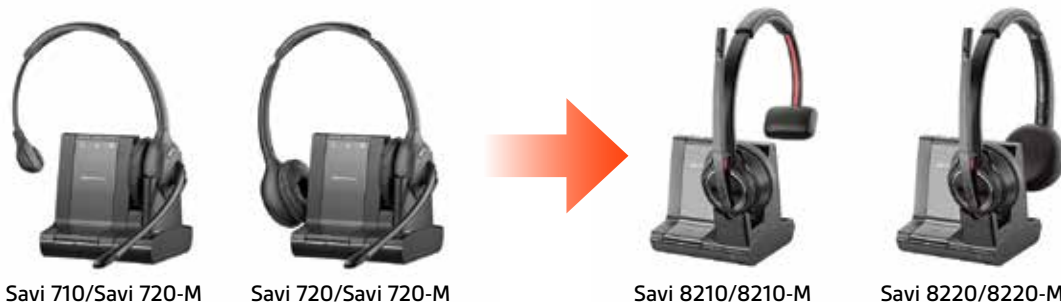

SAVI 700 SERIES AND SAVI 8200 SERIES

Savi 700 Series and Savi 8200 Series are intelligent headset systems to manage PC, mobile and desk phone calls with the audio quality you would expect from DECT technology. With the introduction of the Savi 8200 Series, enterprise-grade DECT audio is taken to a new level of sound-quality excellence.

Employees can still connect seamlessly to PC, mobile and desk phones, but now with Savi 8200 Series they benefit from convenient features—such as a ringer in the base. The noise-canceling microphone filters out loud conversations nearby, with Plantronics Hub you now get even greater call privacy. and IT can now manage and optimize user density using Plantronics Manager Pro, a Software-as-a-Service sold separately. Additionally, Savi 8220 offers active noise canceling (ANC) and hi-fi stereo, so employees can block out distracting noise and listen to music and media when its time to focus.

In modern enterprises and contact centers, the Savi 8200 Series helps deliver simply better conversations.

Savi 700 Series to Savi 8200 Series
