

Kinhank Portable Hard Drive User Manual

Product parameter

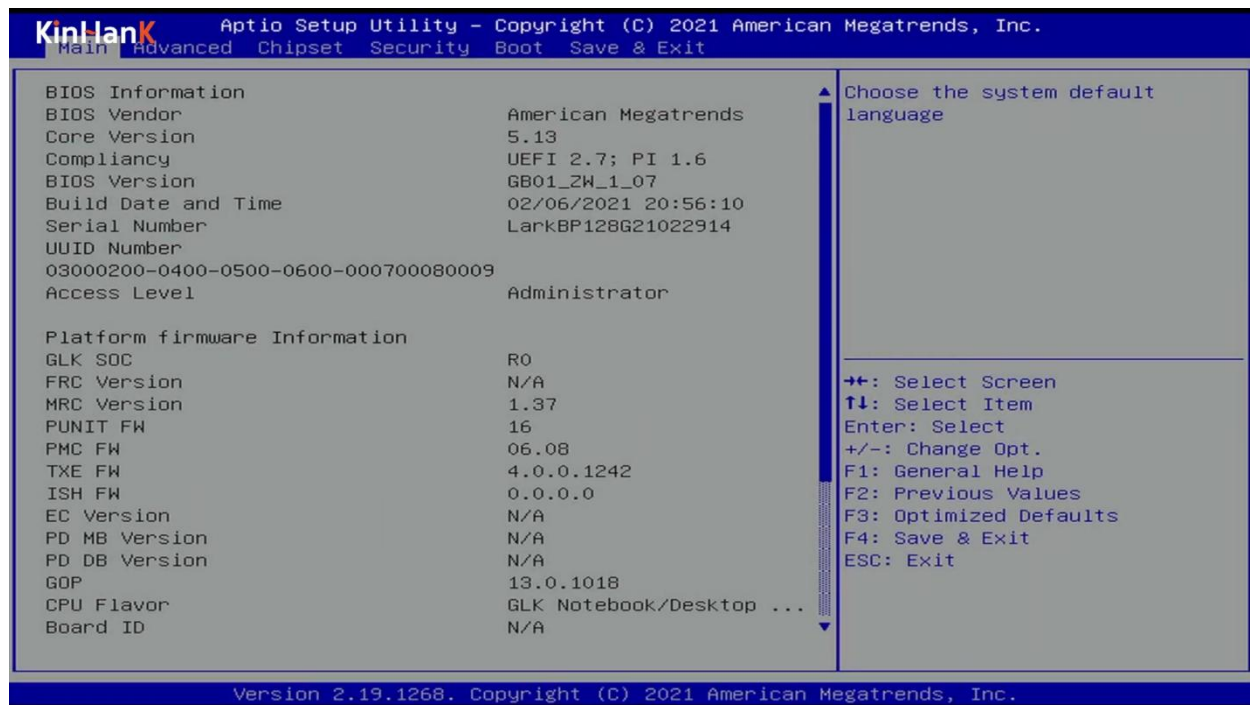

- Product Name: Portable Game Hard Drive
- Brand: Kinhank
- capacity: 500GB
- Size: 2.5 inches
- Interface type: USB 3.0
- Support system: windows/Mac OS/Linux

Notice

This hard drive will only work with X86 hardware (32bit or 64bit), any ARM based device (Windows Surface series, Mac with power pc CPU or M1 CPU) will not work. The BIOS interface and options may vary on your device as manufacturers may adopt unique BIOS or UEFI systems, if you encounter any hiccups and difficulties, you are more than welcome to contact our friendly sales staff.

How to enter the game system?

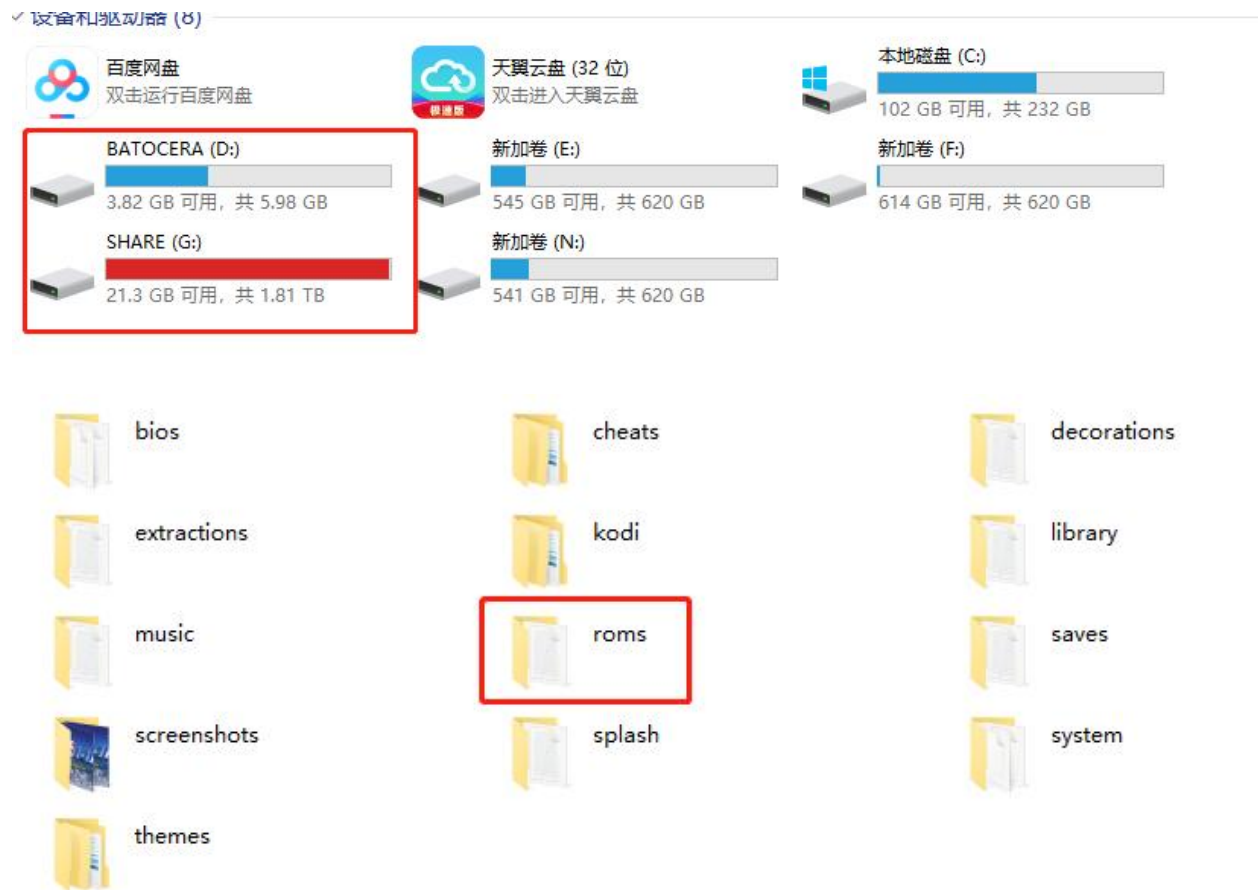

- 1, Connect the portable hard drive to the USB port on your PC or Mac when it's off, USB 3.0 port is recommended.
- 2, After pressing the power button, keep tapping ESC or Delete on your keyboard to enter BIOS. For Mac users, simply hold Option and choose the portable hard drive to boot into.

3, By choosing the Hard Drive in the boot override option, your PC will boot into Batocera for once, after restarting it will get back to your own operating system. If you'd like Batocera as default booting option, go to the Boot page and set the portable hard drive as Boot Option #1.

How to check hard disk capacity?

The hard drive is pre-installed with the latest *Batocera 33* game system, and you can view the gaming partition directly in My Computer after connect hard drive, support delete or add games directly.
